Minbrie Copper-Base Metals Project - Investor Webinar

Lincoln Minerals Limited (LML or Company') (ASX: LML) is pleased to announce it will host an investor webinar **on Thursday, 21 August 2025 at 11:00am AEST** to discuss advancements at its Minbrie copper-base metals project in the Gawler Craton, South Australia, where Lincoln has mineralisation over a 7km strike¹, a BUDD192 Discovery Hole² of 29.5m @ 0.8% Cu, 7.5% Pb, 1.9% Zn, 9.0 g/t Ag from 131.1m, and plans to drill in the next quarter, Q4CY25.

Lincoln's **CEO Jonathon Trewartha** will present the webinar, which will include a Q&A session.

Shareholders, investors and other interested parties are encouraged to register for the webinar at the following link:

https://us02web.zoom.us/webinar/register/WN_4ekHjuqySI2GVddlOdSrDQ#/registration

After registering, participants will receive a confirmation email with details on how to join the webinar.

A recording will be available at the same link shortly after the conclusion of the session.

Investors are encouraged to send questions prior to the webinar to kristin@nwrcommunications.com.au

Approved for release by the Board of Lincoln Minerals Limited.

About Minbrie Cu-Base Metal Project

Category	Details
Geological Setting & Deposit Type	- Located in South Australia's Gawler Craton: Potential for large-scale copper, gold, and base metal mineralisation. - The mineralisation style in the current working model is Archean VMS (volcanogenic massive sulphide) and/or SedEx, characterised by hydrothermal alteration. - Associated with deep-tapping faults and intrusive rocks
Resource Potential	- Copper-zinc-lead-silver mineralisation over 7km strike¹ - Shallow depths (<200m) suitable for potential open-pit mining - Existing drill results, geochemical data, and geophysical surveys - Discovery hole BUDD192²: 29.5m @ 0.8% copper (Cu), 7.5% lead (Pb), 1.9% zinc (Zn), 9.0 g/t silver (Ag) from 131.1m
Infrastructure & Jurisdiction	- South Australia highly ranked for global mining investment and permitting <25km from key regional infrastructure 265km from Port Pirie Smelter - Environmental baseline completed in 2011. 100% owned project by Lincoln Minerals for all metals excluding iron

Regional setting for Minbrie Cu-Base Metal project on Eyre Peninsula, South Australia

About Lincoln Minerals

Lincoln Minerals (ASX: LML) is an Australian exploration and development company focused on advancing critical minerals projects in South Australia's world-class Gawler Craton region. Lincoln's portfolio includes high-value copper, uranium, graphite, and magnetite assets, all strategically positioned to support the global shift towards electrification, decarbonisation, and supply chain security.

The company's key projects include the Minbrie Copper & Base Metals Project, where recent exploration has confirmed a large-scale mineralised system over a 7km strike. Lincoln is also advancing the Kookaburra Graphite Project, a high-grade, at-surface deposit on an existing mining lease, and the Green Iron Magnetite Project, a large-scale magnetite resource positioned to supply SA's emerging green steel industry. The company also holds multiple highly prospective uranium targets across its existing tenement portfolio, located in a highly prospective uranium region.

Lincoln is actively progressing exploration and development across its portfolio while seeking strategic partnerships and alternative funding pathways to accelerate project advancement.
