TRIGG APPOINTS HIGHLY EXPERIENCED STRATEGIC ADVISOR TO DRIVE ANTIMONY PROJECT DEVELOPMENT

Trigg Minerals Limited (ASX: **TMG**) ("**Trigg**" or the "**Company**") is pleased to announce the appointment of former Mandalay Vice President Andre Booyzen as its Senior Antimony Strategic Advisor. Mr Booyzen, will play a key role in exploring and advancing potential strategic offtake and global partnerships for Trigg's antimony project portfolio.

Trigg's Wild Cattle Creek deposit[2] within the Achilles Project is one of the few **primary antimony deposits** positioned to supply the Western world with Antimony and Tungsten - both critical minerals subject to recent export restrictions by China, which controls the majority of global supply.

Mr. Booyzen is an experienced strategic and asset leader with more than 20 years in operational, senior, and executive roles in mining, specifically within the antimony space. From 2010 to 2017, he served as Vice President for Mandalay Resources Corp. (TSX: MND) Australian Operations, where he had full strategic and operational control of the Costerfield Gold-Antimony Mine, **including product sales, offtakes, and negotiations.**

Executive Chairman Timothy Morrison said: "*Mr Booyzen's appointment came at an important time as Trigg positioned its expansive NSW antimony portfolio for development, in particular its Achilles Project, which hosts Australia's highest grade undeveloped antimony resource at the Wild Cattle Creek deposit.*

Andre's extensive experience at Mandalay Resources' Australian operations, as one of the Western world's only antimony producers, will be invaluable to Trigg as we look to develop our antimony projects in NSW. We are focused on delivering value to our Shareholders and see the current antimony market environment, which has experienced record prices of up to US$38,000 per tonne in 2024[1], and continued tightening of antimony export restrictions by China, as the sign that we need to unlock the potential of these projects as quickly as possible, and we believe Andre can help us achieve that."

Trigg has a portfolio of antimony exploration and development projects in NSW, including Achilles and the Taylors Arm and Spartan antimony projects. It expects strong newsflow through into 2025 with plans to restate the Mineral Resource Estimate[2] at Achillies Antimony project, and advance exploration and drilling across its portfolio.

It also holds the Drummond epithermal gold project in Queensland, which has antimony exploration potential.

Announcement authorised for release by the Board of Trigg Minerals Limited.
