Disclaimer

Competent Person's Statement

Information in this presentation that relates to exploration results is based on and fairly represents information and supporting documentation prepared and compiled by Mr Steve Vallance, who is a Member of the Australian Institute of Geoscientists. Mr Vallance is the Exploration Manager for Reach Resources Limited employed on a full-time basis. Mr Vallance has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person, as defined in the 2012 Edition of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves. Mr Vallance consents to the inclusion in the presentation of the matters based on this information in the form and context in which it appears.

Forward Looking Statement

This presentation contains forward looking statements concerning the projects owned by Reach Resources Limited. If applicable, statements concerning mining reserves and resources may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward looking statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on management's beliefs, opinions and estimates as of the dates the forward looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments.

No New Information

Except where explicitly stated this presentation contains references to prior exploration results, all of which have been cross-referenced to previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements.

Corporate Snapshot

Board & Management

Experienced team of professionals

Mr Jeremy Bower
CEO

Mr Bower is an experienced executive with a strong technical background spanning the last two decades. He has worked across several industries with a major focus on mining and resources at global consulting firms and BHP Iron Ore.

Mr Robert Downey
Non-Executive Chairman

Mr Downey is admitted as a barrister and solicitor in Western Australia and has practiced as a corporate and commercial lawyer for over 20 years.

Mr Sam Wright
Non-Executive Director

Mr Wright has over fifteen years' experience in the administration of ASX listed companies, corporate governance and corporate finance.

Mr Matthew O'Kane
Non Executive Director

Mr O'Kane is an experienced mineral industry executive and company Director with 25 years' experience in the mining, commodities and automotive sectors.

Debt	nil

ESG

Environmental, Social & Governance at Reach Resources

Reach Resources is proud to be completing its first ESG report to set a baseline for the standards and commitments the Company is striving for to contribute to a sustainable future.

Our objective is to source the critical minerals required to power a cleaner and greener future for the planet. However, during this process we commit to respect the communities and environment whose land we explore. We commit to open and honest communication with the Traditional Owners of the land and other stakeholders such as pastoralists and nearby towns and communities. We commit to undertaking thorough and independent environmental assessments and upholding the relevant environmental legislations and policies before we disturb any land.

We commit to striving to ensure that we use best practices so that our exploration reflects our desire to be a part of the clean green electric revolution.

As Reach Resources advances its ESG strategy, it will be sharing its efforts and impact regularly, in line with its annual reporting cycle.

Value Proposition

Tier 1 Mining Location – Large Scale Potential

- Two key critical mineral project areas in emerging hot-spot in the Gascoyne, Western Australia
- Inferred Gold Resource provides opportunity to potentially fund Critical Mineral exploration
- Diverse critical mineral portfolio - Li, Nb, REE, Mn
- Passive investment in REE magnet recycling tech
- Leveraged to exploration success – Neighbouring large scale projects include

Minerals 260

HASTINGS
Technology Metals Limited

Yinnetharra Projects

Camel Hill

- Outcropping pegmatites with LCT potential
- Geological setting is similar to Morrissey Hill with the fertile Thirty-Three Supersuite and Leake Springs Metamorphic contacts
- Geochemical soil assays due late September

Wabli Creek

- Source of high-grade niobium and heavy rare earth oxide (HREO) results **confirmed as a rare element pegmatite swarm with niobium, yttrium, fluorine (NYF)** geochemical signature *
- Awaiting geochemical soil assays late September.

ASX:RRI Announcements * 1 Jun '23

Wanna Projects

White Castles

- Historical high-grade rock-chip results up to 18% MnO₂*- Little to no exploration undertaken since 2010
- Multiple surface manganese outcrops over 50 km of continuous strike.
- The Ullawarra formation regionally hosts supergene-stratiform, lateritic and detrital Mn

Skyline

- West side of tenement identified REE targets with up to 3173ppm TREO from limited rock chip sampling program Oct '22 **
- NE portion Edmund sediments – base metals/Mn

Morrissey Hill

Large Scale Lithium Potential

- **Strategically Located** between large Gascoyne Lithium Projects
- Highly prospective lithium project with high grade results from outcropping **pegmatites** **along strike from Delta Lithium**
- **Maiden drill program on initial lithium target – Bonzer Prospect just completed** with results due mid-October
- **Multiple outcropping pegmatite target areas identified** through out tenement

Morrissey Hill

Lithium

Lithium

Highlights

- Lithium mineralisation confirmed with rock chip assays **up to 2.3% Li₂O** (lithium oxide); **4295ppm Cs** (caesium) and **705.8ppm Ta₂O₅** (tantalum oxide). *
- Phase 1 drilling intersected **multiple thick, stacked pegmatites** up to 30m thick at the Bonzer Prospect to depths of ~400m (down hole), Morrissey Hill.**
- At least one of the larger pegmatites intersected at depth appears to be “blind”.
- Phase 1 has drill tested just one of several prospective pegmatite zones in the right geological setting.

ASX:RR1 Announcement *15 May 2023 ** 5 Sept '2023

Gascoyne Project Pipeline

2023

Completed to Date

2023

Upcoming

Morrissey Hill

- ✓ Phase one Morrissey Hill Drill Campaign
- ✓ Phase one Geochemical soil sampling program
- ✓ Aboriginal heritage survey x2

Yinnetharra Projects

- Phase one Assays - Morrissey Hill drill campaign (**Oct '23**)
- Phase 2 drilling - Morrissey Hill (planned) (**Oct - Nov '23**)

Wanna Projects

- Geochemical soil sampling assays - White Castles (**Sep '23**)
- **Negotiate Heritage Agreement - White Castles/Skyline for '24 field program**
