

Exploration Report

Until September 30, 2025, ANTAM's total exploration cost totalled to Rp176.95 billion (unaudited preliminary figure), focusing on gold, nickel and bauxite.

Jakarta, October 10, 2025

PT Aneka Tambang Tbk (ANTAM; IDX: ANTM; ASX: ATM) is pleased to announce its exploration report for periods ended September 30, 2025 in accordance with the Indonesia Stock Exchange listing rules.

ANTAM's exploration activities until September 30, 2025 were focused on gold, nickel and bauxite with total unaudited preliminary cost of Rp176.95 billion.

GOLD

Until September 30, 2025, ANTAM conducted gold exploration activities in Pongkor, West Java. In Pongkor, ANTAM conducted in mine drilling (underground) and deep drilling (surface).

NICKEL

ANTAM's nickel exploration until September 30, 2025 is conducted in North Konawe and Pomalaa, Southeast Sulawesi. In addition, exploration activities were also conducted on the Mining Business License (IUP) of ANTAM's subsidiary, PT Sumberdaya Arindo (PT SDA), in Buli, North Maluku.

In the North Konawe area, activities carried out include geological mapping, core sampling, core logging, grid measurement & re-measurement, installation of predrill and postdrill stakes, resistivity measurement, single tube drilling, preparation, analysis laboratory and support activity.

In the Pomalaa area, activities included geological mapping, core sampling, core logging, grid measurement & re-measurement, installation of measuring stakes, single tube drilling, as well as preparation and laboratory activities.

Meanwhile, exploration activities in the Buli area by PT SDA include core logging, measurement and installation of benchmark (BM), installation of measuring stakes, re-measurement, and drilling.

Exploration Report

BAUXITE

Bauxite exploration activities until September 30, 2025 were conducted in Tayan, Landak and Mempawah - Toho, West Kalimantan. In the Tayan area, the exploration activity was test pit excavation, measurement and installation of benchmark (BM), grid test pit measurement, and development of test pit. In the Landak area, the activities carried out were land identification, geological mapping, test pit drilling, measurement and installation of benchmark (BM), and grid test pit measurement. Meanwhile, in Mempawah – Toho, conducted land identification, geological mapping, test pit sampling, polygon grid/trajectory measurement, and development of test pit.

ANTAM through the Geomin Unit undertakes integrated mineral exploration activities which include area survey activities, geological exploration, geophysical exploration, geodesy survey, drilling, physical and chemical analysis, calculation of mineral reserves and resources supported by integrated Geographic Information System (GIS). Exploration activities conducted to ensure the adequacy of the Company's strategic mineral resources and reserves potential.

ANTAM'S EXPLORATION AREAS UNTIL SEPTEMBER 30, 2025

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr. Bronto Sutopo who is a Member of The Australasian Institute of Mining and Metallurgy. Mr. Bronto Sutopo is a full-time employee of the company. Mr. Bronto Sutopo has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Bronto Sutopo consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
