

Mark Lynch-Staunton, CEO commented:

"We are thrilled to secure this option over such a highly prospective land package adjacent to the Glenburgh Gold Project. This option agreement perfectly aligns with our strategy of expanding in world-class gold districts.

"The addition of over 20km of prospective strike would significantly enhance the upside of Glenburgh, and we are confident it will deliver exceptional value for our shareholders. We look forward to completing the Spartan transaction and progressing exploration on this exciting new ground."

Benz's key point of difference lies in its team's deep geological expertise and the use of advanced geological techniques, particularly in high-metamorphic terrane exploration. The Company aims to rapidly grow its global resource base and solidify its position as a leading gold explorer across two of the world's most prolific gold regions.
