NMR Managing Director & CEO Blake Cannavo commented: *"The latest 501-ounce doré smelt continues the consistent production momentum we are building at Blackjack following our record August gold result.*

With weekly smelting continuing and refinery results progressively being received, we remain focused on maintaining production and increasing gold output from the Blackjack Operations."

Gold Production Update

The Company's latest gold smelt, completed on 15 September 2026, produced 501.0oz (15.58kg) of doré, comprising BJM095 plus associated CIL pieces totalling 330.6oz, and BJM096 weighing 170.35oz.

This result marks the Company's third consecutive weekly smelt and continues the strong production cadence established at Blackjack following the record 1,080.5oz refined gold outturn achieved during August 2026.

Official refinery results have now been received for BJM093, produced from the 8 September 2026 smelt, which had an official received weight of 276.8oz and returned an assay of 39.68% Au and 49.63% Ag, representing an official outturn of 109.9oz gold and 137.4oz silver.

The refinery result for BJM094, the second doré bar from the 8 September smelt, remains pending. NMR expects to report the BJM094 result together with the official refinery results for BJM095–096 next week.
