# 2026 RIU Uranium Investment Conference Presentation

**Infini Resources Limited (ASX:I88) ("Infini" or the "Company")** advises of its participation at the RIU Uranium Investment Conference 2026 being held today in Perth, Western Australia.

Chief Executive Officer, Mr Rohan Bone, will be presenting at the Conference on Thursday, 17 September 2026, to discuss and present the Company, in particular its Canadian Uranium Project Portfolio.

A copy of Infini's presentation is attached following.

## About Infini Resources Ltd (ASX: I88)

Infini Resources Ltd is an Australian energy metals company focused on mineral exploration in Canada and Western Australia for uranium and lithium. The company has a diversified and highly prospective portfolio of assets that includes greenfield and more advanced brownfield projects. The company's mission is to increase shareholder wealth through exploration growth and mine development.

| JORC 2012 Mineral Resource Deposit | JORC 2012 Classification | Tonnes and Grade |
|---|---|---|
| Des Herbiers (U) | Inferred Combined Resource | 162 Mt @ 123ppm $U_3O_8$ (43.95mlb) |

## Compliance Statement

This announcement contains information regarding the Des Herbiers Mineral Resources Estimate extracted from the Company's Prospectus dated 30 November 2023 and released to the ASX market announcements platform on 10 January 2024, reported in accordance with the 2012 edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). The Company confirms that it is not aware of any new information or data that materially affects the information included in any original announcement and that all material assumptions and technical parameters underpinning the estimates in the original market announcement continue to apply and have not materially changed. The original market announcements are available to view on https://infiniresources.com.au and www.asx.com.au.

## Forward Looking Statements

This announcement may contain certain forward-looking statements and projections. Statements regarding I88's plans with respect to its mineral properties and programs are forward-looking statement. Such forward-looking statements/projections are estimates for discussion purposes only and should not be relied upon. Forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. There can be no assurance that I88's plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that I88 will be able to confirm the presence of additional mineral resources, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of I88's mineral properties. Infini Resources Limited does not make any representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projections based on new information, future events or otherwise, except to the extent required by applicable laws. While the information contained in this report has been prepared in good faith, neither Infini Resources Limited or any of its directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement.

# Disclaimers

These presentation materials and any accompanying verbal presentation (together, the Presentation Materials) have been prepared by Infini Resources Limited (Company, IFR, Infini Resources) as at 14 September 2026 and statements are current only as at that date. Information in the Presentation Materials remains subject to change without notice. The Company has no responsibility or obligation to inform you of any matter arising or coming to its notice, after the date of this document, which may affect any matter referred to in this document. By receiving the Presentation Materials, you acknowledge and represent to the Company that you have read, understood and accepted the terms of this disclaimer. It is the responsibility of all recipients of these Presentation Materials to obtain all necessary approvals to receive these Presentation Materials and receipt of the Presentation Materials will be taken by the Company to constitute a representation and warranty that all relevant approvals have been obtained.

**NOT AN OFFER;** These Presentation Materials are for information purposes only. The Presentation Materials do not comprise a prospectus, product disclosure statement or other offering document under Australian law (and will not be lodged with the Australian Securities and Investments Commission) or any other law. The Presentation Materials also do not constitute or form part of any invitation, offer for sale or subscription or any solicitation for any offer to buy or subscribe for any securities nor shall they or any part of them form the basis of or be relied upon in connection therewith or act as any inducement to enter into any contract or commitment with respect to securities. In particular, these Presentation Materials do not constitute an offer to sell or a solicitation to buy, securities in the United States of America.

**NOT INVESTMENT ADVICE;** The Presentation Materials are not investment or financial product advice (nor tax, accounting or legal advice) and are not intended to be used for the basis of making an investment decision. Recipients should obtain their own advice before making any investment decision.

**SUMMARY INFORMATION;** The Presentation Materials do not purport to be all inclusive or to contain all information about the Company or any of the assets, current or future, of the Company. The Presentation Materials contain summary information about the Company and its activities which is current as at the date of the Presentation Materials. The information in the Presentation Materials is of a general nature and does not purport to contain all the information which a prospective investor may require in evaluating a possible investment in the Company or that would be required in a prospectus or product disclosure statement or other offering document prepared in accordance with the requirements of Australian law or the laws of any other jurisdiction, including the United States of America. While reasonable care has been taken in relation to the preparation of the Presentation Materials, none of the Company or its directors, officers, employees, contractors, agents, or advisers nor any other person (Limited Party) guarantees or makes any representations or warranties, express or implied, as to or takes responsibility for, the accuracy, reliability, completeness or fairness of the information, opinions, forecasts, reports, estimates and conclusions contained in this document. No Limited Party represents or warrants that this document is complete or that it contains all information about the Company that a prospective investor or purchaser may require in evaluating a possible investment in the Company or acquisition of shares in the Company. To the maximum extent permitted by law, each Limited Party expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of or reliance on information contained in this document including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions, forecasts, reports or other matters, express or implied, contained in, arising out of or derived from, or for omissions from, this document including, without limitation, any financial information, any estimates or projections and any other financial information derived therefrom.

**FORWARD LOOKING STATEMENTS**; This Presentation Materials may contain certain forward-looking statements and projections. Statements regarding I88's plans with respect to its mineral properties and programs are forward-looking statement. Such forward-looking statements/projections are estimates for discussion purposes only and should not be relied upon. Forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. There can be no assurance that I88's plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that I88 will be able to confirm the presence of additional mineral resources, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of I88's mineral properties. Infini Resources Limited does not make any representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projections based on new information, future events or otherwise, except to the extent required by applicable laws. While the information contained in this report has been prepared in good faith, neither I88 or any of its directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement.

**COMPLIANCE STATEMENT;** This announcement contains information on the Portland Creek Project extracted from ASX market announcements dated 10, 15 & 29 January 2024, 19 February 2024, 3 and 28 May 2024, 1, 10 and 22 July 2024, 14 October 2024, 23 December 2024, 30 January 2025, 26 March 2025, 4, 12, 14 and 28 July 2025, 3 September 2025, 9 and 13 October 2025, 21 November 2025, 12 and 24 December 2025, 12 January 2026, 9 February 2026, 26 May 2026 and 13 July 2026 reported in accordance with the 2012 edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). This announcement contains information on the Company's Reynolds and Reitenbach Lake Projects extracted from market announcement released to the ASX market announcements platform on 25 February 2025, 2 June 2025, 19 and 24 July 2025, 19 August 2025, 8 and 22 September 2025, 2 and 3 October 2025, 26 November 2025, 23 December 2025, 19 and 28 January 2026, 19 and 31 March 2026 reported in accordance with the 2012 edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). The original market announcements are available to view on www.infiniresources.com.au and www.asx.com.au. The Company is not aware of any new information or data that materially affects the information included in the original market announcement.

**CAUTIONARY STATEMENT;** The Company has defined the mineralisation in the field by using hand held pXRF technology to analyse drill samples in real time. This allows for immediate on-site decisions to be made to adjust drilling strategies. While pXRF readings provide a useful indication of mineral content and approximate grades, they are not a substitute for laboratory-derived assay grades and will not be used in any resource estimation. All drill intercepts will be sent to an independent laboratory for accurate analysis, with assay results expected in the current quarter. Portable pXRF results reported are considered semi-quantitative, as such, results from pXRF analysis are stated as indicative only, provide confirmation that mineralisation is present however may not be representative of elemental concentration within the material sampled and are preliminary to subsequent confirmation (or otherwise) by geochemical laboratory analysis. Results of pXRF analyses are included for reference, and laboratory assays will be provided when these become available. Limitations include; very small analysis window, possible inhomogeneous distribution of mineralisation, analytical penetration depth, possible effects from irregular rock surfaces. Results are not considered to be entirely representative of the rock samples, as the analyses were made of what were interpreted to be areas on drill samples with potential to be uranium. The analyses were carried out on drill core specimens and not ground powders. The pXRF is calibrated periodically against prepared standards. The samples that are the subject of this report will be submitted for laboratory assay and some variation from the results presented herein should be expected. Caution should be exercised until the official assay laboratory results have been received. While these preliminary results provide compelling evidence of mineralisation, the Company notes that assay confirmation remains pending and further exploration is required to determine the continuity and thickness of mineralised zones, which will be critical in defining the economic potential of the mineralisation. The Company cautions that visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analysis where concentrates or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations. The presence of uranium minerals, including uraninite, is based on field observations, pXRF and scintillometer readings only. These indicators are preliminary in nature and should not be considered a substitute for laboratory analysis. The identification of uranium mineralisation remains conceptual until confirmed through geochemical assay and mineralogical reporting from accredited laboratories

**JORC CODE;** It is a requirement of the ASX Listing Rules that the reporting of exploration results, ore reserves and mineral resources in Australia comply with the Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves ("JORC Code"). Investors outside Australia should note that while reporting in this document complies with the JORC Code, they may not comply with the relevant guidelines in other countries. Information contained in this document describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws.

**ACCEPTANCE;** By attending a presentation or briefing, or accepting, accessing or reviewing this document you acknowledge, accept and agree to the matters set out above.

**AUTHORISATION;** This document has been authorised for release by the Company's Board of Directors.

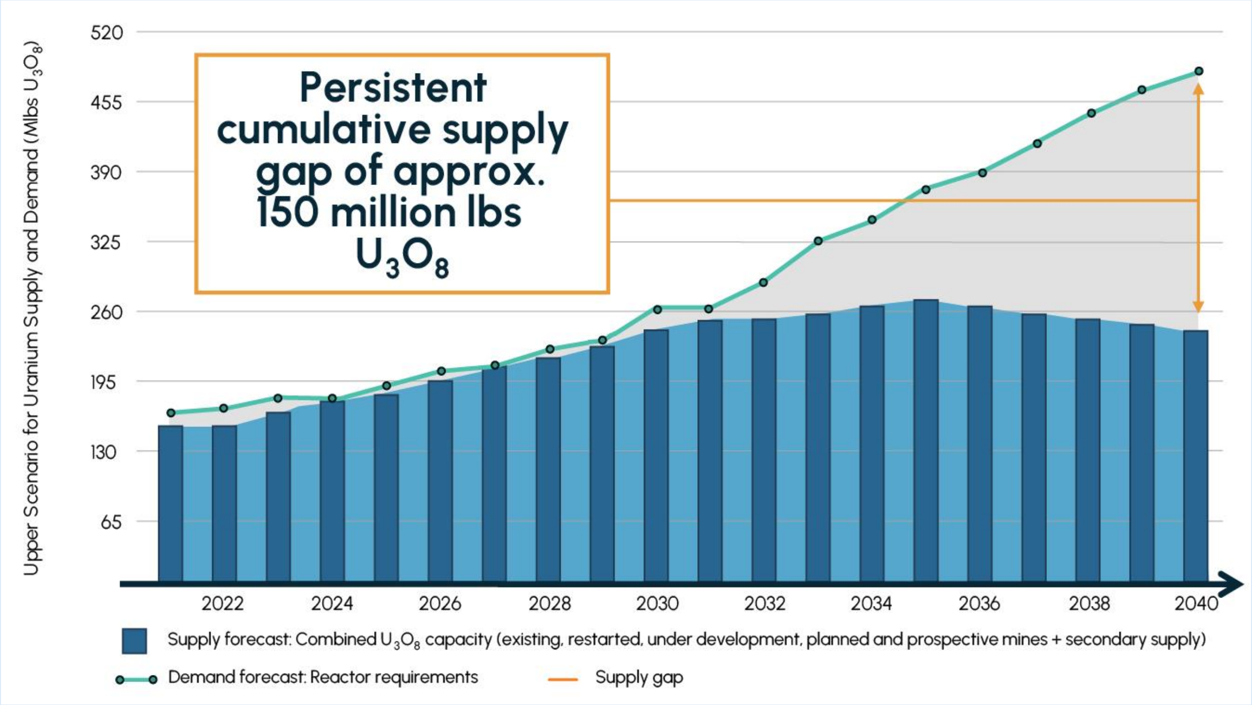
# Why Infini Resources

**5.3%** average increase in annual demand to 2040

**1.0%** average increase in annual supply to 2040



Source: World Nuclear Fuel Report 2025: Global Scenarios for Demand and Supply Availability 2025–2040.

## Our Objective

Creating value through active uranium exploration and project advancement in a demand-led market.

## Our Strategy

- Target high-upside discoveries in Tier-1 mining jurisdictions
- Unlock value through disciplined M&A and portfolio development
- Execute with an experienced, agile and data-driven uranium team

# Targeting high-upside discoveries in Tier-1 jurisdictions

A strategically located portfolio pursuing high-upside greenfields discovery opportunities in proven mining jurisdictions

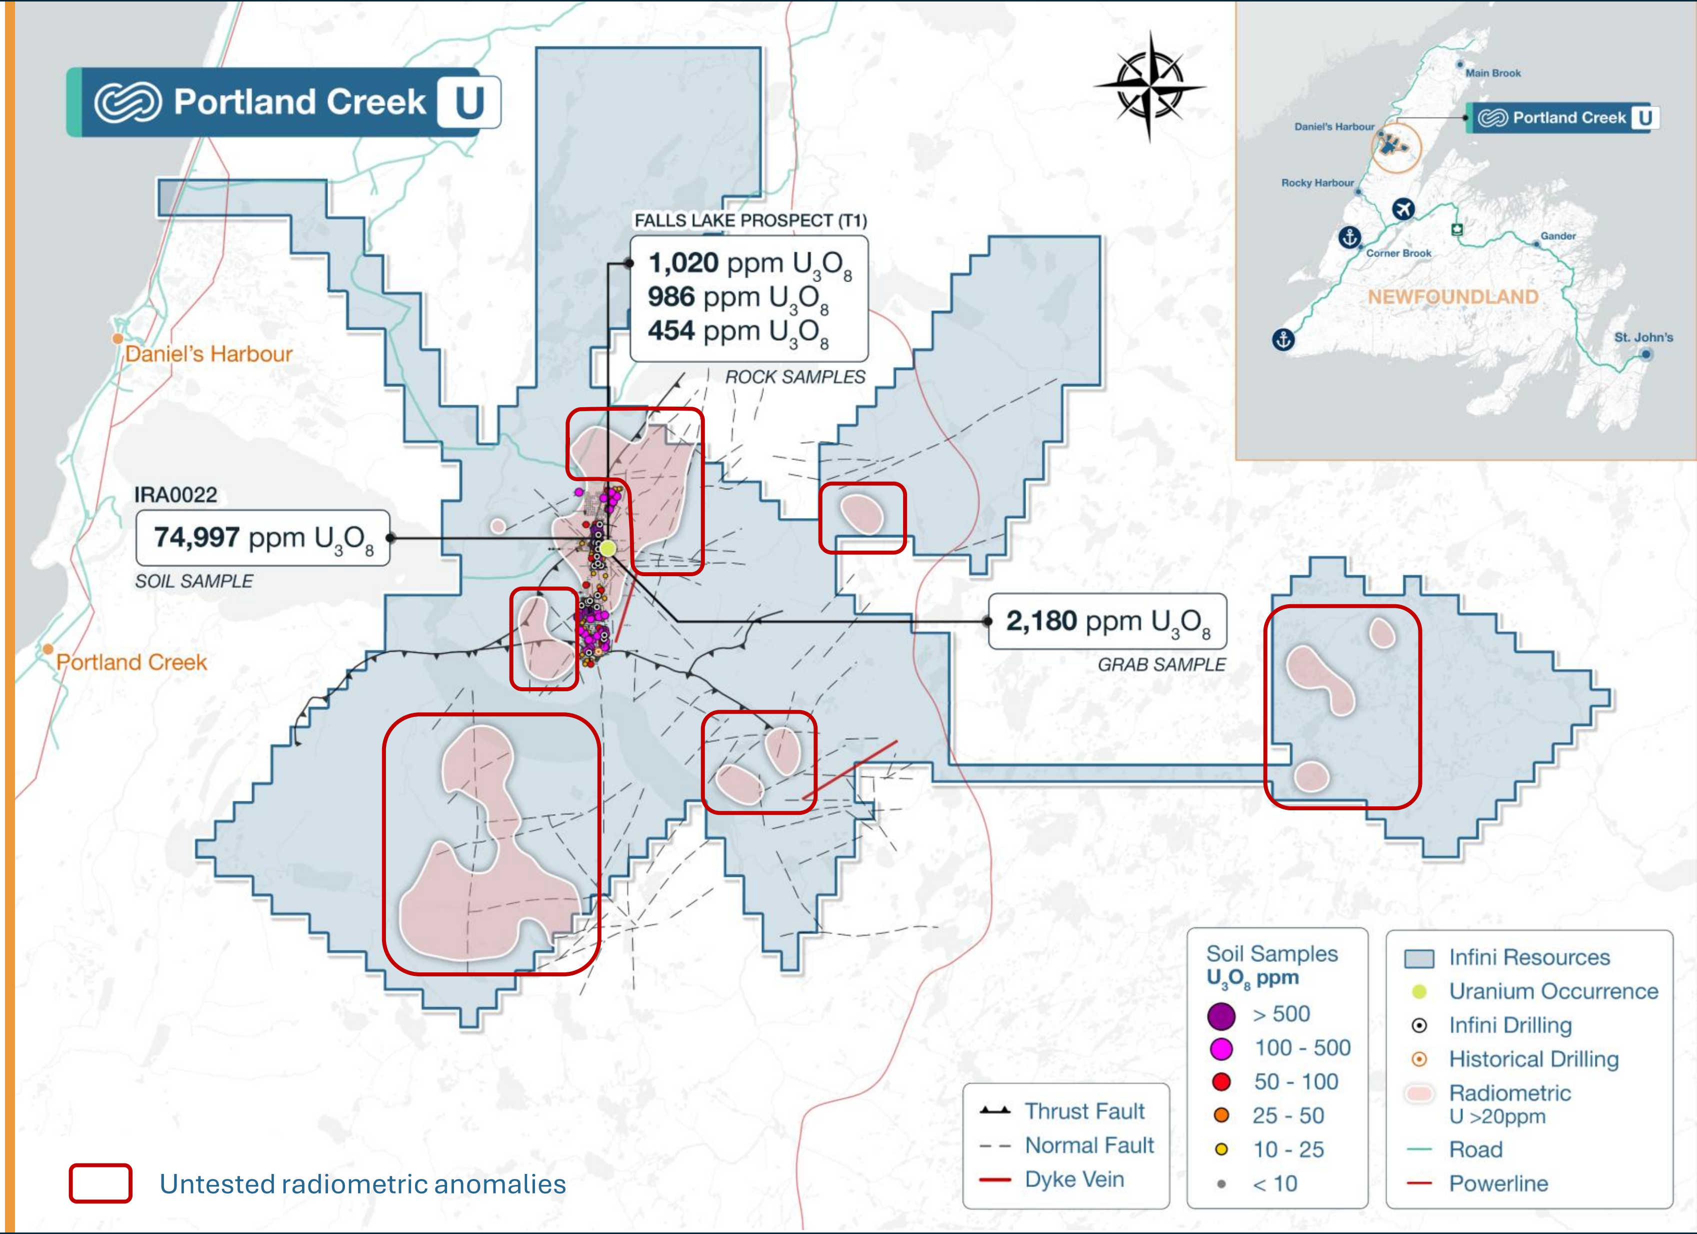
- First mover advantage in potential new uranium jurisdiction in Newfoundland, Canada
- High-upside greenfield projects, historically underexplored in Canada's Athabasca region
- Strategic Canadian project pipeline targeting discovery-led value creation

- 329 km$^2$ footprint adjacent to Cameco's 128.1 Mlb $U_3O_8$ Yeelirrie deposit
- Positioned to benefit from any future reopening of Western Australia's uranium sector

Source: Cameco Corporation, 2025 Mineral Reserves and Resources, as at 31 December 2025.
Yeelirrie: 128.1 Mlb $U_3O_8$ measured and indicated mineral resources at 0.15% $U_3O_8$.

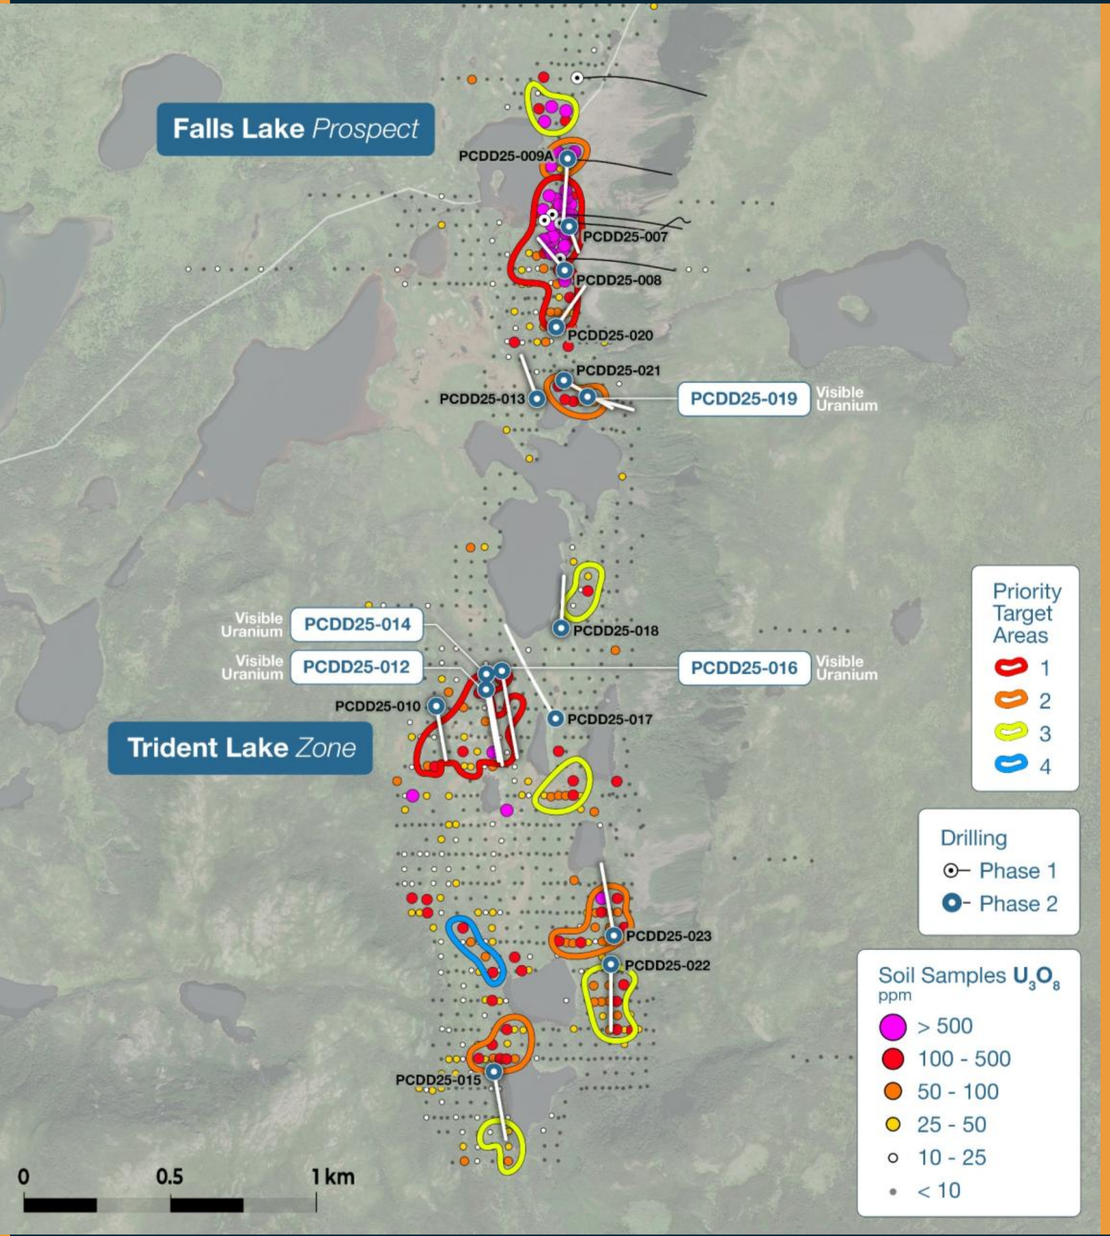
# Portland Creek: A district-scale greenfield discovery opportunity

- Significant 328 km$^2$ adjacent to existing power & transport infrastructure
- Greenfield opportunity largely underexplored since the 1970's
- Multiple uranium occurrences and radiometric anomalies across a large prospective footprint
- Prospective for vein-type mineralization (e.g Beaverlodge deposit) or shear-hosted (e.g. Valhalla deposit) systems
- High-grade surface uranium results, including soils up to 74,997 ppm $U_3O_8$ (7.5%)*



* Refer announcement 10 July 2024.

# 2025: Hallmarks of a large U-bearing System



- Uranium identified across multiple drillholes >1 km apart together with widespread hydrothermal alteration and polymetallic pathfinders indicate proximity to potential nearby higher-grade uranium source
- Drill assays up to 347 ppm $U_3O_8$ confirm uranium mineralisation directly correlated to structural controls, confirming exploration model.
- Extensive pipeline of high-priority targets across a 320 km² project footprint, with many remaining untested.

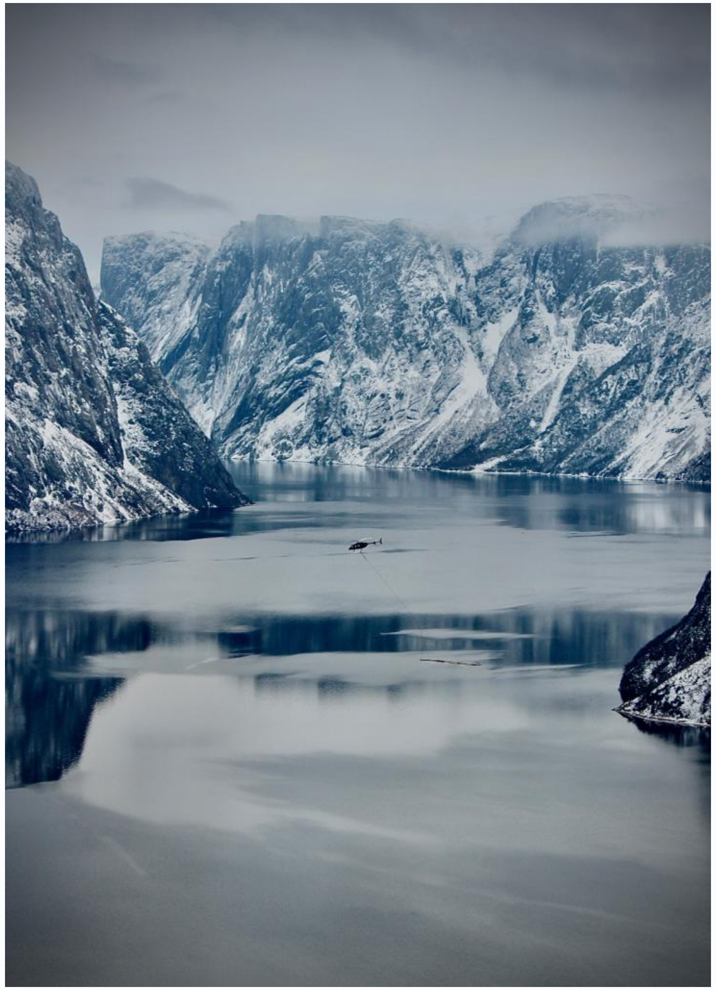
PCDD25-012, 252 ppm $U_3O_8$ @ 270.0m

PCDD25-014 , 124 ppm $U_3O_8$ @ 28.0m

* Refer announcement 9 February 2026.

# 2026: Advancing Portland Creek through systematic exploration

Geophysics & target generation

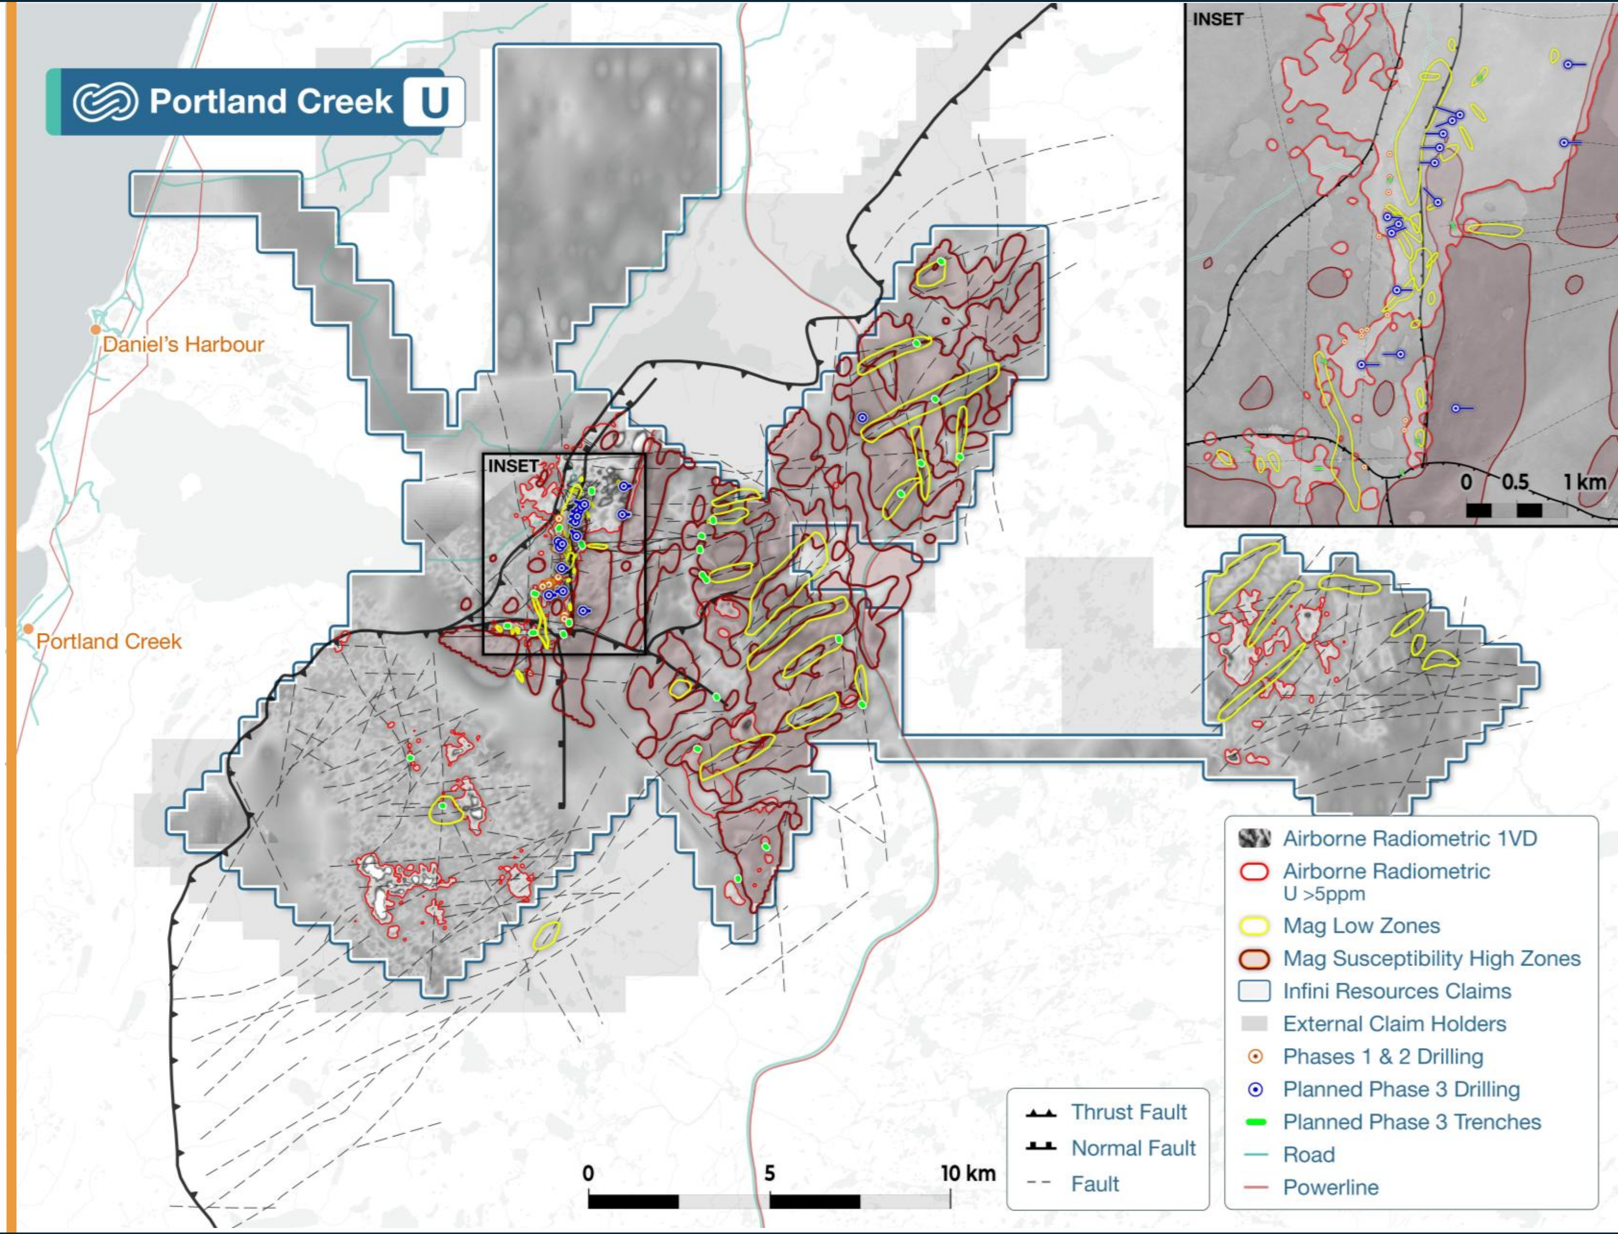


Field validation & sampling

Phase 3 exploration underway

# Phase 3: Portland Creek's largest exploration program to date

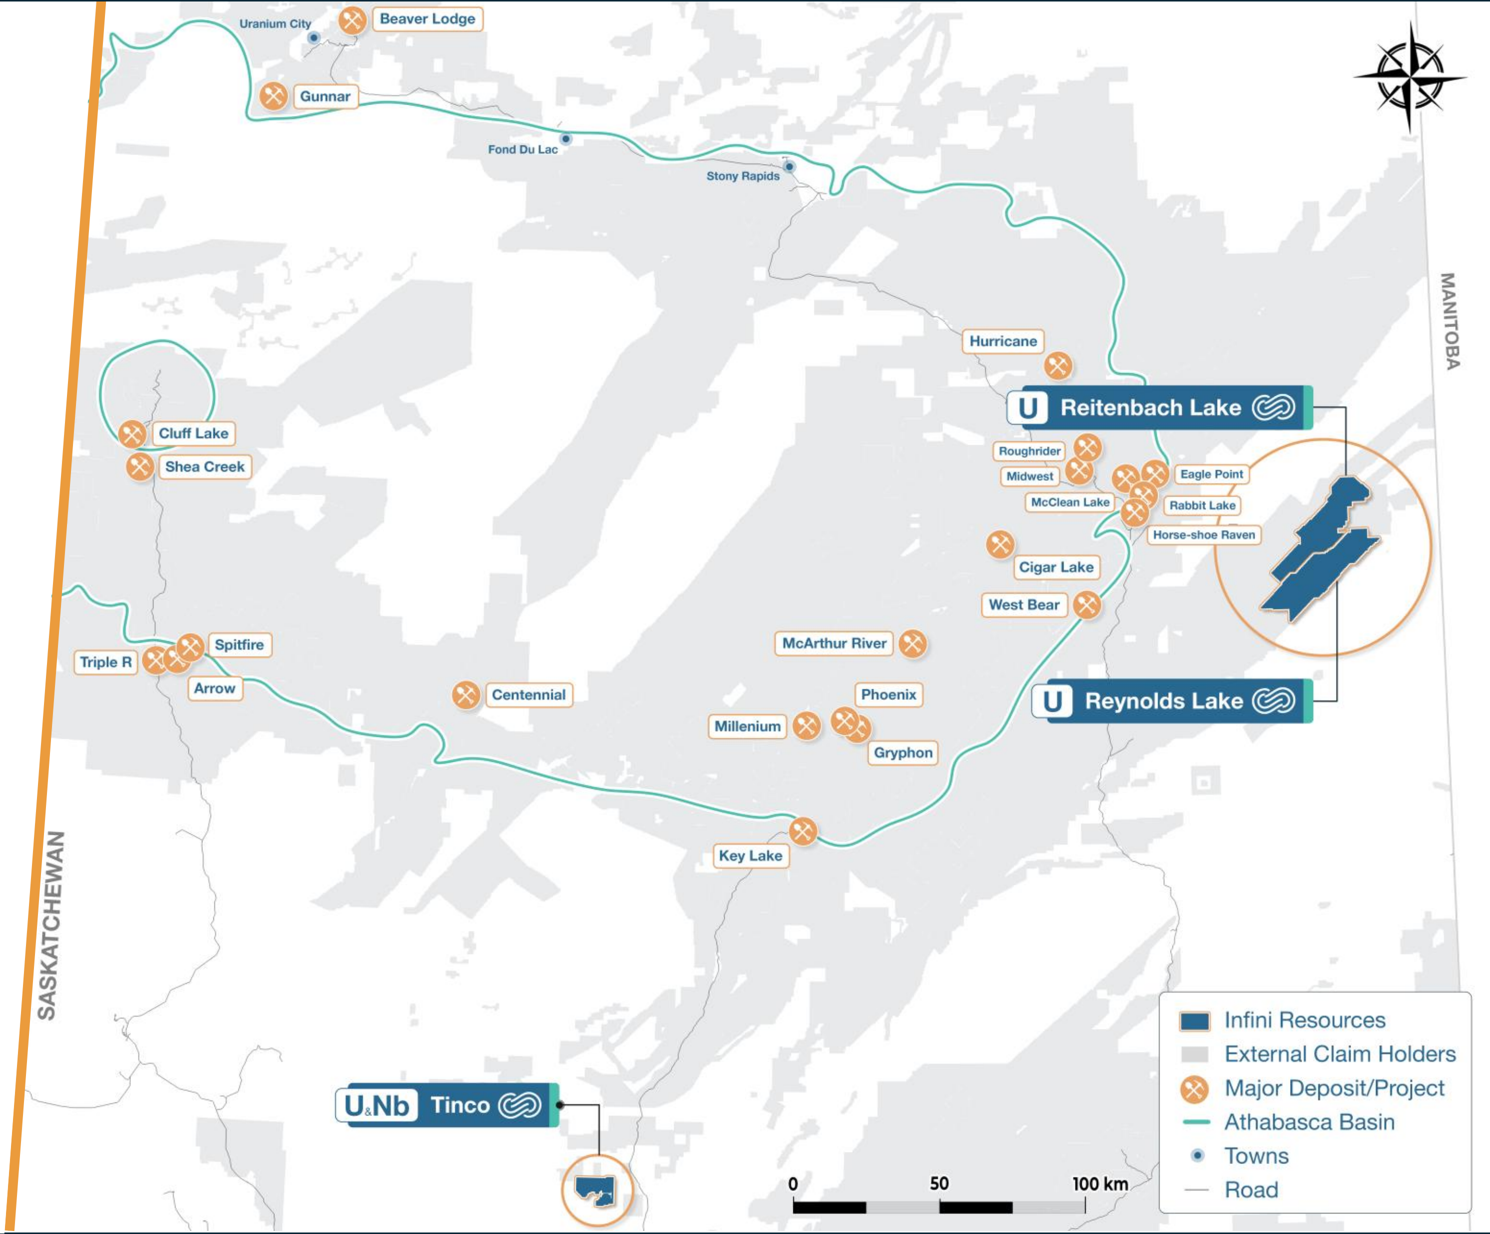
- Phase 3 expands from initial mineralisation confirmation to test high-conviction targets
- Phase 3: ~5,000 m diamond drilling supported by ~1,000 m of trenching
- Targeting confluence of structural intersections, magnetic destruction and uranium anomalism
- Trenching continues in parallel to expose bedrock and refine drill targeting



* Refer announcement 26 May 2026, and 13 July 2026 and 31 August 2026.

# Reynolds & Reitenbach Lake: Early-stage Athabasca potential

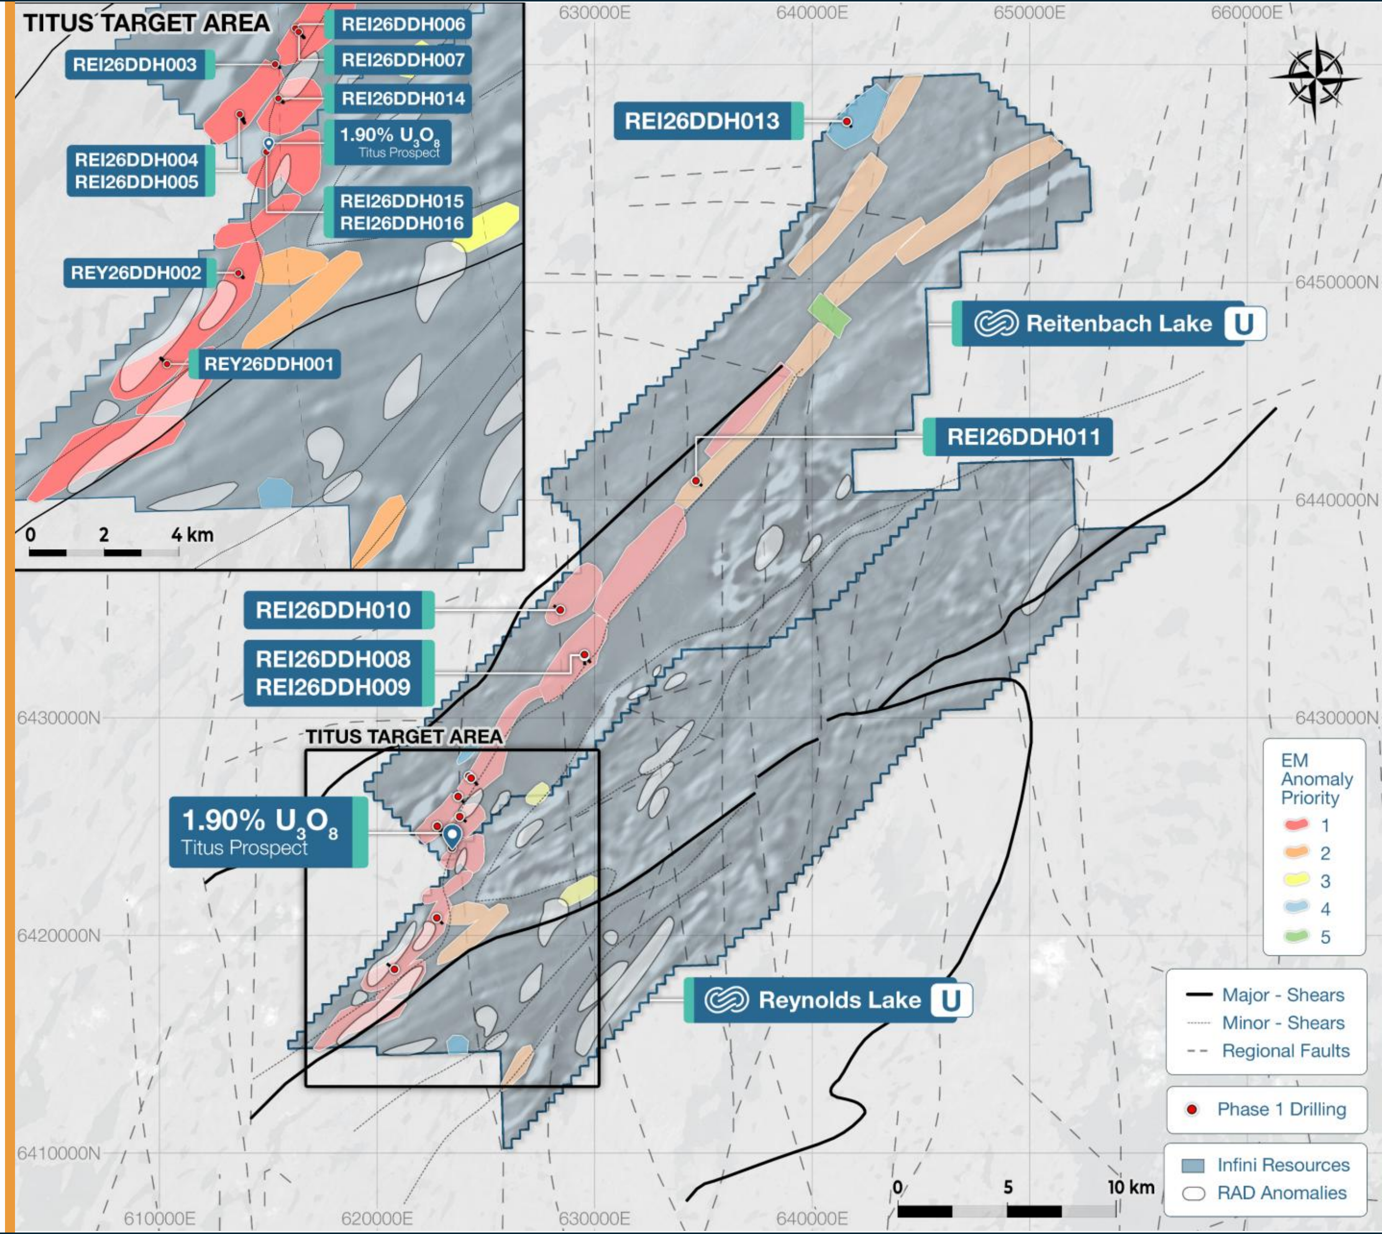
- Massive 766 $km^2$ landholding located on the eastern margins of the Athabasca Basin
- Projects underexplored since the 1970's and only ~50 km from Rabbit Lake and Eagle Point deposits
- Major structural corridor prospective for basement-style mineralisation
- EM anomalism interpreted to extend for over 80 km with conductors as shallow as 20 m
- Maiden field program identified 1.90% $U_3O_8$ Titus Prospect coincident with EM conductors



* Refer announcement 23 December 2025.

# Maiden drilling confirms prospective basement architecture

- 16-hole, 3,314 m maiden diamond drilling program completed at Reynolds Lake & Reitenbach Lake
- Testing for a large-scale basement-hosted uranium system on the eastern Athabasca Basin margin
- Drilling confirmed reactivated graphitic structures and hydrothermal alteration, key ingredients of the target model
- Assays pending, results will guide ranking across an ~80 km EM conductor network and a 15 km x 3 km prospective corridor



# Near-term catalysts and value drivers

- Assays from maiden drilling at Reynolds Lake and Reitenbach Lake
- Progress and observations from Phase 3 drilling at Portland Creek
- Progress and observations from trenching at Portland Creek
- Assays from Phase 3 drilling and trenching at Portland Creek
- Potential portfolio optimisation, disciplined M&A and new-project opportunities

# Multiple pathways targeting discovery, portfolio growth & value creation

### Compelling market backdrop

- Uranium demand is projected to grow materially through 2040, driving the need for new mine supply and future discoveries

### Discovery-led portfolio

- Greenfield opportunities across Canada & Australia, including active exploration at Portland Creek, Reynolds Lake and Reitenbach Lake

### Active, disciplined execution

- Experienced uranium team applying agile, data-driven exploration and selective portfolio development to unlock value efficiently
