

A New Force in Uranium

Investor Presentation

September 2026

ASX: DEV

Important Information

Forward Looking Statements

This Presentation contains forward-looking statements which are identified by words such as 'will', 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties. These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Presentation, are considered reasonable. Such forward-looking statements are not a guarantee of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the management. The Directors cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Presentation will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements. The Directors have no intention to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this Presentation, except where required by law or the ASX listing rules.

No offer to sell or invitation to buy any securities

This Presentation is not, and should not be considered to, constitute an offer to sell, or solicitation of an offer to buy, any securities in DevEx Resources Limited, and no part of this Presentation forms the basis of any contract or commitment whatsoever with any person.

Disclaimer

Whilst care has been exercised in preparing and presenting this Presentation, to the maximum extent permitted by law, DevEx Resources Limited and its representatives:

- make no representation, warranty or undertaking, express or implied, as to the adequacy, accuracy, completeness or reasonableness of this Presentation;
- accept no responsibility or liability as to the adequacy, accuracy, completeness or reasonableness of this Presentation; and
- accept no responsibility for any errors or omissions from this Presentation.

Exploration by other Explorers

This Presentation contains information sourced from the reports of Other Explorers. References to the original reports are provided as footnotes where the information is cited in this Presentation. The Company does not vouch for the accuracy of these reports. The Company has taken the decision to include this information as it is in the public domain and has assessed it to be of relevance to shareholders and investors.

Authorisation

This Presentation has been authorised for release by the Board.

Competent Person Statement

The information in this Presentation that relates to Exploration Results for the Nabarlek Project is extracted from the ASX announcements titled:

- "Exploration Update: Advancing DevEx's Target Rich Pipeline", released on 27 August 2026;
- "District-Scale Uranium Pipeline Defined at Nabarlek with Multiple Drill-Ready Targets", released on 29 April 2026;

- "New high-priority uranium drill target identifies north of the Nabarlek Mine, NT", released on 1 December 2025;
- "Multiple large-scale uranium targets identified at Nabarlek Project, NT", released on 1 April 2025;
- "Nabarlek Uranium Project – Exploration Update" released on 9 September 2024;
- "Significant Uranium Mineralisation Intersected at Nabarlek as 2024 Exploration Gains Momentum" released on 17 July 2024;
- "U40 System Grows with High-Grade Uranium Hits" released on 7 February 2024;
- "Deep, High-Grade Uranium Intersected at U40" released on 6 December 2023;
- "Significant Uranium Intercepts at U40" released on 8 November 2023;
- "Significant New Uranium Intercepts in Step-Out Drilling at Nabarlek North" released on 18 October 2023;
- "Nabarlek Continues to Deliver with More Strong Uranium Hits Across Multiple Prospects" released on 18 September 2023;
- "Step-out Drilling Intersects More Significant Uranium at Nabarlek as 2023 Exploration Gathers Momentum" released on 15 August 2023;
- "More Significant Uranium at Nabarlek" released on 15 March 2023;
- "More High-Grade Uranium Across Multiple Prospects Confirms Outstanding Growth Potential at Nabarlek" released on 24 January 2023;
- "High-Grade Uranium Intersected at Nabarlek" released on 9 August 2022;
- "More Significant Uranium Intersected at Nabarlek" released on 19 October 2022 "High-Grade Uranium Confirmed at Nabarlek" released 29 November 2022;
- "DevEx ramps-up exploration at Nabarlek Uranium Project, NT after identifying new high-grade targets" released on 29 September 2021.

All announcements are available on www.devexresources.com.au.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant original market announcement and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

- ASX-listed, **laser focused on uranium**, positioned to leverage the U_3O_8 upcycle with a **growing global supply shortfall**.
- **Value-driven Board and Executive team.**
- **Three pillar strategy to create value:**
 - **Growth through discovery:** Basin scale opportunity; region with proven endowment of high-grade unconformity deposits. Located in the Northern Territory, where there is no prohibition on uranium mining. The 2026 drill season is underway.
 - **Growth through transaction:** Capital backing can be applied via multiple mechanisms – JV, M&A, Earn-In.
 - **Growth through partnerships:** Differentiated by early stakeholder engagement.
- **Well funded and supported** to deliver exploration and growth strategy, with optionality to leverage capital from non-core investments.

From Optional to Strategic - The Market Has Changed

400%

uranium price spike after
the last major supply shock
(1970's energy shock)

“AI, data centres and a more volatile geopolitical environment are driving demand for nuclear to the top of the agenda”

— World Economic Forum, April 2026

⚡ Energy Crisis

AI and data centres are driving a structural surge in baseload demand. Geopolitical instability is tightening supply - making nuclear the only scalable zero-carbon baseload.

🏛️ Policy Response

33 countries have pledged to triple capacity by 2050; the World Bank lifted its nuclear financing ban in 2025; Australia signed a uranium-export deal with India in July 2026.

↑ Uranium Impact

Term price ~US\$97/lb - highest in more than 18 years
Structural ~30–50Mlb deficit keeps **widening through the late 2030s and beyond.**

The uranium upcycle was already underway — geopolitics is now accelerating the trend.

Three Pillars for Growth

*Our vision is to be a **New Force in Uranium**; to build a high-quality uranium house with an aspirational long-term vision to produce over 10Mlbs of U_3O_8 per year across multiple assets.*

Strategy

1

Find, build and operate within a world-class mining region

Nabarlek and Murphy West Uranium Projects

Targeted exploration and systematic drilling across highly prospective landholdings in premier uranium province, seeking high-grade unconformity systems.

2

Acquire and develop growth assets

Execute disciplined M&A

Focus on Australia and the Americas to accelerate portfolio growth through access to more advanced projects in favourable jurisdictions to develop into lower quartile operating assets.

3

Be the Partner of Choice

Exceptional relationships

Foster early, enduring and respectful partnerships with Traditional Owners, local communities, regulators, governments and industry partners for multi-layered benefit.

... underpinned by a **dynamic management team**, strong capital market support and an unwavering belief in the future of uranium.

VALUES

Integrity

Entrepreneurship

Energy

Respect

Innovation

Giant high-grade unconformity-type uranium deposits: Found in only two regions of the world

Exploration Strategy: Replicate the success of the Athabasca Basin and leverage DevEx's dominant land position

DevEx's uranium ground is **underexplored** and **ripe for discovery opportunities** by comparison to the now crowded Athabasca Basin

Unconformity-Type Uranium Deposits: Targeting the Next Giant

McArthur Basin, Northern Territory

Athabasca Basin, Canada

DevEx's uranium strategy: Targeting *Jabiluka-Scale* Opportunities

Australian Unconformity Uranium Deposits: Standing Apart on Grade & Scale

Unconformity deposits in Australia are found in the Alligator Rivers Uranium Province, which hosts some of the world's largest uranium deposits within the McArthur Basin, with **over 730Mlbs¹ of uranium endowment.**

Consolidation within a world-class uranium mining province

Expanded Nabarlek Project

- Located in the Northern Territory where there is no prohibition on uranium mining.
- Recent acquisitions have consolidated a basin scale opportunity in region with known endowment; centred on the historical Nabarlek Mine - Australia's highest-grade uranium mine and remaining infrastructure: **Historical Production: 24 Mlbs @ 1.84% U₃O₈.**
- DevEx receives strong Traditional Owner and Community Support.

Establishment of a Strategic Pipeline in a Target Rich Environment

Drill ready targets: 15,000m of RC and Diamond drilling to test **Sandfire, Big Radon and KP.**

Implementation of state-of-the-art airborne hyperspectral surveys to map alteration minerals that can overlie buried uranium deposits.

Emerging Targets: Field exploration activities to advance to drill- ready status, with a focus on the Caramal region.

Advance access to explore large unexplored radiometric anomalies, particularly along the Mustang Fault.

Nabarlek North

- Hyperspectral (August 2026)
- Magnetics/Radiometric

New Drill Targets identified at Caramal

- Drill core relogging recognises the possible down-faulted continuation of the main Caramal “host” breccia and dolerite directly north of the Caramal Uranium Deposit.
- Provides an attractive drill target to test for continuation of the uranium deposit to the north.
- Drill permits submitted.

Advancement of priority uranium targets associated with Fault Corridors (Southern Nabarlek Tenements)

Target Rich Environment along Fault Corridors

- Priority focus on Regional Fault Corridors between Nabarlek Mine and Caramal Deposit.
- Multiple targets recognised in DevEx's merged radiometric and magnetic datasets warranting field activities.

Implementation of state-of-the-art airborne hyperspectral surveys to map alteration minerals that can overlie buried uranium deposits (scheduled for August 2026).

Progress access to radiometric anomalies

- Several large, kilometre scale, radiometric anomalies, including Corsair, show a close association with these corridors.
- DevEx plans to advance these tenement applications over the coming 24 months.

Advancement of priority uranium targets associated with Fault Corridors (Northern Nabarlek Tenements)

Target Rich Environment along Fault Corridors

- Multiple targets recognised in DevEx's merged radiometric and magnetic datasets warranting field activities including:
 - Mapping and surface sampling;
 - Ground geophysics to refine targets; and
 - Drill target definition.

Progress access to large radiometric anomalies

- Several large, kilometre scale, radiometric anomalies, including Mustang, show a close association with these corridors.
- DevEx plans to advance these tenement applications through to grant over the coming 12 months.

Pillar 3: Genuine relationships with local communities and government

Environment

Demonstrated environmental management through the ongoing rehabilitation of Nabarlek Mine Site

Community

Working with Traditional Owners, fostering reconnection with the land and supporting Indigenous employment programs

Government

Strong relationships with key stakeholder groups, ensuring efficient and effective work programs

Northern Territory Resources Week

Upcoming catalysts

Growth Through Exploration

The inaugural exploration pipeline provides increased probability of drill success across multiple years, aiming for a maiden Mineral Resource on 100%-owned DevEx ground, providing a potential near-term value inflection.

- RC and Diamond **Drilling of priority targets** has commenced.
- Additional insights coming from the detailed **Hyperspectral Survey** and other surveys centred on priority Fault Corridors.
- Progress on advancement of priority **Emerging Targets through drill permitting** for inclusion in the 2026 drilling campaign.
- **Access to large unexplored radiometric anomalies** through on-country meetings and granting of priority tenement applications.

Growth Through Acquisition

- **Targeting value-accretive acquisition opportunities** to build a scaled, multi-asset uranium portfolio.

- ASX-listed, **laser focused on uranium**, positioned to leverage the U_3O_8 upcycle with a **growing global supply shortfall**.
- **Value-driven Board and Executive team.**
- **Three pillar strategy to create value:**
 - **Growth through discovery:** Basin scale opportunity; region with proven endowment of high-grade unconformity deposits. Located in the Northern Territory, where there is no prohibition on uranium mining.
 - **Growth through transaction:** Capital backing can be applied via multiple mechanisms – JV, M&A, Earn-In.
 - **Growth through partnerships:** Differentiated by early stakeholder engagement.
- **Well funded and supported** to deliver exploration and growth strategy, with optionality to leverage capital from non-core investments.

From Optional to Strategic – The Market Has Changed – Slide 6:

1. World Nuclear Association, September 2025. The Nuclear Fuel Report: Global Scenarios for Demand and Supply Availability 2025–2040.
2. International Energy Agency, April 2025. Energy and AI, World Energy Outlook Special Report.
3. TradeTech, LLC and UxC, LLC, spot and long-term uranium price assessments to July 2026; Cameco Corporation and Sprott Physical Uranium Trust disclosures.
4. Declaration to Triple Nuclear Energy, COP28, 2023, extended at COP29 (2024) and COP30 (2025) to 33 countries; World Nuclear Association / International Atomic Energy Agency.
5. World Bank Group, 11 June 2025. Decision to end its long-standing ban on financing nuclear energy projects.
6. Company disclosures: Constellation Energy / Microsoft (Crane Clean Energy Center restart); Amazon / X-energy (5 GW by 2039); NextEra Energy / Google (Duane Arnold restart).
7. World Nuclear News, 9 July 2026, "Australia agrees to export uranium to India"; Australian Government joint statement on the administrative arrangement enabling uranium exports to India for peaceful use under IAEA safeguards.

Northern Territory Stands Apart on Grade & Scale – Slide 10:
