

ASX Announcement

30 January 2025

Globe secures additional short-term funding of up to US\$1.2 million from Director Bo Tan

Globe Metals & Mining Limited (ASX: GBE) (“**Globe**” or “**Company**”) is pleased to advise that Director Bo Tan has agreed to provide an additional loan facility of up to US\$1.2 million on an unsecured basis to assist the Company with its short-term working capital requirements (**Facility**). The Facility is non-dilutive for existing shareholders and will allow the Company to focus its efforts on completing the updated Feasibility Study, including securing off-take agreements.

The key terms of the Facility are as follows:

Facility limit and drawdowns:	Up to US\$1,200,000 available to be drawn in multiple funding portions (each a Funding Portion) as follows: a) 15 February 2025: US\$200,000; b) 1 March 2025: US\$200,000; c) 15 March 2025: US\$200,000; d) 1 April 2025: US\$300,000; and e) 15 April 2025: US\$300,000.
Interest rate:	20% per annum accruing and payable daily, with interest to be capitalised daily and added to the aggregate principal amount outstanding, as adjusted for any capitalised interest, prepayments, or repayments (Principal Outstanding). Interest is payable on overdue amounts that are unpaid at the rate of 0.5% per day.
Term:	8 months after the first drawdown (Repayment Date).
Repayment and early cancellation:	All of the Principal Outstanding payable must be repaid in full on or before the Repayment Date in cash. The lender may, by giving notice in writing to the Company, cancel the Facility at any time after the Company has drawn down at least US\$400,000 under the Facility. The lender agrees not to cancel the Facility until such time as the Company has secured alternative funding, on a binding basis, for an amount not less than the undrawn Funding Portions.

Prepayment:	The Company may prepay all or part of the Principal Outstanding at any time prior to the Repayment Date, provided that if the Company prepays all of the Principal Outstanding prior to the Repayment Date it must pay to the lender an amount equivalent to one calendar month's interest on the Principal Outstanding at the same time as it prepays the Principal Outstanding.
Events of Default:	Each of the following is an event of default (Event of Default): ○ the Company does not pay on the due date any amount payable by it and the failure to pay is not remedied within 3 Business Days of the due date; ○ the Company does not comply with a provision of the Facility and if remediable, that non-compliance is not remedied within 5 business days after the earlier of the Company becoming aware of the non-compliance and receipt by the Company of a notice from the lender specifying the non-compliance; ○ an insolvency event occurs in relation to the Company; ○ the Company suspends payment of its debts generally; ○ the Company repudiates the Facility or evinces an intention to do so; or ○ the Facility is (or is alleged by the Company to be) not effective in accordance with its terms or is invalid or unenforceable for any reason. If an Event of Default is continuing, the lender may by notice to the Company cancel the Facility, declare all or any part of Principal Outstanding immediately due and payable, or a combination of both.
Security:	The Facility is unsecured.

The Board of Directors of the Company wish to again acknowledge the continued strong support shown by Director Bo Tan and is appreciative of his ongoing commitment to the Company.

About the Kanyika Niobium Project

The Kanyika Niobium Project is located in central Malawi, approximately 55km northeast of the regional centre of Kasungu and is secured by Large-Scale Mining Licence No. LML0216/21 which grants the Company security of tenure and the right to mine niobium, tantalum, zirconium and other minor metals.

Drilling programs totalling 33.8 kilometres of percussion and core drilling have defined the extent of mineralisation. Structured and progressive engineering studies have resulted in the current (JORC 2012) Mineral Resource Estimate (refer below) and given rise to significant improvements and simplifications in the process flowsheet.

The Kanyika Project will be developed in two phases, substantially de-risking the project. The project will be fully integrated on the mine site – Mining, Concentration and Refining, to produce high-purity, high-value Niobium and Tantalum oxides for direct export to western markets.

A Mineral Resource Estimate for the Kanyika Niobium Project under the 2012 JORC guidelines was reported to ASX on 11 July 2018 as follows:

Table 1: MRE for KNP using a 1,500 ppm Nb₂O₅ lower cut

Category	Resource (Mt)	Nb ₂ O ₅ (ppm)	Ta ₂ O ₅ (ppm)
Measured	5.3	3,790	180
Indicated	47	2,860	135
Inferred	16	2,430	120
TOTAL	68.3	2,830	135

Table 2: MRE for KNP using a 3,000 ppm Nb₂O₅ lower cut

Category	Resource (Mt)	Nb ₂ O ₅ (ppm)	Ta ₂ O ₅ (ppm)
Measured	3.4	4,790	220
Indicated	16.6	4,120	160
Inferred	2.8	4,110	190
TOTAL	22.8	4,220	190

Mineral Resource Estimates

The information in this report that relates to Mineral Resources is extracted from the report titled “Kanyika Niobium Project – Updated JORC Resource Estimate” released to the Australian Securities Exchange (ASX) on 11 July 2018 and available to view at www.globemm.com and for which Competent Persons’ consents were obtained. Each Competent Person’s consent remains in place for subsequent releases by the Company of the same information in the same form and context, until the consent is withdrawn or replaced by a subsequent report and accompanying consent.

The Company confirms that is not aware of any new information or data that materially affects the information included in the original ASX announcement released on 11 July 2018 and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the original ASX announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons’ findings are presented have not been materially modified from the original ASX announcement.

Full details are contained in the ASX announcement released on 11 July 2018 titled “Kanyika Niobium Project – Updated JORC Resource Estimate” available to view at www.globemm.com.
