

7 October 2024

INVESTOR WEBINAR INVITATION

GreenTech Metals Limited (**ASX: GRE**) ('**GreenTech**' or '**the Company**') is pleased to invite shareholders to attend an upcoming investor webinar to be held via Zoom at 12pm AEST / 10am AWST on Thursday 10th October 2024.

The webinar, which will provide a comprehensive overview of GreenTech Metals' highly prospective tenure within the West Pilbara region, will feature presentations from Executive Director Mr Thomas Reddicliffe and recently appointed Technical Adviser Mr Julian Hanna.

Mr Hanna has over 35 years' experience in the resources sector, including Managing Director roles at successful exploration and production companies Western Areas Limited (ASX:WSA) and MOD Resources Ltd (acquired by Sandfire Resources (ASX:SFR)).

As Technical Adviser, Mr Hanna will provide an overview of exploration techniques for Volcanic Massive Sulphide cluster deposits and review the Company's successful activities to date at the Whundo VMS project.

Webinar attendees will also have the opportunity to submit questions directly to management during a moderated Q&A session which will follow the presentations.

To attend the live Zoom webinar, please register via the link below:

About GreenTech Metals Limited

The Company is an exploration and development company primarily established to discover, develop and acquire Australian and overseas projects containing minerals and metals that are used in the battery storage and electric vehicle sectors. The Company's founding projects are focused on the lithium, copper, nickel and cobalt potential within the West Pilbara and Fraser Range Provinces.

The green energy transition that is currently underway will require a substantial increase in the supply of these minerals and metals for the electrification of the global vehicle fleet and for the massive investment in the electrical grid and renewable energy infrastructure and storage.
