

Paulsens West Seismic Target – EIS Grant

Black Cat Syndicate Limited (“**Black Cat**” or “**the Company**”) is pleased to provide an update on drilling plans at the Paulsens Gold Operation (“**Paulsens**”).

HIGHLIGHTS

- Black Cat has secured co-funding from the Department of Energy, Mines, Industry Regulation and Safety (“**DEMIRS**”) Exploration Incentive Scheme (“**EIS**”) of up to \$216,000 for drilling of the Paulsens West Seismic Target. This is a competitive process and success depends on the technical merit of the opportunity.
- The Paulsens West Seismic Target is located ~600m west of the current underground workings at a vertical depth of ~800m below surface - a similar depth as the middle portion of the Paulsens mine. This target was identified after the 2018 3D seismic data was re-processed and re-interpreted¹. This work highlights the potential for a fault intersecting the Paulsens Mine Gabbro with a similar displacement magnitude as the Paulsens Main Zone.
- Supporting the re-interpretation is the result of recent surface mapping around Paulsens. Mapping has identified surface quartz-oxide veining at the surface projection of the interpreted structure, suggesting that the fault has potentially seen mineralised fluids passing through it.
- Black Cat has designed two surface diamond drill holes to test the Paulsens West Seismic target and the EIS co-funding will pay for up to 50% of the drilling cost. Drilling is expected to commence in the first half of 2025.

Figure 1: Photograph from ~2km northwest of Paulsens, looking towards Paulsens, showing mapped quartz-oxide veins where the Paulsens West Seismic target projects to surface.

Black Cat’s Managing Director, Gareth Solly, said: “*Black Cat now controls an enlarged area of prospective ground at Paulsens with more than 3,100km² located around our processing facility. This area contains numerous opportunities for organic growth and we are excited by the potential for new discoveries. We are grateful for the support provided by the WA government scheme and look forward to progressing our planned drilling in 2025. The EIS grant for the exciting Paulsens West Seismic target speaks to the technical merit of the target and to the quality of the geological work to identify this opportunity.*”

¹ BC8 ASX announcement 08/10/24

Summary

Re-processing of the 2018 3D seismic data covering ~16km² centred on Paulsens provided more accurate depth control and has refined the structural geology interpretation of the area around Paulsens. In particular, the re-processing has used an updated depth correction tying into the existing underground development, which was not previously recognised in the initial interpretation work. The updated depth correction has also contributed to a sharpening of the data resolution allowing for a more detailed structural model to be developed.

Previously, Black Cat targeted the Paulsens Repeat target located ~200-300m below the decline within the interpreted vertical extension of the Paulsens Main Zone². That drill program, consisting of 3 diamond holes completed from the underground workings, intersected sheared quartz-carbonate-sulphide (pyrite+/-pyrrhotite+/-chalcopyrite+/-galena+/-sphalerite) veins within the Paulsens Main Zone structural corridor, which showed that the mineralised system remains “live” below the current workings. Additional drilling is being planned to follow up on this target area, but underground mine development is required to access optimal drill locations.

The Paulsens West Seismic Target is located ~600m west of the current workings at a vertical depth of ~800m below surface - similar to the depths of the middle section of the Paulsens mine (Figure 3). The target area is identified in the seismic data as an abrupt break in reflectivity which is typically the result of a fault zone. Surface mapping at the projected surface expression of this structure has identified quartz veining within a moderately sheared zone of siltstone, which supports the interpretation that this feature is a structure that has had fluid flow through it.

Historical drilling into this part of the Paulsens system is limited, and most drilling was designed to test below the depth interval that Black Cat is planning to drill. Historical underground drilling into this area has intersected sheared siltstone and sandstone deeper than the target zone. In addition, historical surface drilling intersected gabbro outside the interpreted fault zone to the west, validating the interpretation that the highlighted seismic reflective zone represents gabbro.

Next Steps

Two diamond drill holes are currently planned, totalling ~2,900m, to commence in the first half of 2025. The holes are designed to intercept the target area at a vertical depth of ~800m and as obliquely as possible. In addition to assaying intervals of veining, Black Cat is planning to have the entire core scanned using pXRF (whole rock geochemistry), hyperspectral imaging (alteration mineralogy) and magnetic susceptibility to aid with the interpretation work and to assist future targeting.

Figure 2: Cross section looking northwest, showing the two planned diamond holes testing the Paulsens West Seismic Target. The interpreted geology, processed seismic data (Pre-Stack Time Migration), historical drilling and the Paulsens underground infrastructure are also shown.

Paulsens West Seismic Target – EIS Grant

Figure 3: Plan view showing the depth slice of the seismic cube at 800m depth below surface (Pre-Stack Time Migration), the interpreted Paulsens Mine Gabbro at that depth, the proposed drill traces, historical drill traces projected to surface, the Paulsens underground infrastructure and mapped quartz-carbonate veins at surface.

Paulsens West Seismic Target – EIS Grant

PLANNED ACTIVITIES

Planned activities and announcements include:

Oct 2024	US\$20.5M secured debt facility completion
Oct 2024 - Dec 2024	Monthly progress reports on Myhree/Boundary open pits, Paulsens high-grade gold strategy and processing facility refurbishment.
Oct 2024	Quarterly Report
27 Nov 2024	Annual General Meeting
Dec 2024	Paulsens commissioning on low-grade stocks followed by material from the high-grade selective mining strategy.
Jan - Mar 2025	Paulsens near-mine drilling
Mar - Oct 2025	Paulsens regional exploration

This announcement has been approved for release by the Board of Black Cat Syndicate Limited.

COMPETENT PERSON'S STATEMENT

The information in this announcement that relates to geology, exploration results and planning was compiled by Dr. Wesley Groome, RPGeo, who is a Registered Professional Geoscientist (Mineral Exploration) in the AIG and an employee, shareholder and option holder of the Company. Dr. Groome has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr. Groome consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Where the Company refers to the exploration results, Mineral Resources, and Reserves in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource and Reserve estimates with that announcement continue to apply and have not materially changed.

The Company confirms that all material assumptions underpinning the production targets, or the forecast information derived from the production targets, included in the original ASX announcements dated, 8 May 2024, 9 May 2024 and 15 May 2024 continue to apply and have not materially changed.

Paulsens West Seismic Target – EIS Grant

SNAPSHOT – PAULSENS GOLD OPERATION

~3,190km² of Highly Prospective Ground, 100% Owned by Black Cat

- High-Grade 1,000oz per Vertical Metre Producer
- Paulsens underground is comprised of >2.7km of known mineralisation: including the historically mined Main Zone; the under drilled Eastern Zone; an unmined Footwall Gabbro Zone and the Paulsens Repeat seismic target. Paulsens has produced ~1Moz (at 1,000oz per vertical metre) principally from the Main Zone. The recently discovered 175m plunge/120m vertical extension to the Main Zone has the potential to extend mine life and has been justified for development in the May 2024 Restart Study.
- Paulsens underground is one of Australia's highest-grade gold deposits with a current Resource of 406koz @ 9.5g/t Au (76% Measured & Indicated).
- The 8 May 2024 Restart Study includes planned production of 177koz Au over the first 4.2 years with an All-in Sustaining Cost of \$1,882/oz and Operating Cashflow (after all capital and before tax) of \$201M @ \$3,500/oz.

Quality Infrastructure, Only Gold Processing Facility in 400km Radius, Fully Approved

- Strategically important location being the only gold processing facility in a 400km radius.
- Well maintained, 450ktpa processing facility, on care and maintenance since 2018 and requiring minimal restart capital.
- +128-person camp and village substantially rented out to third parties.
- Mine and advanced Resources on Mining Licences, minimal barriers to restart.
- Underground mine fully dewatered and ventilated.
- Excellent access with sealed road and gas pipeline within 7km.
- Approvals in place.

Significant Opportunities at All Stages – Multi-metal Potential

- Paulsens is an under-explored orogenic gold region with numerous gold and base metal anomalies.
- There is also significant open pit/underground potential at Belvedere, located only 5km from the processing facility. Belvedere is a Paulsens-style target with >2.5km of mineralised strike. To date, minimal drilling has identified a shallow Resource of 30koz @ 6.6g/t Au, part of which is in the May 2024 Restart Study.

A: Schematic isometric long-section looking towards the north showing >2.7km of known mineralisation comprised of: Main Zone (~1Moz mined @ 1,000oz per vertical metre), under-drilled Eastern Zone, unmined Footwall Gabbro Zone and the Paulsens Repeat seismic target; **B:** Aerial view of Paulsens processing facility and site offices; and **C:** Paulsens village and camp

Paulsens West Seismic Target – EIS Grant

ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Assuming the completion of the secured debt, Black Cat is fully funded and the key pillars are in place for Black Cat to become a multi operation gold producer at its three 100% owned operations. The three operations are:

Paulsens Gold Operation: Paulsens is located 180km west of Paraburdoo in WA. Paulsens consists of an underground mine, 450ktpa processing facility, 128 person camp, numerous potential open pits and other related infrastructure. The operation has commenced the mill refurbishment stage, with a plan to be in production by the end of 2024. Paulsens has a Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

Coyote Gold Operation: Coyote is located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. There is a well-maintained airstrip on site that is widely used by government and private enterprises. Coyote consists of an open pit and an underground mine, 300ktpa processing facility, +180 person camp and other related infrastructure. The operation is currently on care and maintenance and has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous high-grade targets in the surrounding area.

Kal East Gold Project: comprises ~650km² of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz. A turn-key funding, development & processing arrangement to mine and mill the Myhree and Boundary open pit deposits is underway³. Separately and in the future, Black Cat plans to construct a central processing facility near the Majestic deposit, ~50km east of Kalgoorlie. The 800ktpa processing facility will be a traditional carbon-in-leach gold processing facility which is ideally suited to Black Cat's Resources as well as to third party free milling ores located around Kalgoorlie.

Operation	Paulsens	Kal East	Coyote	Strategy
Land Size	~3,190 km ²	~650 km ²	~1050 km ²	>4,890 km ² - prime discovery potential
Resources	0.55Moz @ 4.0g/t Au	1.3Moz @ 2.1g/t Au	0.65Moz @ 5.5g/t Au	2.5Moz @ 2.9g/t Au (growing)
Initial Production Targets	177koz @ 4.1g/t Au	381koz @ 2.1g/t Au	200koz @ 3.7g/t Au	Conservative targets with upside
Production milestone - LTI ⁴	60-70kozpa	50-60kozpa	40-50kozpa	Grow to 150-180kozpa
Activity/Infrastructure	Refurbish	Install owned mill	Relocate mill & refurbish	Dominate 3 prolific gold districts
Maximum Cash Drawdown	\$34M	\$92M	\$56M	Low capital / reduced risk
Operating Cashflow \$3,500/oz (after all capital)	\$201M	\$401M	\$295M	Strong cashflow >\$897M
AISC	\$1,882/oz	\$1,724/oz	\$1,613/oz	Low cost / high margin

Notes on Resources:

- The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'.
- All tonnages reported are dry metric tonnes.
- Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
- Resources have been reported as both open pit and underground with varying cut-offs based off several factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
- Resources are reported inclusive of any Reserves.
- Paulsens Inferred Resource includes Mt Clement Eastern Zone Au of 7koz @ 0.3g/t Au accounting for lower grades reported.

The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating for the 2012 JORC compliant Resources are:

Kal East Gold Project

- Boundary, Trump, Myhree – Black Cat ASX announcement on 9 October 2020 "Strong Resource Growth Continues including 53% Increase at Fingals Fortune"
- Strathfield – Black Cat ASX announcement on 31 March 2020 "Bulong Resource Jumps by 21% to 294,000 oz"
- Majestic – Black Cat ASX announcement on 25 January 2022 "Majestic Resource Growth and Works Approval Granted"
- Sovereign, Imperial – Black Cat ASX announcement on 11 March 2021 "1 Million Oz in Resource & New Gold Targets"
- Jones Find – Black Cat ASX announcement 04 March 2022 "Resource Growth Continues at Jones Find"
- Crown – Black Cat ASX announcement on 02 September 2021 "Maiden Resources Grow Kal East to 1.2Moz"
- Fingals Fortune – Black Cat ASX announcement on 23 November 2021 "Upgraded Resource Delivers More Gold at Fingals Fortune"
- Fingals East – Black Cat ASX announcement on 31 May 2021 "Strong Resource Growth Continues at Fingals".
- Trojan – Black Cat ASX announcement on 7 October 2020 "Black Cat Acquisition adds 115,000oz to the Fingals Gold Project".
- Queen Margaret, Melbourne United – Black Cat ASX announcement on 18 February 2019 "Robust Maiden Mineral Resource Estimate at Bulong"
- Anomaly 38 – Black Cat ASX announcement on 31 March 2020 "Bulong Resource Jumps by 21% to 294,000 oz"
- Wombola Dam – Black Cat ASX announcement on 28 May 2020 "Significant Increase in Resources - Strategic Transaction with Silver Lake"
- Hammer and Tap, Rowe's Find – Black Cat ASX announcement on 10 July 2020 "JORC 2004 Resources Converted to JORC 2012 Resources"

Coyote Gold Operation

- Coyote OP&UG – Black Cat ASX announcement on 16 January 2022 "Coyote Underground Resource increases to 356koz @ 14.6g/t Au – One of the highest-grade deposits in Australia"
- Sandpiper OP&UG, Kookaburra OP, Pebbles OP, Stockpiles, SP (Coyote) – Black Cat ASX announcement on 25 May 2022 "Coyote & Paulsens High-Grade JORC Resources Confirmed"
