

Drilling & Exploration Update October 2025

Figure 1. Low environmental footprint, Toyota mounted air-core drill rig on Nilpinna EL7071, making rapid progress.

Eromanga Basin, South Australia – Heavy Minerals Sands

September activities

- 4,000m HMS air-core drilling program commenced on 15 September as planned
- **100 drillholes for 3,650m completed Nilpinna EL7071 and Douglas Creek**

October plans

- **Additional 500m added to program**
- Program to be completed by 10 October
- Drilling continues at Douglas Creek today and will soon move to drill test Eddy EL7072
- Selective samples to be sent for Heavy Liquid Separation (HLS) assay to determine grade
- Laboratory assays to be reported

Macquarie Arc, New South Wales – Byrock Cu-Au Porphyry Project

September activities

- **Drill permits granted** for testing seven shallow “pipe-like” geophysical features
- Analogous targets to North Parkes, Cadia Cu-Au porphyry deposits, NSW

October plans

- Drill pads and tracks to be cleared
- **Final preparations for an early November start 1,500m Aircore/RC drill program**

Nevada, USA – Firenze Silver & Gold Project

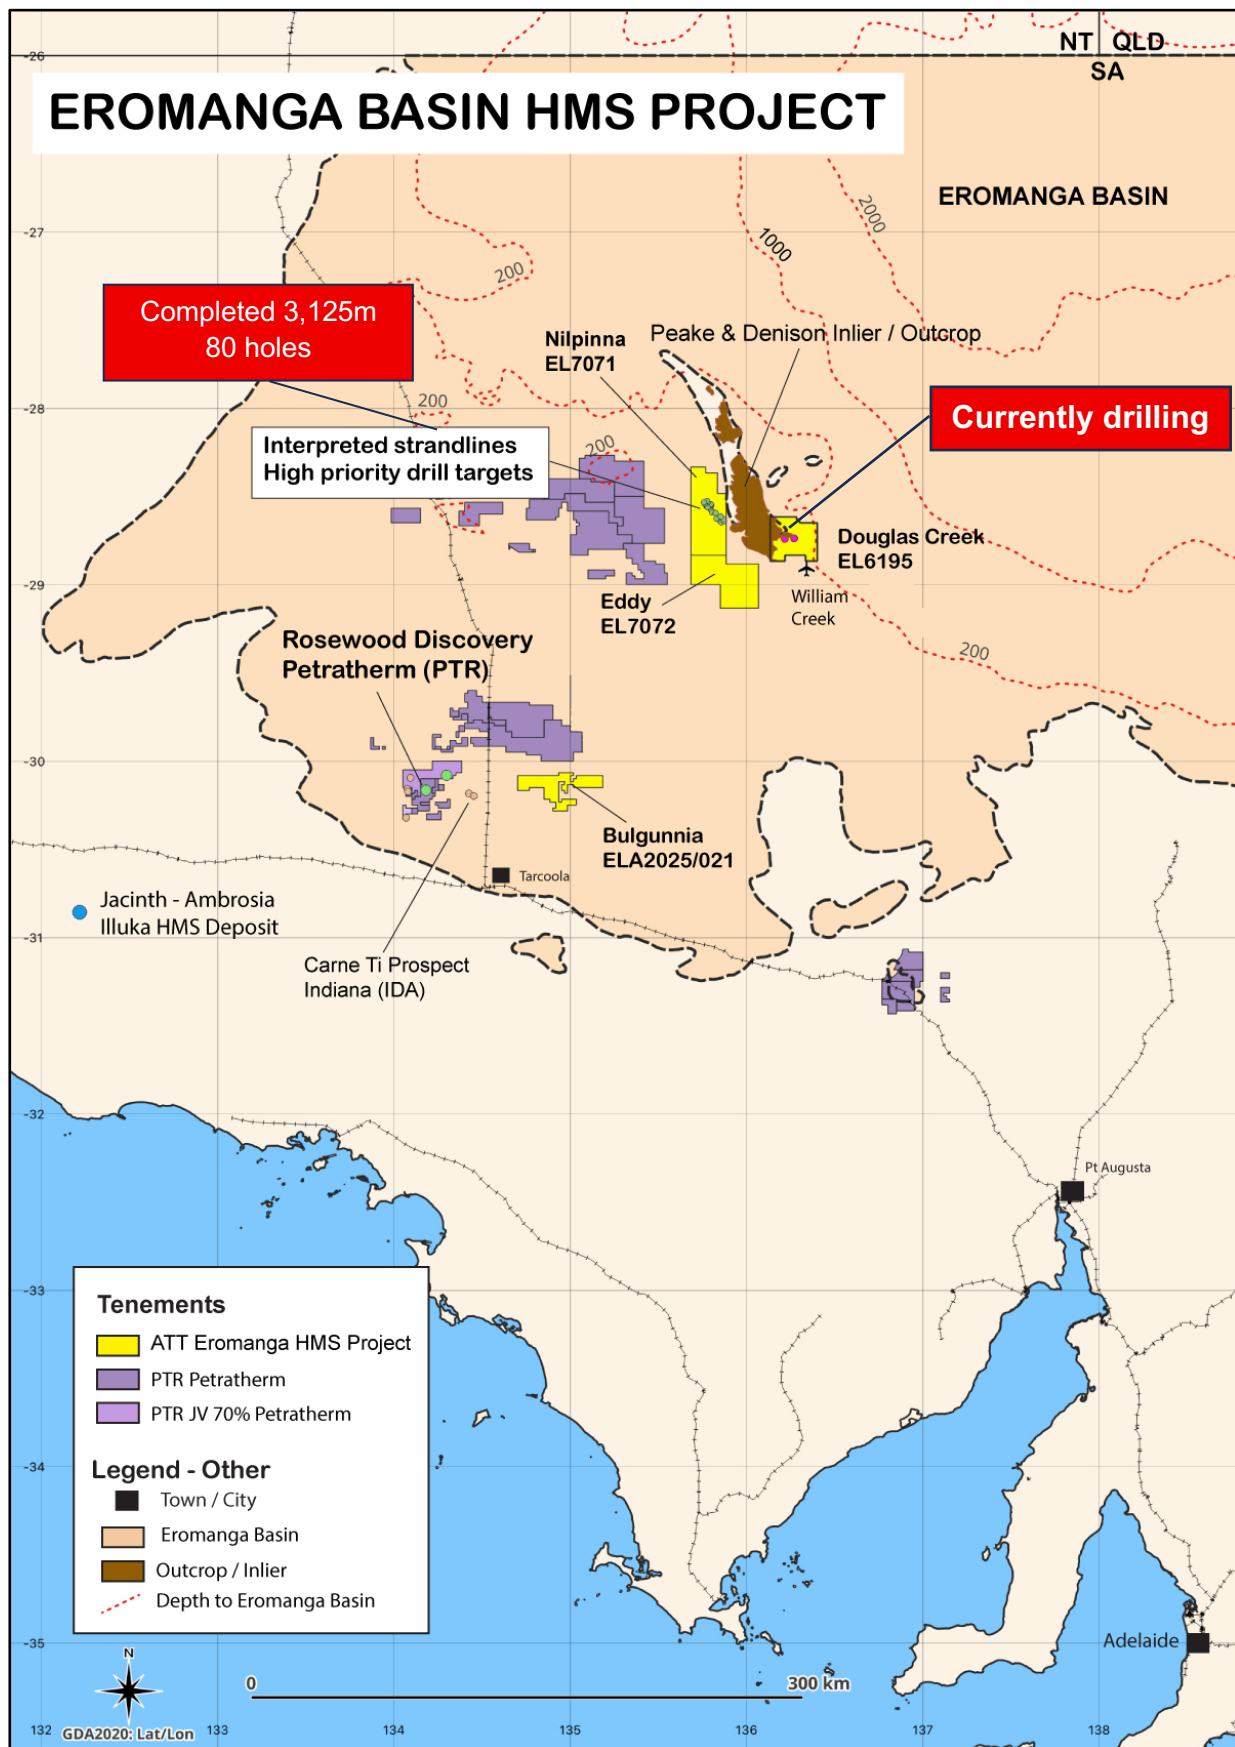

September activities

- Completed review of historical data
- Secured Option to purchase for US\$400k
- Due Diligence (DD) commenced
- Capital raise completed to fund cash component of purchase and preparations and permitting for drilling in early 2026

October-November plans

- Alteration mapping and rock chipping outcropping Silver & Gold veins
- Magnetics, gravity and passive seismic geophysics surveys to delineate drill collars
- Specialised fine fraction soil samples collection
- Completion of DD & Transfer of claims
