**EMU INCREASES INTEREST TO 83%
IN THE YATAGA COPPER PROJECT, GEORGETOWN NORTH QUEENSLAND**

The Georgetown JV, of which the very prospective Yataga Copper Project is part, is located in North Queensland. Yataga is a recent discovery and consists of a large mineralised igneous complex with similarities to a number of major copper occurrences globally, of which Highland Valley, Canada (BC) is one.

Emu NL (ASX: EMU or the Company) is pleased to advise that reconciliation of sole expenditure incurred by EMU during the farm-in phase of the Georgetown JV, has been completed and agreed to by its joint venture partner, Rugby Mining Pty Ltd (**Rugby**).

EMU's contribution to expenditure exceeded that required to earn its 80% interest and Rugby has elected to dilute. EMU's increased interest (agreed with Rugby) now aggregates 83%. Rugby has also elected not to contribute to the next approved budget, which will result in EMU's interest increasing further.

EMU is in the process of awarding a drilling contract following the assessment of tenders for a maiden drilling program planned for execution in the current dry season which usually concludes in mid-November.
