ASX ANNOUNCEMENT

Strong Demand Growth for Evion Expandable Graphite Sales to United States, Asia and Product Testing

Highlights

- Production and sales continue to grow at Evion's Expandable Graphite JV (50/50) operations near Pune, India.
- Over the last month we have undertaken a range of testing for new buyers in Asia with all results positive and we expect new orders to be received in the short term.
- A first shipment is also about to be made to a new market in Asia with further orders expected.
- Prices for graphite concentrate and sales of expandable graphite continue to increase as supply shortages affect global supply chains.
- The new shipments and orders reflect growing demand in parts of Asia for secure, non-Chinese sources of critical minerals. We also continue to negotiate with our buyers in the US to meet their volume requirements.
- Our Stage 2 expansion plans have advanced with equipment in place and available for installation in the short term.

Evion Group ("Evion" of the "Company") (ASX:EVG), a vertically integrated graphite developer positioned for growth with projects being developed in Madagascar, India and Europe, is pleased to share detail of its new and developing sales channels into various parts of Asia. With more shipments planned, Evion is pleased to have established a proven supply chain from India in to the USA and Europe.

Managing Director, David Round commented: *"We're very pleased with the strong demand we are seeing for our expandable graphite product, particularly as established users seek to diversify their supply channels."*

We have recently completed our first shipment of expandable graphite to the USA¹. We are looking to grow our presence in the USA, with support from customers looking to re-establish domestic supply channels.

We have since secured an order for an initial shipment to an Asian country that has traditionally relied on supply from other sources within Asia. This is a potential large market which we believe will be added to our growing list of buyers.

¹ ASX announcement 28 August 2025

We have also conducted a range of test results with a number of new buyers in the Asian market over the last few months. We've now reached the qualification stage with these globally significant companies and expect a range of orders in the short term.

We continue to liaise with new and existing buyers globally on forward contracts and we expect to secure a number of agreements in the near future. These new markets will underpin our commitment to the implementation of our Stage 2 upgrade which is scheduled for the near term²".

The Demand for Graphite and Expandable Graphite continues to grow strongly

During 2023, The Hague Centre for Strategic Studies recognised the need for graphite as a strategic raw material for defence to meet European industry needs.

A report was published at this time that recognised graphite as critically important to the defence sector and that CRM supply chain disruptions on the military domain needed to be addressed. Furthermore, the report recognised that graphite represented one of the highest risks to the supply of critical minerals to Europe and a regular and consistent supply of this material needed to be secured. The report recognised that “energy transition and digitalization have brought critical raw materials (CRM) to the forefront of international politics”.

Evion’s recognition by the EU as its preferred supply of graphite concentrate and graphite materials for the future is crucial to meeting Europe’s demand of this critical mineral in the future.

Supply risk for critical raw materials in military applications

Forward Looking Statements

Some of the statements appearing in this announcement may be in the nature of forward-looking statements. You should be aware that such statements are only predictions and are subject to inherent risks and uncertainties. Those risks and uncertainties include factors and risks specific to the industries in which Evion Group operates and proposes to operate as well as general economic conditions, prevailing exchange rates and interest rates and conditions in the financial markets, among other things. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement.

No forward-looking statement is a guarantee or representation as to future performance or any other future matters, which will be influenced by a number of factors and subject to various uncertainties and contingencies, many of which will be outside the Company's control.

The Company does not undertake any obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions or conclusions contained in this announcement. To the maximum extent permitted by law, none of the Company's Directors, employees, advisors or agents, nor any other person, accepts any liability for any loss arising from the use of the information contained in this announcement. You are cautioned not to place undue reliance on any forward-looking statement. The forward-looking statements in this announcement reflect views held only as at the date of this announcement.

This announcement is not an offer, invitation or recommendation to subscribe for, or purchase securities by the Company. Nor does this announcement constitute investment or financial product advice (nor tax, accounting or legal advice) and is not intended to be used for the basis of making an investment decision. Investors should obtain their own advice before making any investment decision.

Company Profile

Evion Group (ASX:EVG) is a vertically integrated graphite developer positioned for growth with projects being developed in Madagascar, India and Europe. We are the only Graphite Project outside of Europe to receive recognition by the European Union CRA as a preferred supply of graphite to Europe for the future⁴.

Our **EU Strategic Project** status can deliver the following key advantages to Evion:

- **Accelerated permitting processes:** Facilitates more efficient regulatory approvals, significantly reducing potential delays and supporting timely project advancement.
- **Strengthened financing opportunities:** Through a dedicated taskforce under the CRM Board, which oversees collaboration between EU and national, public and private financial institutions to support project financing.
- **Increased attractiveness to strategic stakeholders:** Enhances engagement with potential lenders, investors, offtake partners, and government-supported funding initiatives, positioning Evion as a preferred partner in the European critical minerals landscape.

The Maniry Project in southern Madagascar seeks to connect a substantial high-grade graphite resource to accelerating global markets serving the world's electrification such as battery anode manufacturers. Madagascar is the world's largest producer and exporter of natural graphite outside China. A Definitive Feasibility Study (DFS) completed in 2022 reported Maniry could produce up to 60 kilotonnes of graphite concentrate per annum for up to 21 years and had a real, pre-tax Net Present Value (NPV) of US\$263 million⁵.

The Company confirms that all material assumptions underpinning the Maniry production target and the forecast financial information derived from the Maniry production target in the ASX announcement dated 3 November 2022 continue to apply and have not materially changed.

Battery Anode Material (BAM) Plant

Evion Group is progressing an opportunity to feed fine flake product for Maniry to its Battery Anode Material Project in Germany which is focused on producing up to 30,000 tonnes per year⁶.
