ASX Release

Investor Webinar Invitation

Argent Minerals (**ASX:ARD**) ("**Argent**" or "the **Company**") is pleased to advise shareholders and interested parties that Managing Director & Chief Executive Officer, Pedro Kastellorizos, will host an Investor Presentation webinar on Tuesday 23rd September 2025 at 11.00AM AEST / 9.00AM AWST.

During the webinar, Mr Kastellorizos will discuss the recent diamond drilling results at Kempfield and details of upcoming exploration activities and development studies already underway. Against the backdrop of historically strong silver prices, the Company is focused on fast-tracking the development of its large polymetallic Kempfield deposit towards production.

Date: Tuesday 23rd September 2025
Time: 11.00AM AEST / 9.00AM AWST

There will be an opportunity for shareholders to ask questions during the presentation or questions can be submitted prior to the webinar by emailing awillis@nwrcommunications.com.au

Register for the webinar at: https://us02web.zoom.us/webinar/register/WN_grd8C4tXSzaSW5VnvQjOcA

There will be a recording made available on the Company website following the conclusion of the webinar.

This ASX announcement has been authorised for release by the Board of Argent Minerals Limited.

For further information, please contact:

Pedro Kastellorizos

About Argent Minerals Ltd (ASX: ARD)

Argent Minerals Limited is an ASX listed public company focused on the development of its flagship 100%-owned Kempfield Project in New South Wales which hosts Australia's second largest undeveloped silver project. The project is located near Orange in one of Australia's premier mining districts and lies within the prolific Lachlan Fold Belt, host to some of Australia's largest gold and copper mines including Northparkes and Cadia.

The scale and quality of the Kempfield deposit supports a clear pathway to early production via a heap leach starter (oxide) to fund a carbon-in-leach (CIL)/flotation hub (sulphide). The companies nearby Trunkey Creek, Mt Dudley and Pine Ridge projects offer major gold upside and the opportunity to establish a scalable, multi-deposit mine at Kempfield.
