ASX RELEASE

Drilling Commenced at Forrestania Hub – British Hill Project VM Drilling Commits to 90km RC Program – First 6 Months Drill for Equity

Highlights:

- **3,000m RC program commenced at the Company's Forrestania Hub – British Hill Project**
- **The program is within granted Mining Lease M77/1256 and lies directly 90km from the Company's Lake Johnston processing infrastructure**
- **Kalgoorlie based VM Drilling has been awarded a 90,000 metre RC and grade control RC drill program. VM Drilling has excepted payment for the first six months in fully paid ordinary shares in the capital of the Forrestania**

Forrestania Resources' Chairman David Geraghty commented:

"This latest RC program at British Hill with a key contractor in VM drilling is another key milestone for the company as it focuses on moving from explorer to producer through the conversion of the Lake Johnston processing facility. VM drilling is established in RC drilling and the current program will focus on grade control drilling which is crucial in any orebody development."

Forrestania Resources Limited (ASX: FSR, "Forrestania" or the "Company") is pleased to announce the commencement of a RC drilling program at the Company's Forrestania Hub – British Hill project.

British Hill Project

British Hill is a longstanding gold within the Southern Goldfields of WA, located 60km SSE of Marvel Loch. It has been developed in recent years by its previous owner / operator, IMD, and represents a near term production opportunity for FRS with several pre-production baseline surveys and approvals already in place.

A preliminary technical review conducted by FRS confirms a high conviction mining scenario via low-cost open pit mining methods. The British Hill Project has already completed several base line studies, technical evaluations and various approvals with the project now advanced with onsite early works and mining pending submissions and final mining approval.

This drill program includes 3,000 metres of RC drilling is designed to inform grade-control for future mining activity and is within granted Mining Lease M77/1256.

VM Drilling

Kalgoorlie based VM Drilling (VM) is a mid-sized drilling company focusing on RC drilling to deliver grade control and first pass exploration drilling as an efficient, cost-effective alternative to traditional Air core/RAB operations. VM will supply RC exploration and RC Grade Control services across various Forrestania projects. VM has been awarded a 90,000 metre drill program for 2026. VM has excepted payment for the first six months in fully paid ordinary shares in the capital of the Forrestania Resources. This will be reviewed after the first six months.

Forrestania continues to build a strong pipeline of gold opportunities across Western Australia's most prospective districts, with drilling at British Hill and Lady Lila forming part of the Company's broader strategy to establish a multi-asset gold resource base.

This announcement has been authorised for release by Forrestania Resources' Board.

About Forrestania Resources Limited

Forrestania Resources Limited (ASX: FRS) is a rapidly growing gold exploration and development company focused on building a portfolio of high-quality projects across Western Australia's premier mining districts.

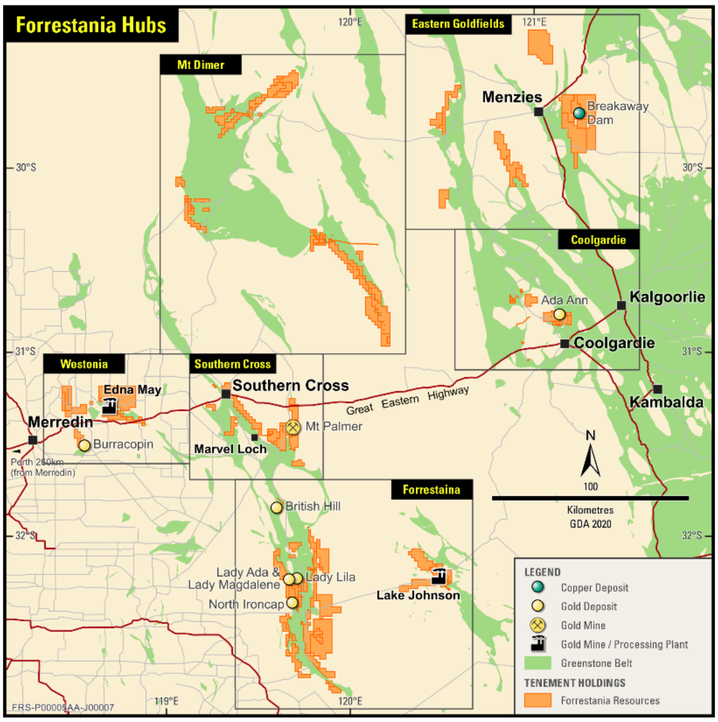
Led by a refreshed and experienced board, Forrestania is strategically expanding its footprint across the Southern Cross, Eastern Goldfields and Forrestania regions through disciplined exploration, selective acquisitions and a commitment to unlocking the broader potential of these highly prospective belts.

In the Southern Cross district, the Company is advancing a strategy to define significant gold resources that can support long-term development opportunities.

The Forrestania Project, from which the Company takes its name, lies within a world-class mineral province adjacent to the historic Bounty gold mine (~1Moz historic production) and in proximity to major mining operations, underscoring the region's exceptional prospectivity. Further north, Forrestania's projects near Coolgardie and Menzies provide additional exposure to gold and base metals within proven mineralised corridors of the Eastern Goldfields.

Forrestania Resources is dedicated to creating shareholder value through systematic exploration, strong technical execution and a focused approach to growing its gold asset base across Western Australia.

Forrestania Resources is dedicated to creating shareholder value through systematic exploration, strong technical execution and a focused approach to growing its gold asset base across Western Australia.



Competent person's statement

The information in this report that relates to exploration results is based on and fairly represents information compiled by Mr. Manohar Ghorpade. Mr. Ghorpade is the Chief Geologist of Forrestania Resources Limited and is a member of AusIMM. Mr. Ghorpade has sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration and to the activities undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Ghorpade consents to the inclusion in this report of the matters based on information in the form and context in which they appear.
