IEC Appoints Principal Geologist to Advance Yalgarra Project

Highlights

- **Mr Todd Hibberd appointed to the role of principal geologist, focused on advancing the Yalgarra Project in Western Australia.**
- **Mr Hibberd holds decades of experience in exploration, development, and production roles in a range of commodities.**
- **Desktop review of completed work underway with on-ground exploration scheduled to commence in Q4 2023.**

Intra Energy Corporation Limited (**ASX:IEC**) ("**IEC**" or the "**Company**") is pleased advise it has appointed Mr. Todd Hibberd to the role of Principal Geologist, focused on advancing the Yalgarra magmatic Ni-Cu-PGE Project ("**Yalgarra**", "**Project**") 70km east of Kalbarri in Western Australia.

Todd has decades of minerals industry experience in exploration, development, and production roles in a range of commodities, principally in gold, copper-gold, nickel, base metals and lithium. He led the discovery of the +800,000-ounce gold equivalent Chanach copper-gold porphyry deposit in the Kyrgyz Republic, and the 2 million tonne Mandiodo Nickel deposit in Indonesia as well as being responsible for the development and mining of 500,000 ounce gold deposits in Western Australia. He has held a variety of senior positions with large, mid-tier and junior sector resource companies within Australia and overseas.

With Todd's appointment, the Company can rapidly advance exploration at the Yalgarra Project where recent exploration has identified several magmatic nickel-copper sulphide targets using a combination of geochemistry and geophysics. An initial geological review will rapidly be followed with field exploration focussed on ground truthing the key nickel-copper targets and investigating the extent of the recent anomalous lithium results in the Northern block.

IEC Managing Director, Benjamin Dunn, commented:

“Todd’s appointment represents the next step in our strategic plan for the Company. We have recently appointed Dahrougue Geological Consultants to manage the exploration on the Llama Lithium Projects in Canada and with Todd’s appointment, we now have a highly experienced in-house geologist which strengthens our team as we move towards advancing our exploration programs in Australia and Canada.”

This announcement has been approved for release by the Board of Intra Energy Corporation.

Intra Energy Corporation (ASX:IEC) is an environmentally responsible, diversified mining and energy group with a core focus on battery, base and precious metals exploration to support the global decarbonisation and electrification for the clean energy future.

IEC is currently focused on the development of two highly prospective and underexplored projects in Australia:

- Llama Lithium Project – in the prolific James Bay Region of Québec, Canada, comprising 123 mineral claims for 63km², with reported outcropping pegmatites.
- Yalgarra Project - located in Western Australia near Kalbarri is a 70% owned joint venture targeting the exploration of magmatic nickel-copper-cobalt-PGE mineralisation.

The Company combines many years of experience in developing major projects, along with a highly skilled board and a demonstrated track record of success.
