

Develop appoints highly experienced resources specialists as part of accelerated growth strategy

Develop Global Limited (ASX: DVP) (**Company**) is pleased to announce three key appointments which will support its accelerated growth strategy.

The Company has appointed highly experienced resources executive Duncan Bradford as a Non-executive Director to the Board of the Company. Mr Bradford's appointment commences as at today's date.

Mr Bradford has recently finished his role as the Executive Vice President of the Base Metals and New Minerals Business Unit of Saudi Arabia's Ma'aden. He was also the Chairman of the Board of the Ma'aden Barrick Copper Company.

Prior to joining Ma'aden, Mr Bradford worked with Nevada Gold Mines (operated by Barrick) as a General Manager across the Cortez and Carlin mining districts. He has previously worked in Saudi Arabia at the Jabal Sayid Copper Mine for Ma'aden and was also the Managing Director for Byrnes Offshore Underground Mining Contractors.

Duncan has more than 30 years of operational mining experience, having worked in Africa, Australia, Asia, the Middle East and North America.

Duncan holds a Bachelor's Degree in Mining Engineering from the University of Queensland and a Master's in Business Administration from the University of Melbourne.

Develop also advises that it has appointed Nathan Stoitis as General Manager of Processing and Metallurgy.

Mr Stoitis is a highly regarded metallurgist with 30 years of experience in mineral processing and international sales and marketing. He holds a Bachelor of Minerals Engineering from the WA School of Mines and is a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM).

He has been the Director and Principal Metallurgist for consultancy Extreme Metallurgy, providing specialist consulting services across a range of commodities including gold, copper, lead, and zinc. His work spans both Australian and international operations.

Mr Stoitis has extensive experience in plant design, commissioning, project due diligence and operational optimisation, supporting mining projects at all stages of development. His insights have helped drive improved performance and efficiency across numerous mineral processing operations globally.

He has been an integral member of the independent due diligence teams for many mine acquisitions and company takeovers/mergers for companies including Northern Star Resources and Develop.

He also serves as a Non-Executive Director of Rox Resources, contributing technical and strategic expertise at the board level.

Develop also advises that it has appointed Fraser Perry as General Manager of Business Development.

Mr Perry is a qualified mining engineer and investment professional with experience across operational, technical and financial roles in the mining sector. He holds a Bachelor of Engineering (Mining with

Honours), a Bachelor of Science (Earth Science) from UNSW Sydney and a Master of Applied Finance from Kaplan Business School.

Mr Perry began his career with Macmahon as an Underground Miner before progressing through engineering roles with Evolution Mining and Glencore.

Recently Mr Fraser finished with Resource Capital Funds as an Investment Manager for 5 years across both the Perth and Denver offices. During his time with RCF, he worked on a wide range of transactions investing in various commodities and jurisdictions across the entire capital structure and reviewing a large number of opportunities.

Develop Managing Director Bill Beament said: "We have entered a period of rapid growth across our assets and we are also actively assessing potential partnership opportunities.

"Duncan, Nathan and Fraser will bring invaluable experience to Develop as we seek to capitalise on our opportunities while maintaining the highest levels of operational excellence, due diligence and corporate governance".

This announcement is authorised for release by the Board of Directors of the Company.

About Develop

Develop (ASX: DVP) has a twin-pronged strategy for creating value. The first of these centres on the exploration and production of future-facing metals. As part of this, Develop owns the Woodlawn copper-zinc mine in NSW, the Sulphur Springs zinc-copper-silver project in WA's Pilbara region and the Pioneer Dome Lithium Project in WA's Eastern Goldfields. The second plank of Develop's strategy centres on the provision of underground mining services. As part of this, Develop has an agreement with Bellevue Gold (ASX: BGL) to provide underground mining services at their Bellevue Project in Western Australia.
