

ASX Release
29 June 2023

RareX partners with InvestorHub for improved investor engagement

RareX Limited (ASX:REE) is pleased to announce the formal launch of our Investor Hub. The Investor Hub is a dedicated platform for investors to learn more about RareX activities, the Cummins Range Phosphate enabled Rare Earths Project and the RareX exploration growth programs underway. This is an exciting period for RareX as we rapidly progress the Cummins Range flagship project into Stage-1 operations.

Visit the RareX Investor Hub here: <https://ree.investorhub.com/welcome>

In line with our commitment to deliver updates and insights to our investors and stakeholders, RareX will be regularly uploading new content to the hub, including videos accompanying select announcements, education material, interviews, and corporate research.

RareX encourages investors to post questions/feedback through the Q&A function accompanying each piece of content and the RareX team will endeavour to respond in a timely manner.

How to join the RareX Investor Hub

1. Head to <https://ree.investorhub.com/auth/signup>
2. Follow the prompts to sign up for an Investor Hub account
3. Complete your account profile

From time to time, investors with complete accounts on the Investor Hub may be invited to exclusive company events and corporate opportunities.

CEO, James Durrant, said: “*We very much appreciate shareholder’s support during FY2023 and we look forward to updating investors on our progress in FY2024 and beyond via the Investor Hub. It is important to me and the team to be transparent in our use of shareholder money and this new platform will help facilitate this. We look forward to the improved engagement with our investors.*”

This announcement has been authorised for release by the CEO of RareX Limited.

About RareX Limited – ASX: REE

RareX Limited (ASX: REE) is a Perth-based rare earths and phosphate project development company. RareX's focus is on developing its flag-ship Cummins Range Rare Earths and Phosphate Project.

Rare Earths and in particular, NdPr are core enablers of decarbonisation and electrification of our society. NdPr supports high strength magnets which enables low carbon technologies, especially in the electric mobility sector, robotics solutions and renewable energy, particularly the wind energy sector.

Phosphates are one of the three macro nutrients required in fertilisers. Fertilisers are in ever more demand due to population growth, depleting soils and reduced arable land requiring ever more intensive farming.

The Cummins Range Rare Earths and Phosphate Project is in the East Kimberley region of Western Australia. RareX is committed to developing a sustainable, ethical, transparent and secure low carbon rare earth and phosphate supply chain solution for its products which satisfy the two global mega-trends of population growth and electrification.

RareX also maintains strategic investments in listed companies Kincora Copper Ltd (ASX: KCC, TSX.V: KCC), Cosmos Exploration Limited (ASX: C1X) and Canada Rare Earth Corporation (CVE: LL).

For further information on the Company and its projects visit www.rarex.com.au or sign up at ree.investorhub.com
