Quarterly Activities Report

DGR Global **Limited (ASX: DGR, DGR Global)** is not just another resources company. DGR Global is a *resource company creator*.

Our project generation, strategic tenure acquisition, corporate development and investment capabilities provide investors diversity across several different commodities, sovereign jurisdictions, and international financial exchanges. With our group of talented exploration staff, we focus on identifying and securing projects that will yield valuable and enduring world-class resource assets.

DGR GLOBAL CREATES RESOURCE COMPANIES

DGR Global's business is the creation of resource exploration, development, and mining companies. The business uses the skills of a core team of talented exploration staff to identify resource projects capable of yielding world class discoveries of commodities with enduring strong fundamentals. This is achieved through the identification of commodities with a favourable 20-year demand, growth, and price outlook. DGR searches for geological terranes with:

- A demonstrated strong endowment for that commodity in an historically under-explored region.
- Opportunity for the application of newly developed exploration and metallurgical techniques to assist in the definition of economic resources.
- Jurisdictions with improving socio-economic and regulatory frameworks.
- Extensive available tenures.
- Existing data sets which provide the basis for innovative reinterpretation.

DGR Global provides initial seed funding and management support to secure these assets in subsidiaries and develop these assets to more advanced funding stages. The Company has a pipeline of projects in daughter companies at various stages of emergence, and in 2015 crystallised a significant return through the sale of its 15% holding in Orbis Gold for \$26Million. Further return from its holdings in LSE/TSX listed SolGold and AIM/ASX listed Atlantic Lithium and ASX listed Clara Resources, New Peak Metals, Lakes Blue Energy and unlisted Auburn Resources, DGR Energy and Armour Energy International is expected over the coming years.

The previous resource exploration and funding activities of DGR's key personnel underscore the opportunities provided by the DGR business model. DGR Global does not generally purchase its exploration projects. DGR's in house generative capabilities give the Company a strong competitive edge. DGR's focus on provincial tenement positions covering entire sedimentary basins or structural blocks where possible, delivers capital, government, and major resource corporate attention.

DGR Global holds key equity positions in its subsidiary companies after listing. As shown in the DGR Global Group Corporate Structure as of 30 June 2024, DGR Global holds:

- 6.8% of SolGold Plc (LSE/TSX : SOLG),
- 1.87% of Atlantic Lithium Ltd (LSE : ALL, ASX : A11),
- 11.92% of Clara Resources Australia Ltd (ASX : C7A),
- 2.7% of New Peak Metals Ltd (ASX : NPM),
- 6.38% of Lakes Blue Energy NL (ASX: LKO).

QUARTERLY REPORT FOR THE PERIOD ENDED 30 JUNE 2024

During the quarter minimal field exploration and prospecting activities were undertaken. DGR and its related entities continue to remain active, advance projects and plan exploration programmes within their respective portfolios as reasonably permitted by the prevailing conditions.

Highlights for each entity for the current quarter follow.

DGR Global Ltd [ASX:DGR]

- The Company continues to focus on new project generation and value creation and also continues to seek out new investment and development opportunities to drive the creation of new resource companies.
- DGR also holds 83.28% of Armour Energy International Ltd (Armour Energy International) which holds the highly prospective oil project in the Kanywataba Block, Uganda. Armour Energy Ltd (in liquidation) holds 16.82% of Armour Energy International¹.
- DGR also holds 100% of DGR Energy which holds the Turaco tenement 100%. Grant of the Turaco Petroleum Exploration Licence and renewal of the Kanywataba Petroleum Exploration Licence by Uganda's Minister of Petroleum was announced².
- Supporting 39.34% owned, public, unlisted Auburn Resources Ltd.
- Armour Energy Ltd - As previously disclosed to the ASX* post Armour Energy Ltd being placed into receivership and administration on the 10th of November 2023. DGR Global Ltd ('DGR' or 'the Company') had a material investment in Armour Energy Ltd (in liquidation) both via convertible notes and its position as the company's largest shareholder.
 - Accordingly, DGR Global Ltd progressed various Deeds of Company Arrangement (DOCA's) to present to creditors at the second creditors meeting dated 19th of January 2024 which sought to cater to all stakeholders' interests including all creditors and shareholders of Armour Energy Limited (in liquidation) and its subsidiaries.
 - DGRs DOCA's were voted against by creditors who supported the competing bid from ADZ Energy Pty Ltd a company incorporated in Australia in October 2023. The competing bid focussed primarily on the subsidiaries of Armour Energy Ltd (in liquidation), which has itself now been placed into liquidation.
 - DGR contends that the receivers of Armour Energy Ltd (in liquidation) were invalidly appointed and have commenced proceedings in relation to that, which are ongoing.
- In December 2023, DGR Global Ltd commenced legal proceedings in the Supreme Court of Queensland in relation to the administration and receivership of the Armour Group (Proceedings). DGR continues to prosecute the Proceeding (as defined in our previous Jan – Mar 2024 Quarterly Report).

In May 2024, DGR successfully defended an application by the Defendants to strike out or summarily dismiss its claim, and the Court awarded DGR its costs for defending that application. DGR also succeeded in its own application to amend its claim and join Shunkang and Baker & McKenzie as parties to the Proceeding. As previously indicated, DGR has alleged certain claims under the Australian Consumer Law against Shunkang and Baker & McKenzie, in addition to its other claims against the existing Defendants.

The Court recently ordered further timetabling directions for the Proceeding. Under that timetable, the pleadings will close in the coming weeks, to be followed by disclosure and the filing of evidence. The matter remains listed for a 10-day trial in early December 2024.

- After the end of the reporting period, SolGold Plc (LSE:SOLG & TSX:SOLG) which is 6.8% owned by DGR announced a major USD750 million funding package for the Cascabel Project, validating Cascabel as a world-class copper-gold project. The value upside proposition for DGR, as a 6.8% shareholder, is considered outstanding and was noted by SOLG in its market release as being a landmark achievement for SolGold and its stakeholders⁶.

In addition, the recent signing by the Government of Ecuador of the Exploitation Contract was described by the Ecuadorian Vice Minister of Mines as representing "a new era of economic development for Ecuador, demonstrating our commitment to promoting investment and sustainable development in the mining sector."⁷.

SolGold released a further update after the end of the reporting period through their July Corporate presentation.

- HSEC (Health, Safety, Environment and Community for the group entities for which DGR acts as Operator, maintains a rolling 12-month TRIFR of 0.00 and recorded zero environmental incidents for the corresponding period, demonstrating DGR's continuous commitment to sustainable and safe operations.

SolGold Plc (LSE and TSX: SOLG) – DGR Interest 6.8% 204.2M Shares

- Focus on high-grade world-class copper gold porphyry systems at Cascabel in Ecuador. Cascabel is proximate to Quito and seaports, is at low elevation, and has abundant water supplies and access to hydropower.
- Exploration activities continue at a number of SolGold's wholly owned Mineral Concessions in Ecuador, with ongoing strict COVID-19 protocols in place.
- SolGold remains the dominant explorer in the country.
- Completion of the previously announced plan of arrangement between SolGold and Cornerstone Capital Resources Inc.
- **Announcements of the successful completion of the new Cascabel Pre-Feasibility Study (PFS) and Cascabel Complementary Investment protection Agreement (CIPA) were previously made. The PFS revealed:**
 - a global resource of nearly 4 bn tonnes containing 14.4 mt of copper, 36.6 m oz gold and 110 m oz of silver.
 - a project assessed at PFS level, based on just 18% of the total resource tonnage at Cascabel based on conservative metal prices of US\$3.85 copper and US\$1750/ oz gold prices.
 - Start up rate of 12 mtpa, underground block cave building to 24 mtpa.
 - production of a high quality gold rich concentrate.
 - Environmentally acceptable footprint.
 - project life for the study period only of 28 years.
 - NPV (discounted at 8%) of \$3.2 bn after all taxes (reduced to \$2.9 bn post US\$750m stream).
 - IRR after tax of 24%.
 - Preproduction capital costs of US\$1.55 bn.
- Signing of a Memorandum of Understanding (MOU) for sustainable Hydro-Solar energy at Cascabel project.
- Key financial developments were released during the quarter.
- Signing by the Government of Ecuador of the Exploitation Contract for the Cascabel Project was announced.
- After the end of the reporting period SolGold announced that it had entered into a syndicated gold stream agreement for the provision of a USD750 million financing package for the Cascabel Project.
- DGR notes further that considerable upside exists to be refined during the DFS permitting and financing phases through opportunities for:
 - benefits of increased copper prices US\$4.20/lb and copper US\$2300/oz currently representing a notional increase in revenues of 9% for copper and 31% for gold before all expenses and tax (approximately 15% blended).
 - increases in metallurgical recoveries especially gold.

- expediting production by bringing the Tandayama resource to reserves status and production up to 2 years sooner.
 - further resource definition on the Cascabel tenement.
 - further operating cost reductions through mine and mill optimisation and green power initiatives.
 - Refinement of mine, mill and infrastructure design and capex.
 - reduction in discount rates and cost of capital.
 - assessment of the long term cash flow value of the other 82 % of the resource not assessed in the study.
- DGR also notes that:
 - SolGold continues to offer unique upside from its comprehensive national exploration portfolio in Ecuador.
 - Efforts continue in respect of the emplacement of the balance of the financing package for development using strategies which minimise equity dilution.

Project: Kanywataba Block and Turaco Block | Area: 344km² | Prospective for: Oil and Gas
Location: Albertine Graben, Uganda

Inspired by the world's "conjugate margins" where rich oil plays lie in porous and permeable sand traps along the fractured edges of the earth's seven major continental plates. These are Rift Basin settings and host 33% of the world's oil resources.

One of the world's early forming conjugate margins is in the East African Rift system where the Albertine Graben is located underneath Lake Albert.

The Albertine Graben lies on Uganda's western border and is renowned as an exceptionally hydrocarbon-rich rift basin.

Activities to date include:

KANAWAYABA BLOCK

- Original 2D lines shot in 2010.
- Additional 2D seismic lines shot in 2021, focusing on quantifying and de-risking our portfolio.

TURACO BLOCK

- Large 3D seismic coverage
- 3D reprocessing (390km²), geochemical analysis, AVO and attribute analysis & Miocene outcrop study

Within the block there are multiple developed (untested) on-trend structural traps (3-way and 4-way dip closures) and multiple untested stratigraphic traps.

The Kingfisher oil discovery (40km NE of Kanywataba) oil seeps confirm a local working petroleum system.

The Albertine Graben showing its location in Uganda.

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: No, the current quarter's operational outflows include office rent of \$180k, office relocation expenses, income tax payment and auditor's remuneration. Our office has moved to lesser rental premises of \$9k a month. Furthermore, proceeds from the loan against tradable securities can be used to fund its future investments and expenditure requirements

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: Yes, the Company has a range of financing options available via its Balance Sheet which it is currently either implementing or exploring. This does not include raising further equity at this time.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes, as outlined above. The Company holds tradeable securities in a range of listed entities that can be used to assist the Company to fund its investment and expenditure requirements. The Company also holds accounts receivable from sponsored listed entities for administrative services and rental charges.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.
