Chair's Letter

5 May 2023

Dear Shareholders

On behalf of the Board, I am pleased to present you with the Company's non-renounceable pro-rata entitlement offer. Each Eligible Shareholder is being offered the right to acquire additional Shares in the Company at an issue price of \$0.07 per Share, to raise \$2,432,827 (before costs). This has been determined on the basis of 1 new Share for every 3 Shares registered in your name as at the Record Date. You will also receive 1 free attaching New Option for every 1 Share issued under the Entitlement Offer.

NickelSearch has an exciting pipeline of greenfield exploration targets to pursue, and the structure of this capital raising underpins our pursuit of new discoveries at our Carlingup Project outside of Ravensthorpe in Western Australia. In the near term, we are underway with drilling greenfield nickel sulphide targets including B1, Serendipity, Lipple and Wadley. We will also return to Sexton for follow-up drilling to the nickel sulphide intersections announced in February, as well as undertaking brownfield drilling at RAV8, which was a high-grade nickel sulphide mine that produced 16.1kt at 3.45% Ni. With the very promising and thorough preparation of this drilling campaign, we are optimistic that it will deliver successful outcomes for shareholders and we look forward to sharing the results with you in the coming months.

Alongside our nickel sulphide exploration, the Company is planning for early-stage target identification and geological mapping to follow up our recent announcement regarding the prospectivity for lithium on our tenements. Early stage reconnaissance drilling would follow shortly thereafter upon positive results.

Participating Shareholders will also receive one New Option for each Share they subscribe for with the New Options expiring on 30 November 2023. By this time, we should have the results from this drilling campaign, plus we will have completed the planning work for the exploration of our target RAVD120. NickelSearch received a grant of \$220,000 in co-funding from the WA Government's Exploration Incentive Scheme, which will be utilised to drill one deep diamond hole to follow up historical drilling that delivered positive results for base metals prospectivity but has not been further tested.

This is a pivotal time for the Company. Since listing on the ASX, NickelSearch has conducted extensive work on exploration targeting and planning, which is now being put into action. We have deliberately scoped this capital raise to recognise the current market conditions, and we are confident that the work to be undertaken will deliver positive results for NickelSearch and our shareholders.

This Prospectus contains information about the Offers and the key risks associated with investing in the Company (see section 3), and it is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX. An investment in the Company should be considered highly speculative. If you do not understand this Prospectus, then you should contact your professional adviser.

The Board and Management of NickelSearch appreciates the ongoing support of our shareholders and encourage all to review the Offer documentation and participate in the Entitlement Offer, allowing us to unlock the value in NickelSearch and deliver value to our owners.

Yours sincerely

Mark Connelly

Non-Executive Chair
NickelSearch Limited

The Company also proposes to issue 34,754,673 Underwriter Options and 5,000,000 Lead Manager Options pursuant to the Additional Offers (please refer to section 1.3 below for further details).

Shares issued under the Entitlement Offer will be issued as fully paid ordinary shares and will rank equally in all respects with existing Shares on issue. Please refer to section 6.7 for a summary of the rights and liabilities attaching to Shares. New Options to be issued under the Entitlement Offer will be issued on the terms and conditions contained in section 6.8.

1.2 Placement

To the extent the Company receives oversubscriptions pursuant to the Entitlement Offer and/or Shortfall Offer, the Company reserves the right to issue up to a further 14,285,714 Shares at an issue price of \$0.07 per Share, together with 1 free attaching New Option for every 1 Share subscribed for and issued (exercisable at \$0.07 each on or before 30 November 2023), to professional and sophisticated investors to raise a further \$1,000,000 (before costs) (**Placement**).

Shares issued under the Placement will be issued as fully paid ordinary shares and will rank equally in all respects with existing Shares on issue. New Options to be issued under the Placement will be issued on the same terms and conditions as the New Options pursuant to the Entitlement Offer.

Any Securities issued pursuant to the Placement will be, to the maximum extent possible, issued out of the Company's available placement capacity under Listing Rules 7.1 and 7.1A.

In the event the Entitlement Offer and Shortfall Offer are not oversubscribed, the Company does not intend to exercise its discretion to undertake the Placement except to the extent to allow certain directors of the Company to subscribe for Shares and New Options in excess of their respective entitlements. Refer to section 6.12.4 for further details.

The Company will announce further details with respect to the Placement on its ASX announcements platform in due course.

1.3 Additional Offers

Pursuant to this Prospectus, the Company is also making the Additional Offers. The Additional Offers are being made under this Prospectus to:

- ensure that the Securities offered pursuant to the Additional Offers are made in accordance with the disclosure requirements of Part 6D.2 of the Corporations Act; and
- remove the need for an additional disclosure document to be issued upon the sale of any Shares, New Options or Underwriter Options (including any Shares issued on exercise of any New Options or Underwriter Options) that are issued pursuant to the Additional Offers.

1.3.1 Shortfall Offer

Any Shares and New Options not taken up pursuant to the Entitlement Offer will become Shortfall Securities (**Shortfall Offer**). The Shortfall Offer is a separate offer of the Shortfall Securities made pursuant to this Prospectus and will remain open for up to 3 months following the Closing Date.

Shortfall Securities issued under the Shortfall Offer shall be granted on the same terms and conditions as the Shares and New Options being offered under the Entitlement Offer. Shortfall Securities will only be issued if the Entitlement Offer is undersubscribed and will only be issued to the extent necessary to make up any shortfall in subscriptions. It is possible that there will be few or no Shortfall Securities available under the Shortfall Offer, depending on the level of take up of Entitlements by Eligible Shareholders under the Entitlement Offer.

Eligible Shareholders who wish to subscribe for Shortfall Securities pursuant to the Shortfall Offer may apply by completing the relevant section on the Application Form or by making payment for such Shortfall Securities via Electronic Funds Transfer or using BPAY® (refer to section 4.6).

The Board has the discretion to elect to cap the number of Shortfall Securities applied for by Eligible Shareholders, having regard to:

- the number of Securities that an Eligible Shareholders is entitled to subscribe for pursuant to its Entitlement relative to the number of Shortfall Securities that it has applied for;
- the total number of Shortfall Securities available for subscription; and
- the number of Shares held by an Eligible Shareholder after the completion of the Offers.

Allocation of the Shortfall Shares will be at the discretion of the Board in conjunction with the Underwriter and will otherwise be subject to the terms of the Underwriting Agreement, the key terms of which are set out in section 5.1. If the Entitlement Offer is oversubscribed (by take up of Entitlements and applications for Shortfall Securities by Eligible Shareholders), scale back will be applied to applications under the Shortfall Offer on a pro-rata basis to the respective shareholdings of Eligible Shareholders. There is no guarantee that Eligible Shareholders will receive Securities applied for under the Shortfall Offer.

There is no guarantee of any allocation of Shortfall Securities, or that applications for Shortfall Securities will be satisfied in full. Excess Application Monies for the Shortfall Offer will be refunded without interest. It is a term of the Shortfall Offer that, should the Company scale back applications for Shortfall Securities, the Applicant will be bound to accept such lesser number allocated to them.

Any Shares and New Options not applied for under the Entitlement Offer or the Shortfall Offer may be placed at the Directors' discretion to sophisticated and professional investors as defined in sections 708(8), 708(10) and 708(11) of the Corporations Act, subject to the Listing Rules and any restrictions under applicable law, within 3 months of the close of the Entitlement Offer.

The Offer of 34,754,673 Underwriter Options to the Underwriter is being made pursuant to this Prospectus. The Underwriter Options will be distributed between the Underwriter and any sub-underwriters on a pro rata basis depending on the amount underwritten.

\$348 will be raised under the Underwriter Offer as the Underwriter Options are being issued for nominal consideration, being \$0.00001 per Underwriter Option, as consideration for services provided to the Company by the Underwriter.

The Underwriter Offer is being made such that the relief provided under *ASIC Corporations (Sale Offers That Do Not Need Disclosure) Instrument 2016/80* with respect to the on-sale provisions of section 707 of the Corporations Act is available. Specifically, given the Underwriter Options are issued with disclosure under this Prospectus, then the Shares issued upon the exercise of any of the Underwriter Options can be on-sold within 12 months of their issue, without a disclosure document for the on-sale offer.

The issue of the Underwriter Options is subject to the Company obtaining the approval of its shareholders at general meeting to be convened in due course. It is agreed that in the event shareholder approval is not obtained for the issue of the Underwriter Options within 3 months from the date of completion of the Offers, the Company will issue the maximum number of Underwriter Options out of the Company's available placement capacity under Listing Rule 7.1, with the balance (if required) to be issued once the Company's placement capacity under Listing Rule 7.1 is sufficiently refreshed.

The Underwriter Offer cannot be accepted by any person or entity other than the Underwriter (or its nominee). An Application Form in relation to the Underwriter Offer will be issued to Discovery Capital (or its nominee) together with a copy of this Prospectus.

See section 6.9 for a summary of the full terms and conditions attaching to the Underwriter Options offered under the Underwriter Offer. All shares issued upon the exercise of the Underwriter Options will rank equally with the Shares on issue at the date of this Prospectus, as summarised in section 6.7.

1.3.3 Lead Manager Offer

In accordance with the Lead Manager Mandate, the Company has agreed to issue Lead Manager Options to the Joint Lead Managers (or their nominees) for the provision of its services as Lead Manager to the Entitlement Offer (**Lead Manager Offer**). See section 5.2 for a summary of the material terms of the Lead Manager Mandate.

The Offer of 5,000,000 Lead Manager Options to the Joint Lead Managers is being made pursuant to this Prospectus. The Lead Manager Options will be split equally between the Joint Lead Managers, that is each Joint Lead Manager will be issued 2,500,000 Lead Manager Options each.

\$5,000 will be raised under the Lead Manager Offer as the Lead Manager Options are being issued for nominal consideration, being \$0.001 per Lead Manager Option, in part consideration for services provided to the Company by the Joint Lead Managers.

The Lead Manager Offer is being made such that the relief provided under *ASIC Corporations (Sale Offers That Do Not Need Disclosure) Instrument 2016/80* with respect to the on-sale provisions of

section 707 of the Corporations Act is available. Specifically, given the Lead Manager Options are issued with disclosure under this Prospectus, then the Shares issued upon the exercise of any of the Lead Manager Options can be on-sold within 12 months of their issue, without a disclosure document for the on-sale offer.

The Lead Manager Options will be issued out of the Company's available placement capacity under Listing Rule 7.1.

The Lead Manager Offer cannot be accepted by any person or entity other than the Joint Lead Managers (or its nominee). An Application Form in relation to the Lead Manager Offer will be issued to each Joint Lead Manager (or its nominee) together with a copy of this Prospectus.

See section 6.10 for a summary of the full terms and conditions attaching to the Lead Manager Options offered under the Lead Manager Offer. The Company has engaged Discovery Capital Partners Pty Ltd and Cumulus Wealth Pty Ltd as lead managers (together, the **Lead Managers**) to the Offers and the Placement pursuant to the Lead Manager Mandate. The total fees payable to the Lead Managers are set out below in section 5.2.

1.12 Underwriting and sub-underwriting

The Entitlement Offer is fully underwritten by the Underwriter. Refer to section 5.1 for details of the material terms of the Underwriting Agreement and total fees payable.

If for any reason the Underwriting Agreement is terminated before completion, the Company reserves the right to place the Shortfall at its discretion pursuant to the Shortfall Offer.

In accordance with the Underwriting Agreement, the Underwriter will ensure that no sub-underwriter will acquire, through participation in sub-underwriting the Offer, a holding of Shares of, or increase in their holding to an amount in excess of 19.99% of all Shares on issue on completion of the Entitlement Offer unless this is expressly contemplated and disclosed in the Prospectus. Where Shares are issued pursuant to the exercise of New Options, the voting power of the Underwriter or any sub-underwriters who exercise their New Options will increase. The likelihood of New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

The Underwriter has entered into a sub-underwriting arrangement with Cumulus Wealth Pty Ltd (ACN 634 297 279) (**Cumulus**), an unrelated party, as well as various other unrelated parties. Cumulus has committed to sub-underwrite the Entitlement Offer for up to 17,377,336 Shares, being approximately \$1,216,414. The Underwriter may appoint additional sub-underwriters to sub-underwrite the Entitlement Offer.

1.12.1 Sub-underwriting by Directors

Ms Nicole Duncan and Mr Norm Taylor, have each entered into sub-underwriting agreements pursuant to which they have each agreed to sub-underwrite the Entitlement Offer (**Director Sub-Underwriting Agreements**). Pursuant to the Director Sub-Underwriting Agreements:

- Ms Duncan has agreed to sub-underwrite the Entitlement Offer up to \$54,130.02; and
- Mr Taylor has agreed to sub-underwrite the Entitlement Offer up to \$50,000.

The Company considers that shareholder approval is not required for the issue of any securities issued to Ms Duncan and Mr Taylor as a result of their sub-underwriting in accordance with Listing Rule 10.12 (Exception 2). Refer to section 5.3 for a summary of the material terms of the Director Sub-Underwriting Agreements and section 5.3 and 6.12.3 for details of the potential effects of the sub-underwriting on the relevant interests of Ms Duncan and Mr Taylor.

1.13 Holding of Application Monies

Application Monies will be held in a trust account until the Shares and New Options are issued.

The trust account established by the Company for this purpose will be solely used for handling Application Monies.

Any interest earned on Application Monies will be for the benefit of, and will remain the sole property of, the Company, and will be retained by the Company whether or not the allotment and issue of Shares and New Options takes place.

Applications and Application Monies may not be withdrawn once they have been received by the Company.

1.14 Quotation

The Company will apply to ASX within 7 days after the date of this Prospectus for quotation of the Shares offered under this Prospectus. If approval for quotation of the Shares is not granted within 3 months after the date of this Prospectus (or any later time permitted by law), the Company will not issue any Securities under the Entitlement Offer.

1.15 Issue date

An issue of Securities under this Prospectus is anticipated to occur in accordance with the timetable set out in this Prospectus. Following this, holding statements will be sent to investors as required by ASX. It is the responsibility of investors to determine their allocation prior to trading in the Securities. Investors who sell their securities before they receive their holding statement will do so at their own risk.

1.16 CHESS and issuer sponsorship

The Company operates an electronic CHESS sub-register and an electronic issuer sponsored sub-register. These two sub-registers will make up the Company's register of Shares.

The Company will not issue certificates to security holders. Rather, holding statements (similar to bank statements) will be sent to security holders as soon as practicable after the issue date. Holding statements will be sent either by CHESS (for security holders who elect to hold Shares on the CHESS sub-register) or by the Share Registry (for security holders who elect to hold Shares on the issuer sponsored sub-register). The statements will set out the number of securities issued under this Prospectus and the Holder Identification Number (for security holders who elect to hold Shares on the CHESS sub register) or Shareholder Reference Number (for security holders who elect to hold Shares on the issuer sponsored sub-register). Updated holding statements will also be sent to a security holder following the month in which the balance of its security holding changes, and otherwise as required by the Listing Rules and the Corporations Act.

1.17 Privacy

Persons who apply for securities under this Prospectus are asked to provide personal information to the Company, either directly or through the Share Registry. The Company and the Share Registry collect, hold and use that personal information to assess applications for securities, to provide facilities and services to security holders, and to carry out various administrative functions. Access to the information collected may be provided to the Company's agents and service providers and to ASX, ASIC and other regulatory bodies on the basis that they deal with such information in accordance with the relevant privacy laws. If the information requested is not supplied, applications for securities will not be processed.

In accordance with privacy laws, information collected in relation to specific Shareholders can be obtained by that Shareholder through contacting the Company or the Share Registry.

1.18 Tax

It is the responsibility of all investors to satisfy themselves of the particular tax treatment that applies to them in relation to the Entitlement Offer, by consulting their own professional tax advisers. Neither Company or its Directors accept any liability or responsibility in respect of any tax consequences to an investor relating to this Prospectus.

1.19 Enquiries

Enquiries relating to this Prospectus can be directed to the Company at info@nickelsearch.com or by contacting the Company Secretary by telephone on +61 8 6184 4983.

2.3 Control

The maximum total number of Securities proposed to be issued under the Entitlement Offer is 34,754,673 Shares and 34,754,673 New Options. The Shares issued pursuant to the Entitlement Offer will constitute approximately 25% of the Shares on issue following completion of the Entitlement Offer (assuming no Shares are issued or convertible securities exercised or converted to Shares prior to the Record Date).

As at the date of this Prospectus, Medallion Metals Limited is the largest shareholder of the Company with a relevant interest in 15,713,662 Shares which represents a voting power of 15.07%.

No Eligible Shareholder will increase their voting power in the Company to 20% or more under the Entitlement Offer.

No nominee has been appointed for Ineligible Shareholders under section 615 of the Corporations Act and, as such, Eligible Shareholders will not be able to rely on the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of their Entitlement or additional Shares under the Shortfall Offer, they will not be permitted to increase their voting power:

- from 20% or below 20% to above 20%; or
- from a starting point of above 20% and below 90%,

as a result of accepting their Entitlement under the Offer without breaching section 606(1) of the Corporations Act.

As a consequence, the Company will not issue Shares to any Applicant or other person if the result of any such issue would result in any person (and that person's associates) acquiring a relevant interest contrary to section 606 of the Corporations Act. This may result in the Company scaling back applications from Eligible Shareholders to ensure that no breach of section 606 of the Corporations Act occurs.

Without limiting the above, it is the responsibility of Eligible Shareholders to ensure that their participation under the Offer does not result in them breaching section 606 of the Corporations Act. Eligible Shareholders, by lodging applications for Shares, acknowledge and accept the right and obligation of the Company to not allot or issue Shares to them which would result in any breach by them of section 606 of the Corporations Act and direct the Company to so act. Eligible Shareholders who may be at risk of exceeding the 20% voting power threshold in section 606 as a result of acceptance of their Entitlement should seek professional advice before completing and returning their Application Form.

As set out in section 1.1, the Entitlement Offer of 34,754,673 Shares and 34,754,673 free attaching New Options is fully underwritten by the Underwriter (**Underwritten Securities**). As at the date of this Prospectus, the Underwriter holds a relevant interest in 1,333,333 Shares in the Company (and it has indicated that it has no intention of acquiring any additional Shares in the Company prior to the Record Date). The Underwriter has agreed to fully underwrite the Entitlement Offer and will receive 34,754,673 Underwriter Options as part of its fee pursuant to the Underwriting Agreement which are intended to be distributed to various sub-underwriters. Please refer to section 5.1 for a summary of the Underwriting Agreement.

The extent to which Securities are issued to the Underwriter as a result of underwriting the Entitlement Offer will affect the Underwriter's voting power in the Company. The Underwriter is not a related party of the Company for the purpose of the Corporations Act. The Underwritten Securities may be taken up by sub-underwriters of the Underwriter in accordance with the Underwriting Agreement.

The Underwriter's maximum potential relevant interest as a result of underwriting the Entitlement Offer is set out below (not taking into account the sub-underwriting commitments and assuming no additional Shares are allocated to Eligible Shareholders under the Shortfall Offer and no Shares are issued pursuant to the Placement).

Take up by Shareholders	Underwritten Shares	Shares held on completion	Voting power on completion ¹
Fully subscribed	Nil	1,333,333	0.96%
75% subscribed by Shareholders	8,688,668	10,022,001	7.21%
50% subscribed by Shareholders	17,377,337	18,710,670	13.46%
25% subscribed by Shareholders	26,066,005	27,399,338	19.71%
0% subscribed by Shareholders (i.e. Underwritten Securities only)	34,754,673	36,088,006	25.96%

Depending on the level of acceptances by Eligible Shareholders of their Entitlements, the level of acceptances by Eligible Shareholders of Shortfall Shares under the Shortfall Offer and the take up of Underwritten Securities by any sub-underwriters may result in the Underwriters voting power theoretically exceeding 20%. If this is the case, the Underwriter intends to rely on the exception to the prohibition under section 606 of the Corporations Act provided by item 13 of section 611 which is available to be relied upon for an acquisition that results from an issue of securities to a person as underwriter or sub-underwriter when:

- the issue is made under a disclosure document; and
- the effect of the acquisition on the person's voting power is disclosed in the disclosure document.

However, as noted in sections 1.12 and 1.12.1, the Underwriter has:

- received a sub-underwriting commitment of \$1,216,414 from Cumulus, representing a maximum of 17,377,336 Shares;
- received sub-underwriting commitments of an aggregate of \$104,130.02 from Ms Nicole Duncan and Mr Norm Taylor, representing a maximum of 1,487,572 Shares; and
- received sub-underwriting commitments from various additional unrelated parties and intends to seek additional sub-underwriters,

to assist with mitigating any potential control effects. Pursuant to the Underwriting Agreement, the Underwriter will ensure that no person will acquire, through participation in sub-underwriting the Entitlement Offer, a holding of Shares of, or increase their holding, to an amount in excess of 19.9% of all the Shares on issue on completion of the Entitlement Offer.

2.4 Measures the Board have taken to mitigate potential control issues

In accordance with Takeover Panel Guidance Note 17, the Company has implemented the following measures to mitigate any potential control effects as outlined in section 2.3 above:

- included a Shortfall Offer as a separate offer under this Prospectus, in order to reduce the number of Shares that are potentially issued to the Underwriter or any sub-underwriters (see section 1.3.1); and
- will ensure that no shareholder, through participation in the Entitlement Offer or the Shortfall Offer, breaches the takeover prohibition under section 606(1) of the Corporations Act.

2.5 Potential dilution to Shareholders

Shareholders should note that if they do not participate in the Entitlement Offer, their holdings are likely to be diluted. Examples of how the dilution may impact Shareholders (assuming no Shares are issued or convertible securities exercised or converted to Shares prior to the Record Date and no Shares are issued pursuant to the Placement) are set out in the table below.

Holder	Holding at Record Date	Voting power at Record Date	Entitlement under Entitlement Offer on 1 for 3 basis	Voting power on completion if Entitlement not taken up
Shareholder 1	10,000,000	9.59%	3,333,333	7.19%
Shareholder 2	5,000,000	4.80%	1,666,667	3.60%
Shareholder 3	1,000,000	0.96%	333,333	0.72%
Shareholder 4	500,000	0.48%	166,667	0.36%

Notes:

- 1 The dilutionary effect shown in the table is the maximum percentage on the assumption that those entitlements not accepted are fully taken up by the Underwriter and does not take into account any additional Shares that may be issued pursuant to the Placement.
- 2 Shareholders should be aware that their holdings will be diluted further to the extent any New Options, Underwriter Options or Lead Manager Options are exercised.

2.6 Financial position

Set out below is the reviewed statement of financial position at 31 December 2022 and an unaudited pro forma statement of financial position at 31 December 2022. The pro forma statement of financial position has been prepared on the basis and assumption that there have been no material movements in the assets and liabilities of the Company between 31 December 2022 and completion of the Entitlement Offer other than:

- the issue of 34,754,673 Shares under the Entitlement Offer, which will raise approximately \$2,432,827 in cash (before costs); and
- the estimated costs of \$186,841 under the Entitlement Offer, which is shown as a deduction against issued capital.

The historical and pro forma financial information is presented in an abbreviated form, and it does not include all of the disclosures required by Australian Accounting Standards applicable to annual financial statements.

3 Risk Factors

3.1 Overview

An investment in Securities offered under this Prospectus should be regarded as speculative. Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entities have implemented appropriate strategies, actions, systems and safeguards for known risks, however, some are outside its control.

The Company considers that the matters summarised in this section 3, which are not exhaustive, represent some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. Investors should carefully consider the following factors in addition to the other information presented in this Prospectus.

3.2 Specific risks

3.2.1 Exploration

Mineral exploration and development is considered a high risk activity. There is no guarantee that exploration of the Projects will result in the discovery of an economically viable resource. Even if an economically viable resource is discovered, there is no guarantee that the resource can be economically exploited.

Exploration of the Projects may be unsuccessful, resulting in a reduction of the value of those Projects, diminution in the cash reserves of the Company and possible relinquishment of such Projects.

3.2.2 Development

The business of exploration, project development and mining contains risks by its very nature. To prosper, it depends on the successful exploration and/or acquisition of reserves, design and construction of efficient production and processing facilities, competent operation and managerial performance and proficient marketing of the product. In particular, exploration is a speculative endeavour and force majeure circumstances, cost over runs and other unforeseen events can hamper mining operations.

3.2.3 Operations

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

Even though the Directors have between them significant mineral exploration and operational experience, no assurance can be given that the Company will achieve commercial viability through the successful exploration and/or mining of any of the tenements on the Projects. Until the Company is able to realise value from its Projects, it is likely to incur ongoing operating losses.

3.2.4 Future capital requirements

The Company currently has no operating revenue and is unlikely to generate any operational revenue unless the Projects are successfully developed and exploited. The future capital requirements of the Company will depend on many factors including its business development activities.

In addition, should the Company consider that its exploration results justify commencement of production on any of its Projects, additional funding will be required to implement the Company's development plans, the quantum of which remain unknown at the date of this Prospectus. The Company may seek to raise further funds through equity or debt financing, joint ventures, production sharing arrangements or other means. Any additional equity financing may be dilutive to Shareholders and may be undertaken at lower prices than the market price. Any debt financing, if available, may involve restrictions on financing and operating activities. There can be no assurance that additional finance will be available when needed.

Failure to obtain sufficient financing for the Company's activities and future projects may result in delay and indefinite postponement of exploration, development, or production on the Company's Projects or even loss of interest in the Projects.

3.2.5 Title

The Company's interests in the tenements which make up the Projects are subject to the relevant mining laws and regulations in Western Australia and cannot be guaranteed. Each of the tenements that make up the Projects carry annual expenditure and reporting requirements. There is therefore a risk that the Company could lose its interest in the tenements which make up the Projects for failing to meet the compliance requirements.

3.2.6 Access

The Company may require access agreements to be agreed and executed with respective landowners in order to perform work on a number of the Tenements. Inability to agree on an access agreement with a landowner on a Tenement may inhibit the Company's ability to execute its exploration program or delay the timing of the Company's exploration program. However, in the event that access is not obtainable at any particular location, the Company will redirect exploration expenditures to areas of the Project where access is available.

3.2.7 Commodity prices and exchange rates

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities may expose the potential income of the Company to commodity price and exchange rate risks. The price of base metals fluctuate and are affected by numerous factors beyond the control of the Company, such as industrial and retail supply and demand, exchange rates, inflation rates, changes in global economies, confidence in the global monetary system, forward sales of metals by producers and speculators as well as other global or regional political, social or economic events. Future serious price declines in the market values of minerals which the Company plans to explore for could cause the development of, and eventually the commercial production from, the Projects to be rendered uneconomic. Depending on the prices of commodities, the Company could be forced to discontinue production or development and may lose its interest in, or may be forced to sell, some of its properties. There is no assurance that, even as commercial quantities of base metals are produced, a profitable market will exist for it.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

3.2.8 Tenure

The tenements which make up the Company's projects are subject to the applicable mining acts and regulations in Western Australia, pursuant to which mining and exploration tenements are subject to periodic renewal. The renewal of the term of a granted tenement is also subject to the discretion of the relevant Minister. There is no guarantee that current or future tenements or future applications for production tenements will be approved. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements comprising the Projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

Prior to any development on any of its properties, the Company must receive licences/permits from appropriate governmental authorities. There is no certainty that the Company will hold all licences/permits necessary to develop or continue operating at any particular property.

The Company considers the likelihood of tenure forfeiture to be low given the laws and regulations governing exploration in Western Australia and the ongoing expenditure being budgeted by the Company. However, the consequences of forfeiture or involuntary surrender of a granted tenement for reasons beyond the control of the Company could be significant.

Similarly, the rights to mining exploration licences carry with them various obligations which the holder is required to comply with in order to ensure the continued good standing of the licence and, specifically, obligations in regard to minimum expenditure levels and responsibilities in respect of the environment and safety. Failure to observe these requirements could prejudice the right to maintain title to a given area and result in government action to forfeit a licence or licences. There is no guarantee that current or future exploration applications or existing licence renewals will be granted, that they will be granted without undue delay, or that the Company can economically comply with any conditions imposed on any granted exploration permits.

3.2.9 Native title and indigenous heritage

In relation to the Company's tenements or any other tenements in Australia that the Company may in the future acquire an interest in, there may be areas over which legitimate common law native rights may exist. If such native title rights do exist, the ability of the Company to gain access to such tenements (through obtaining consent of any relevant native title holders) or to progress from the exploration phase to the development and mining phase of operations may be adversely affected.

The introduction of new legislation, amendments to existing legislation and the decisions of courts relating to native title and heritage which impose constraints or more stringent requirements on the Company could adversely impact its assets, operation, and financial performance, either directly or indirectly. This may include, for example, the *Aboriginal Cultural Heritage Bill 2021 (WA)* introduced into the parliament of Western Australia, which proposes to replace the current *Aboriginal Heritage Act 1972 (WA)*.

3.2.10 Equipment availability

The Company's ability to undertake mining and exploration activities is dependent upon its ability to source appropriate contractors with access to relevant drilling and other exploration and mining equipment and a skilled workforce to safely operate such equipment. Equipment and labour are not always available and the market for exploration and mining equipment experiences fluctuations in supply and demand. If the Company is unable to source appropriate equipment or a skilled workforce to operate such equipment economically or at all then this may have an adverse impact on the timing and cost effectiveness of the Company's exploration program.

3.2.11 Third party contractors

It is the Company's intention to outsource a substantial part of its exploration activities to third party contractors. The Company is unable to predict the risk of insolvency or managerial failure of any of the third-party contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity. The effects of such failures may have an adverse effect on the Company's activities.

3.2.12 Resource estimates

Resource estimates are expressions of judgement by a qualified professional based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information become available or assumptions change. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate and require adjustment. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

3.2.13 Results of studies

Subject to the results of exploration and metallurgical test programs to be undertaken, the Company may progressively undertake a number of studies in relation to the Project. These studies may include scoping, pre-feasibility and definitive feasibility studies. Even if a study confirms the economic viability of the Project, there can be no guarantee that the Project will be successfully brought into production as assumed or within the estimated parameters in the feasibility study (e.g. mineral recoveries, operational costs and commodity prices) once production commences. Further, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds if required.

3.2.14 Royalties

Production of prescribed commodities from the Company's projects are subject to Western Australian State royalties. In the event that WA State royalties are increased in the future, the profitability and commercial viability of the Company's projects may be negatively impacted.

3.2.15 Jurisdiction

Adverse changes in government policies or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations, and mining and exploration activities of the Company. It is possible that the current system of exploration and mine permitting in Western Australia may change, resulting in impairment of rights and possible expropriation of the Company's properties without adequate compensation. If the Company was to extend its activities into jurisdictions other than Western Australia and Australia in the future, the risks described in this paragraph may be considerably increased.

3.2.16 Environment

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment in Western Australia. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Under the *Mining Rehabilitation Fund Act 2012* (WA), the Company may be required to provide assessment information to the Department of Mines, Industry Regulation and Safety in respect of a mining rehabilitation levy payable for mining tenements granted under the Mining Act. The Company is required to contribute annually to the mining rehabilitation fund established under the Act if its rehabilitation liability is above \$50,000.

3.2.17 Climate change

There are several climate-related factors that may affect the operations and proposed activities of the Company. One of the climate change risks particularly attributable to the Company is the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its potential future profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences.

Furthermore, climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

3.2.18 Third party contractors

It is the Company's intention to outsource a substantial part of its exploration activities to third party contractors. The Company is unable to predict the risk of insolvency or managerial failure of any of the third-party contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity. The effects of such failures may have an adverse effect on the Company's activities.

3.2.19 Potential acquisitions

The Company may pursue and assess other new business opportunities in the resources sector. These new business opportunities may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits, and/or direct equity participation.

The acquisition of projects (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is completed, the Directors will need to reassess at that time, the funding allocated to Projects and any new projects, which may result in the Company reallocating funds from other Projects and/or raising additional capital (if available). Furthermore, notwithstanding that an acquisition may proceed upon the completion of due diligence, the usual risks associated with the new project/business activities will remain.

3.2.20 Competition

The Company competes with other companies, including major mining companies in Australia and internationally. Some of these companies have greater financial resources than the Company and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Company can compete effectively with these Companies.

3.3 General Risks

3.3.1 Economic

General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's activities, as well as on its ability to fund those activities.

3.3.2 Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- general economic outlook;
- introduction of tax reform or other new legislation;
- interest rates and inflation rates;
- changes in investor sentiment toward particular industry sectors;
- the demand for, and supply of, capital;
- prevailing global commodity prices and the future outlook;
- fear of global pandemics; and

- terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company or its Directors or officers warrant the future performance of the Company or any return on an investment in the Company.

3.3.3 Security investments

Investors should be aware that there are risks associated with any securities investment. Securities listed on the stock market, and in particular securities of mining and exploration companies have experienced extreme price and volume fluctuations that have often been unrelated to the operating performances of such companies. These factors may materially affect the price of the Company's Securities, regardless of its performance or financial position.

3.3.4 Force majeure

Events may occur within or outside the markets in which the Company operates that could impact upon the global and Australian economies, the operations of the Company and the market price of its securities. These events include acts of terrorism, outbreaks of international hostilities, fires, global pandemics, floods, earthquakes, labour strikes, civil wars, natural disasters, outbreaks of disease, and other man-made or natural events or occurrences that can have an adverse effect on the demand for the Company's services and its ability to conduct business. Given the Company has only a limited ability to insure against some of these risks, its business, financial performance and operations may be materially adversely affected if any of the events described above occurs.

3.3.5 Government and regulatory

The Company's operating activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. The Company requires permits from regulatory authorities and stakeholders to authorise the Company's operations. These permits relate to exploration, development, production and rehabilitation activities.

While the Company believes that it is in substantial compliance with all material current laws and regulations affecting its activities, future changes in applicable laws, regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of existing permits and agreements applicable to the Company or its properties, which could have a material adverse impact on the Company's current operations or planned development projects.

Obtaining necessary permits can be a time consuming process and there is a risk that the Company will not obtain required permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a Project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the tenements which make up the Projects.

3.3.6 Litigation

The Company is exposed to possible litigation risks including native title claims, tenure and access disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute, particularly if proven, may impact adversely on the Company's operations, financial performance and financial position. As at the date of this Prospectus, there are no legal proceedings affecting the Company and the Directors are not aware of any legal proceedings pending or threatened against or affecting the Company.

3.3.7 Tax

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual circumstances of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation point of view and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability or responsibility with respect to the taxation consequences of applying for Securities under this Prospectus.

3.3.8 Coronavirus (COVID-19)

Global economic outlook is facing uncertainty due to the current COVID-19 pandemic, which has had and may continue to have a significant impact on capital markets and share prices. The Company's Share price may also be adversely affected by the economic uncertainty caused by COVID-19.

There is a risk that this uncertainty may continue for the foreseeable future, which could interrupt the Company's operations, its contractual obligations, cause disruptions to supply chains or interrupt the Company's ability to access capital. If any of these impacts appear material prior to close of the Offer, the Company will notify investors under a supplementary prospectus.

3.3.9 Global conflicts

The current conflict between Ukraine and Russia is impacting global economic markets. The nature and extent of the effect of the conflict on the performance of the Company remains unknown. The Company's Share price (and New Option price) may be adversely affected in the short to medium term by the economic uncertainty caused by it.

The Company will monitor the potential secondary and tertiary macroeconomic impacts of the unfolding events, including the changing pricing of commodity and energy markets and the potential of cyber activity impacting governments and businesses. Further, any governmental or industry measures taken in response to the conflict, including limitations on travel and changes to import or export restrictions and arrangements involving Russia, may adversely impact the Company's operations and are likely to be beyond the control of the Company.

The Company is monitoring the situation closely and considers the impact of the conflict on the Company's business and financial performance to, at this stage, be limited. However, the situation is continually evolving, and may ultimately result in other geopolitical tensions or conflicts, making the potential consequences on the Company and its prospects inherently uncertain.

3.3.10 Unforeseen expenses

The Company may experience significant unforeseen expenses associated with unforeseen events such as legal actions, damage to equipment, labour strikes or force majeure events. It is anticipated that the Company will have adequate working capital to carry out its stated objectives however there is a risk that additional funds may be required should any significant unforeseen events or expenses arise.

3.4 Other Risks

This list of risk factors above is not an exhaustive list of the risks faced by the Company or by investors in the Company. The risk factors described in this section as well as risk factors not specifically referred to above may in the future materially affect the financial performance of the Company and the value of its Shares. Therefore, the Securities offered under this Prospectus carry no guarantee with respect to the payment of dividends, return of capital or their market value.

6.7 Rights and liabilities attaching to Shares

6.7.1 Overview

A summary of the rights and liabilities attaching to Shares is set out below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to the Shares in any specific circumstances, the Shareholder should seek legal advice.

6.7.2 Voting rights

At a general meeting of the Company upon a poll, every member present in person, or by proxy, attorney or representative has one vote for every fully paid up Share held by them. In the case of a partly paid share, a fraction of a vote equivalent to the proportion which the amount paid up on that member's share bears to the total amounts paid and payable (excluding amounts credited) on that share.

6.7.3 Dividends

Subject to the Corporations Act, and the terms of issue or rights of any shares with special rights to dividends, the Directors may determine or declare that a dividend is payable, fix the amount and the time for payment and authorise the payment or crediting by the Company to, or at the direction of, each Shareholder entitled to that dividend.

Interest is not payable by the Company on a dividend.

All dividends are to be paid apportioned and paid proportionately to the amounts paid on the shares during any portion or portions of the period for which the dividend is paid, but, if any share is issued on terms providing that it will rank for dividend as from a particular date, that share ranks for dividend accordingly.

The Directors may deduct from any dividend payable to, or at the direction of, a Shareholder any sums presently payable by that Shareholder to the Company on account of calls or otherwise in relation to shares in the Company.

6.7.4 Winding up

If the Company is wound up, the liquidator may, with the sanction of a special resolution of the Company, divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set such value as the liquidator considers fair on any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

6.7.5 Issue of Shares

The issue of Shares in the Company is under the control of the Directors who may issue, allot and cancel or otherwise dispose of Shares in the Company, grant options over unissued Shares in the Company, reclassify or convert Shares and settle the manner in which fractions of a Share, however arising, are to be dealt with, subject to the Corporations Act, the Listing Rules and any special rights conferred on the holders of any shares or class of shares.

6.7.6 Variation of rights

The rights attached to any class of Shares may, unless their terms of issue state otherwise, be varied:

- with the written consent of the holders of 75% of the Shares of the class; or
- by a special resolution passed at a separate meeting of the holders of Shares of the class.

6.7.7 Transfer of Shares

Subject to the Company's Constitution, the Corporations Act or any other applicable laws of Australia and the Listing Rules, the Shares are freely transferable. The Directors may refuse to register a transfer of Shares only in limited circumstances, such as where the Listing Rules require or permit the Company to do so.

6.7.8 Notice and meetings

Each shareholder is entitled to receive notice of, and to attend and vote at, annual general meetings of the Company and to receive all notices, accounts and other documents required to be furnished to shareholders under the Company's Constitution, the Corporations Act and Listing Rules.

6.7.9 Sale of non-marketable holdings

The Company may take steps in respect of non-marketable holdings of Shares in the Company to effect an orderly sale of those Shares by giving notice to the relevant holders and in the event that holders do not take steps to retain their holdings.

The Company may only take steps to eliminate non-marketable holdings in accordance with the Constitution and the Listing Rules.

6.7.10 Alteration of Constitution

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

6.7.11 Shareholder liability

As Shares are fully paid shares, they are not subject to any calls for money by the Company and will therefore not become liable for forfeiture.
