Record Quarterly Production at Chatree

Kingsgate Consolidated Limited (ASX:KCN) ("Kingsgate" or "the Company") is pleased to advise that the quarter ending 30 September 2025 was the strongest quarter of production at the Chatree Gold Mine since restart. A total of **23,922 ounces of gold** and **205,841 ounces of silver** were produced, representing an **~18% increase** in gold production compared to the previous quarter.

Total cash, bullion and doré for the quarter totalled **A$115m**, representing a **~36% increase** from the June 2025 quarter[1].

Kingsgate's Managing Director and CEO, Jamie Gibson said; "This outstanding result reflects the continued ramp-up at Chatree, driven by consistently high plant throughput and elevated grade in the western side of A pit. While we expect typical variation in quarterly production during FY26, we are now beginning to see the real potential of Chatree as we unlock further efficiencies and build momentum."

Further details will be provided in the September 2025 Quarterly Report, which is scheduled for release later this month.
