# Disclaimer

This presentation has been prepared by Stellar Resources Limited (ASX: SRZ) (SRZ or the Company). It contains general information about the Company's activities current as at the date of the presentation. The information is provided in summary form and does not purport to be complete. This presentation is not to be distributed (nor taken to have been distributed) to any persons in any jurisdictions to whom an offer or solicitation to buy shares in the Company would be unlawful. Any recipient of the presentation should observe any such restrictions on the distribution of this presentation and warrants to the Company that the receipt of the presentation is not unlawful. It should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation or any information, opinions or conclusions expressed in the course of this presentation. This presentation is not a prospectus, product disclosure document or other offering document under Australian law or under any other law. It has been prepared for information purposes only and is not a recommendation as to whether to invest in SRZ shares. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. Unless otherwise specified, data and tables set out in this presentation are based on SRZ management estimates.

This presentation does not include all available information on SRZ, and any potential investor should also refer to SRZ's Annual Reports and ASX releases and take independent professional advice before considering investing in SRZ. For more information about Stellar Resources Limited, visit the website at [www.stellarresources.com.au](http://www.stellarresources.com.au).

The Company confirms that it is not aware of any new information or data that materially affects the information contained in this presentation and, in the case of mineral resource estimates announced on 4 September 2023, all material assumptions and technical parameters underpinning the estimates included in this presentation continue to apply and have not materially changed. The Company confirms that all the material assumptions underpinning the production target, and all forecast financial information derived from the production target made in the Company's 3 September 2024 ASX Announcement "Updated Heemskirk Tin Scoping Study" and included in this presentation continue to apply and have not materially changed.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of SRZ or its directors, or any of their employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, projections, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies. Past performance is no guarantee of future performance.

This presentation may contain "forward-looking statements" within the meaning of securities laws of applicable jurisdictions. Forward-looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "believe", "continue", "objectives", "outlook", "guidance" or other similar words, and include statements regarding certain plans, strategies and objectives of management and expected financial performance.

These forward-looking statements involve known and unknown risks, uncertainties and other factors, many of which are outside the control of SRZ and any of its officers, employees, agents or associates. Actual results, performance or achievements may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. Readers are cautioned not to place undue reliance on forward-looking statements and SRZ assumes no obligation to update such information.

# Cautionary Statement

## Scoping Study Parameters

The Scoping Study referred to in this announcement has been undertaken for the purpose of ascertaining whether a business case can be made to proceed to more definitive studies on the viability of the Heemskirk Tin Project. It is a preliminary technical and economic study of the potential viability of project and is based on low level technical and economic assessments that are not sufficient to support the estimation of ore reserves. Further exploration and evaluation work and appropriate studies are required before Stellar will be in a position to estimate any ore reserves or to provide any assurance of an economic development case.

The Scoping Study referred to in this announcement has been undertaken to determine the potential viability of the Heemskirk Project comprising a tin mine and processing plant constructed in Tasmania, Australia, and to reach a decision to proceed with more definitive studies. The Study for the Project has been prepared to an intended accuracy level of  $\pm 35\%$ . The results should not be considered a profit forecast or production forecast.

The Scoping Study is a preliminary technical and economic study of the potential viability of the Project. In accordance with the ASX Listing Rules, the Company advises it is based on low-level technical and economic assessments that are not sufficient to support the estimation of Ore Reserves. Further evaluation work including infill drilling and appropriate studies are required before Stellar will be able to estimate any Ore Reserves or to provide any assurance of an economic development case.

Approximately 97% of the total production targets are in the Indicated Mineral Resource category with 3% in the Inferred Mineral Resource category. 97% of the production target in the first 12 years is in the Indicated Mineral Resource category. The Company has concluded that it has reasonable grounds for disclosing a production target which includes an amount of Inferred Mineral Resource. However, there is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work (including infill drilling) on the Heemskirk Project will result in the determination of additional Indicated Mineral Resources or that the production target itself will be realized.

The Scoping Study is based on the material assumptions outlined elsewhere in this announcement. These include assumptions about the availability of funding. While Stellar considers all the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the Scoping Study will be achieved.

To achieve the range outcomes indicated in the Scoping Study, additional funding will likely be required. Investors should note that there is no certainty that Stellar will be able to raise funding when needed. It is also possible that such funding may only be available on terms that dilute or otherwise affect the value of Stellar's existing shares. It is also possible that Stellar could pursue other 'value realisation' strategies such as sale, partial sale, or joint venture of the Project. If it does, this could materially reduce Stellar's proportionate ownership of the Project.

The Company has concluded it has a reasonable basis for providing the forward-looking statements included in this announcement and believes that it has a reasonable basis to expect it will be able to fund the development of the Project. Given the uncertainties involved, investors should not make any investment decisions based solely on the results of the Scoping Study.

# Heemskirk is the highest-grade undeveloped tin project in Australia and third highest globally

-  **Potential to rank as a top 10 global producer\*** and the second largest in Australia
-  **Stable tier-1 jurisdiction**, strong mining history, significant processing capacity and infrastructure, 100% renewable energy
-  **Project economics poised for significant growth through PFS** via resource expansion, increased mining and processing rates plus ore sorting
-  **Unencumbered offtake** against a backdrop of falling supply
-  **Robust balance sheet** with A\$6.7m in cash at 30 September 2025
-  Focused on the aim of becoming a material **standalone producer of 3,000 – 3,500 tpa** of payable tin (~1% global production\*)

*Cautionary Statement - This is an aspirational statement and SRZ does not have reasonable grounds to believe the statement can be achieved*

TAYLOR COLLISON

## Board

### Mark Connelly | NON-EXECUTIVE CHAIR

Corporate executive with over 35 years in mining and a wealth of leadership experience in the resources sector. Mr Connelly has an outstanding track record for deal making and was responsible for the USD\$570M merger of Papillon Resources and B2 Gold Corp in Oct 2014, as well as the key person responsible for the USD\$597M merger of Adamus Resources Limited and Endeavour Mining in Sep 2011.

### Simon Taylor | MANAGING DIRECTOR AND CEO

Resource executive with over 30 years' experience including technical, CEO and Board roles. Former Managing Director of Oklo Resources prior to takeover by B2Gold Corp. Sept 2022 and Non-Exec Director of Chesser Resources prior to takeover by Fortuna Mining Corp Sept 2023.

### Andrew Boyd | EXECUTIVE DIRECTOR

Geophysicist with over 25 years of exploration and mining experience, including General Manager Geoscience with ASX Companies Oklo Resources and Papillon Resources, acquired by B2Gold in 2022 and 2014 for ~\$90M and ~\$A570M respectively, and Mantra Resources, acquired by ARMZ in 2011 for ~\$1Bn.

### Simon O'Loughlin | NON-EXECUTIVE DIRECTOR

Founder of O'Loughlins Lawyers, an Adelaide based specialist commercial law firm. Extensive Experience of equity capital markets, ASX and ASIC rules. Has held many Non-Exec Directorships on ASX listed companies.

# Differentiated Growth on a Global Scale

Path to becoming a global top 10 tin producer

**Tier 1  
Jurisdiction**

**Mining Licence  
granted**

Stable production is rare in this industry; **100% of Heemskirk product offtake currently unencumbered**

Potential to be a **top 5 producer of tin concentrate outside of Asia and Africa**

## Tin concentrate producers ranked by 2024 tin output (tonnes)

# Heemskirk Tin Project

Strategic location with development optionality

Ideal location to be developing  
Australia's next tin mine

- ★ **World class fertile metal province** → Over 100 years of mining with significant production of Tin, Lead, Silver, Nickel and Gold.
- ★ **Major underground operating mines** → Renison, Rosebery, Henty and processing infrastructure nearby
- ★ **Growth potential** → Renison's 4.0Mt tin reserve in 1968 supported a 5-year LOM and still mining today.
- ★ **'Green tin' potential** → 5 Hydro power stations and Granville Harbour wind farm within 30km
- ★ **Latent infrastructure** → Exclusive MOU's<sup>2</sup> on adjacent Avebury Plant & Comstock site
- ★ **Strong community and regulatory support** → Engaged with MRT, EPA and West Coast Council, positive support and feedback

<sup>1</sup> 2025 International Tin Association. All rights reserved.

<sup>2</sup> SRZ ASX Announcements 3 December 2024, 14<sup>th</sup> July 2025 & 25 August 2025 – MOU's Comstock and Avebury

<sup>3</sup> MMG Limited – December 2024 Quarter Production Report

<sup>4</sup> CYL ASX Announcement – December 2024 Quarter update

# Development Options

Targeting reductions in cost, time and environmental impact

## Evaluating nearby infrastructure as part of PFS

- ★ **Avebury Plant** in care and maintenance
  - ★ **<10km** on sealed bitumen from Heemskirk
  - ★ **Nameplate production capacity 900ktpa**
  - ★ Tailings storage facilities (TSF) potential and environmental advantages
- ★ **Comstock Mine Site** closed in 1990's
  - ★ **<4km** on sealed bitumen from Heemskirk
  - ★ TSF potential and environmental advantages
- ★ Both sites are under non-binding MOU

Refer to ASX Announcements:

- Comstock - 3 December 2024 - MOU Signed on Nearby Infrastructure at Heemskirk & 14 July 2025 – Stellar Signs MOU Extension on Adjacent Mine Infrastructure
- Avebury - 25 August 2025 - Stellar Signs MOU on Avebury Plant and Mine Infrastructure

# Heemskirk Mineral Resource

Highest grade undeveloped project in Australia with clear scope for resource growth

## High Grade

High-grade zones defined  
in all deposits

Low footprint  
underground mining

## Attractive metallurgy

97% tin contained  
in cassiterite

Highly amenable to  
conventional processing

## Resource upside

Deposits open at depth  
and along strike

Resource upgrade  
targeted 2H 2025

## Advanced permitting

Project is on  
a granted ML

Simplifying regulatory  
approvals pathway

## Global tin development projects (Measured, Indicated and Inferred)<sup>2</sup>

## Heemskirk Mineral Resource<sup>1</sup>

| Category     | Tonnage (Mt) | Grade Sn (%) | Contained Sn (kt) |
|--------------|--------------|--------------|-------------------|
| Indicated    | 3.5          | 1.05%        | 37.0              |
| Inferred     | 4.0          | 1.03%        | 40.9              |
| <b>Total</b> | <b>7.5</b>   | <b>1.04%</b> | <b>77.9</b>       |

<sup>1</sup> Reported at a cutoff grade of 0.6% Sn, refer to ASX Announcement 4 September 2023 – Heemskirk Tin Project MRE Update. <sup>2</sup> Refer to appendix 3 for peer company tin project benchmark assumptions

# Scoping Study – The Base Case...

Expanded PFS expected to materially improve economics and development optionality

## Proposed Heemskirk Tin Processing Plant

## 2024 Base Case (pre-tax) ~1,900 tpa payable tin

|                                                 |              |
|-------------------------------------------------|--------------|
| Initial Mine Life                               | 12 year      |
| Average Annual Production                       | 350kt        |
| LOM Tin in Concentrate                          | +22kt        |
| Capex                                           | A\$71M       |
| Total Ore Mined Indicated Category <sup>1</sup> | 97%          |
| AISC (LOM) to Sold Product <sup>2</sup>         | US\$18,260/t |

|                     | Base Case  | Spot Price |
|---------------------|------------|------------|
| Tin Price per tonne | US\$28,000 | US\$36,000 |
| NPV <sub>8%</sub>   | A\$122M    | A\$259M    |
| IRR                 | 33%        | 59%        |

Refer to: ASX Announcement 3 September 2024 - Updated Heemskirk Tin Scoping Study

1 – Mining schedules utilised Indicated Resource material and only incorporated Inferred material when encountered as part of development

2 - All in Sustaining Costs (AISC) includes mining, processing, concentrate transport and smelting, sustaining capital and royalties

# Resource Upgrade – Drilling Underway

Growth and high-grade tin potential

Refer to ASX Announcement 4 September 2023 – Heemskirk Tin Project MRE Update.

# Mineral Resource Driving Upside Potential

## Increase in mining inventory

Scoping Study used indicated resource only, **upside** into Prefeasibility Study

- ↑ Increase Indicated Resource through drilling, allows an:
- ↑ Increase in mining inventory
- ↑ Increase in mining rate up to 750,000 tpa, as confirmed in Scoping Study

**Mineral Resource update targeted for 2H 2025**

Refer to: ASX Announcement, 3 September 2024, Updated Heemskirk Tin Scoping Study Confirms Attractive Economics  
 1 – Mining schedules utilised Indicated Resource material and only incorporated Inferred material when encountered as part of development  
 2 - All in Sustaining Costs (AISC) includes mining, processing, concentrate transport and smelting, sustaining capital and royalties

## Conceptual Mine Plan

# Resource Upgrade – Drilling Success

## Queen Hill deposit – growth and high-grade tin potential

- ★ Drilling delivers high-grade results outside the Indicated Category
- ★ Extensions at depth confirmed and open

Refer to SRZ ASX Announcements:  
 19 November 2024 – Record High-Grade Tin Intersection From Severn Deposit at Heemskirk  
 11 February 2025 – Outstanding Wide High-Grade Tin Intersection  
 5 May 2025 - High Grade Tin Intercepts at Queen Hill Confirm Heemskirk Resource Extension Potential

# Resource Upgrade – Drilling Success

Severn deposit – growth and high-grade tin potential

Drill Hole Cross Section, drill hole ZS166, Indicated and Inferred resource blocks from the 2023 MRE

Severn Long Section looking west showing Sept 2023 Severn Mineral Resource as projected total of the multiple mineralised resource zones and drillhole pierce points coloured by Sn% x Thickness (historic holes & SRZ holes shown). GDA Z55

# Resource Upgrade – Drilling Success

Severn deposit – growth and high-grade tin potential

Drillhole Cross Section, new drillholes ZS187 and ZQ182, Indicated and Inferred Resource blocks from the 2023 MRE.

Severn Long Section looking west showing Sept 2023 Severn Mineral Resource as projected total of the multiple mineralised resource zones and drillhole pierce points coloured by Sn% x Thickness (historic holes & SRZ holes shown). GDA Z55

# Resource Upgrade – Drilling Success

Severn deposit – growth and high-grade tin potential

Drillhole Cross Section, drillholes ZS187, ZS187W1B and ZS187W1C, Indicated and Inferred Resource blocks from the 2023 MRE.

Severn Long Section looking west showing Sept 2023 Severn Mineral Resource as projected total of the multiple mineralised resource zones and drillhole pierce points coloured by Sn% x Thickness (historic holes & SRZ holes shown). GDA Z55

Refer to ASX Announcements:

4 September 2023 – Heemskirk Tin Project MRE Update, 19 November 2024 – Record High-Grade Tin Intersection From Severn Deposit at Heemskirk, 28 August 2025 – 64m Tin Intercept at Severn Signals Heemskirk Growth and 14 October 2025 - First Wedge Hole at Severn Returns High-Grade Tin

# Ore Sorting – Excellent Results Across Severn Deposit

Ore Sorting XRT Flow Sheet

★ High-grade product generated:

- Head grade increased to 1.65% Sn from 0.70% Sn average (2.4 x uplift)
- 84.7% Sn recovery achieved
- 64.2% of the mass rejected

★ Optimised product generated:

- Feed grade increased to 0.97% Sn (1.4 x uplift)
- 96.0% recovery achieved
- 28.9% mass rejected

# Ore Sorting – Strong Large-Scale Results at Queen Hill

Waste

Product

High-grade product generated:

- **Head grade increased to 1.50% Sn** from 0.91% Sn average (**1.6 x uplift**)
- **82.4% Sn recovery achieved**
- **50.0% mass rejected**

Optimised product generated:

- **Feed grade increased to 1.13% Sn** (1.2 x uplift)
- **97.2% recovery achieved**
- **21.2% mass rejected**

# Ore Sorting – Major Economic Benefits

Waste

Product

- ★ Reduce **plant capital costs** and **optimise size**
- ★ Lower **operating and processing costs**
- ★ Reduce **tailings volumes**
- ★ Produce **coarse backfill material** for underground mining
- ★ Improved **grade blending** strategies across mine life

# Global Tin Supply Falling

Unencumbered offtake in a tier 1 jurisdiction  
(Australia) likely to be highly sought after

## 2024 Tin Concentrate Production Percentage

## 2024 Tin Production

Tin Concentrate Total

↓ **279,067\* tonnes**  
-4.36% down from 2023

Refined Tin Total

↓ **371,232 tonnes**  
-0.57%, flat from 2023

Tin production is declining in existing mines due to diminishing reserves and lower grades, contributing to a 24.8% shortfall between concentrate and refined tin production in 2024.

Global growth in demand from electrification, electronics and semiconductors to support rising tin market deficits

**Minimal investment in tin exploration** results in limited viable projects to fill forecast tin deficit.

# LME Spot Tin Price and Stock Levels

# East Renison Project

- ★ Adjoins the Renison Tin Mine mining lease<sup>1</sup> and **covers the interpreted continuation of the Federal-Bassett and Montezuma Faults.**
- ★ These faults are main conduits for hydrothermal fluids that play an important part in the localisation of significant mineralisation in the district.
- ★ **Historical rock chip sampling** has defined a **~3x3km mineralised zone** containing high levels of tin, antimony, gold, silver, copper, bismuth, zinc and lead.
- ★ EDGI co-funding awarded to test **Carbine Hill Target**

## Selected Historic rock chip sample highlights<sup>1</sup>

| Mineral                    | Sample Results |          |          |
|----------------------------|----------------|----------|----------|
| Tin (Sn)                   | 2.24%          | 1.49%    | 1.34%    |
| Antimony (Sb)              | 15.5%          | 11.1%    | 6.1%     |
| Silver (Ag)                | 7,751g/t       | 4,660g/t | 3,370g/t |
| Gold (Au)                  | 0.9g/t         | 0.8g/t   | 0.6g/t   |
| Bismuth (Bi)               | 2.0%           | 1.6%     | 1.5%     |
| Base Metals (Cu + Zn + Pb) | 49.7%          | 37.5%    | 35.1%    |

# New Acquisition - Granite Tor Project

Strategic location with development optionality

Consolidates Stellar's land holding in Tasmania's World Class Tin Province

- ★ Acquired Granite Tor Project
- ★ \$35k cash and 6m shares (escrowed 12 months) plus 2m shares on milestone of drillhole intersecting 2m @ 1.0% Sn
- ★ Tin potential – Stream sediment sampling has returned up to 8.1% Sn with follow up soil sampling delineating a 4km long >100 ppm Sn anomaly untested by drilling.
- ★ REE potential - Stream and soil sampling results indicate potential for REE mineralisation returning up to 9.5% Ce.
- ★ Large Exploration holding of 156km<sup>2</sup> through combined East Renison and Granite Tor Projects

<sup>1</sup> ASX Announcement 2 October 2025 – Project Acquired in World Class Tin Province, Tasmania

# Heemskirk Tin Project

## Development pathway

| De-risking delivered in the last 18 months                                   |   |
|------------------------------------------------------------------------------|---|
| Reconfigured Board to drive transitional strategy from explorer to developer | ✓ |
| Successfully raised \$13.2m. Fully funded to advance development strategy    | ✓ |
| Reinitiated Baseline Studies                                                 | ✓ |
| 9,500m resource extension & PFS drilling program                             | ✓ |
| Scoping Study refresh with Sept 23 MRE completed                             | ✓ |
| Geophysics & detailed geological modelling underway                          | ✓ |
| Ore Sorting, early PFS workstream                                            | ✓ |
| Key Upcoming Catalysts                                                       |   |
| Results from extended 2,500m PFS drill program                               |   |
| Ongoing Ore Sorting and Metallurgical testwork                               |   |
| Updated Mineral Resource Estimate 2H 2025                                    |   |
| Decision on nearby infrastructure via MOU's                                  |   |
| Completed Pre-Feasibility Study 1H 2026                                      |   |
| Decision to proceed DFS                                                      |   |

# Heemskirk is the highest-grade undeveloped tin project in Australia and third highest globally

- 
**Potential to rank as a top 10 global producer\*** and the second largest in Australia
- 
**Stable tier-1 jurisdiction**, strong mining history, significant processing capacity and infrastructure, 100% renewable energy
- 
**Project economics poised for significant growth through PFS** via resource expansion, increased mining and processing rates plus ore sorting
- 
**Unencumbered offtake** against a backdrop of falling supply
- 
**Robust balance sheet** with A\$6.7m in cash at 30 September 2025
- 
**Focused on the aim of becoming a material standalone producer of 3,000 – 3,500 tpa of payable tin** (~1% global production\*)

*Cautionary Statement - This is an aspirational statement and SRZ does not have reasonable grounds to believe the statement can be achieved*

# North Scamander

## High-grade discovery

- ★ Located in the Scamander Mineral Field in Northeast Tasmania.
- ★ Numerous high-priority drill ready targets including North Scamander and Pinnacles.
- ★ Stream sediment and soil Geochem returned significant rock-chip results up to 1.1% tin.
- ★ Outcropping mineralised gossan and a coincidental regional magnetic anomaly.
- ★ Drilling in 2023 made a significant new high-grade polymetallic discovery.

Massive Vein Mineralisation in NSD005 Core from 160.0m to 160.5m

# North Scamander Project

## High-grade discovery

- ★ Exploration drill hole (NSD005) returned a significant new high-grade Ag-Sn-Zn-Pb-In polymetallic discovery.
- ★ **32.0m @ 141 g/t Ag, 0.34% Sn, 3.8% Zn, 2.0% Pb, 77 g/t In, 19 g/t Ga** from 130.0m inc.
  - **5.0m @ 495 g/t Ag, 1.04% Sn, 5.2% Zn, 7.1% Pb, 113 g/t In, 23 g/t Ga** from 130.0m and
  - **1.4m @ 353 g/t Ag, 2.29% Sn, 14.2% Zn, 8.8% Pb, 594 g/t In, 29 g/t Ga** from 159.7m
- ★ Results include up to; **1,035 g/t Ag, 5.75% Sn, 27.6% Zn, 21.2% Pb, 1,070 g/t In** and **37 g/t Ga**.
- ★ Downhole electromagnetic (DHEM) survey completed in Oct 23 has identified multiple downhole conductors in discovery hole NSD005.

## Summary of Technical and Financial Parameters

|                              | Unit        | Total LOM |
|------------------------------|-------------|-----------|
| Ore Production               | (kt)        | 3,894     |
| Sn Grade (LOM Ave)           | (%)         | 0.78      |
| Tin Recovery (LOM Ave)       | (%)         | 75        |
| Tin Produced                 | (Tonnes)    | 22,818    |
| Mine Life                    | (Yrs)       | 12        |
|                              |             |           |
| Tin Price                    | (US\$/t)    | 28,000    |
| Exchange rate                | USD:AUD     | 0.67      |
| Tin Price                    | (A\$/t)     | 41,791    |
|                              |             |           |
| Gross Revenue                | (A\$M)      | 877       |
| Total Operating Costs (AISC) | (A\$M)      | 489       |
| Total Operating Costs (AISC) | (US\$/t Sn) | 18,260    |
| Operating Cash Flow          | (A\$M)      | 389       |
| Operating Margin             | (%)         | 44%       |
|                              |             |           |
| Capital Cost                 | (A\$M)      | 71        |
| Net Cash Flow (Pre-Tax)      | (A\$M)      | 267       |
| Pre-Tax NPV <sub>8%</sub>    | (A\$M)      | 122       |
| Post-Tax NPV <sub>8%</sub>   | (A\$M)      | 75        |
| IRR (Pre-Tax)                | (%)         | 33        |
| Payback Period               | (Yrs)       | 3.5       |
| Pre-Tax NPV / Capex          |             | 1.7       |

## Capital Cost Summary

|                                       | (A\$M)    | (US\$M)   |
|---------------------------------------|-----------|-----------|
| Mining                                | 11        | 7         |
| Processing & Surface Infrastructure   | 40        | 27        |
| Tailings                              | 6         | 4         |
| Working Capital                       | 12        | 8         |
| Contingency                           | 2         | 1         |
| <b>Total Development Capital Cost</b> | <b>71</b> | <b>48</b> |

## Tin Price Sensitivity

|              | Tin Price (US\$/t Sn) |        |        |        |        |
|--------------|-----------------------|--------|--------|--------|--------|
|              | 26,000                | 28,000 | 30,000 | 32,000 | 34,000 |
| NPV Pre Tax  | 87                    | 122    | 156    | 190    | 225    |
| IRR Pre Tax  | 26%                   | 33%    | 39%    | 46%    | 52%    |
| NPV Post Tax | 51                    | 75     | 99     | 123    | 147    |
| IRR Post Tax | 20%                   | 26%    | 31%    | 36%    | 41%    |
| Payback      | 4.25                  | 3.50   | 3.00   | 2.75   | 2.50   |

## Average Head Grade, Recovery and Concentrate Grade by Deposit

| Parameter  | Unit | Upper      | Lower      | Severn | LOM      |
|------------|------|------------|------------|--------|----------|
|            |      | Queen Hill | Queen Hill |        | Schedule |
| Head Grade | % Sn | 0.99%      | 1.04%      | 0.71%  | 0.78%    |
| Recovery   | %    | 53%        | 66%        | 80%    | 75%      |
| Conc Grade | % Sn | 48%        | 48%        | 49%    | 49%      |

## Operating Costs Summary

|                                                  | Total LOM (A\$M) | Annual Ave (A\$M) | A\$/t Ore  | A\$/t Sn      | US\$/t Sn     |
|--------------------------------------------------|------------------|-------------------|------------|---------------|---------------|

# Appendix 2 – Heemskirk Mineral Resource Estimate

September 2023

## Large high-grade tin resource.

7.48Mt @ 1.04% Sn  
77.87kt contained tin

## 47% of MRE defined in Indicated category.

36.99kt of contained tin

## High-grade zones defined in all deposits.

Mine plan accessing higher-grade Queen Hill first

## St Dizier Satellite Tin Project

1.20Mt @ 0.69% Sn  
Indicated MRE

| Classification | Deposit               | Resource Date | Tonnes (Mt) | Sn (%) | Contained Sn (t) | Cassiterite % of Total Sn (%) | Cu (%) | Pb (%) | Zn (%) |

## 1,2 Cautionary Statement

In the peer resources disclosed in table above:

Footnoted item 1 was reported by the relevant company under the Canadian NI 43-101 and is a qualifying foreign estimate of mineralisation.

Footnoted items 2

- the data are not reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (referred to as the "JORC Code (2012)");
- a Competent Person has not done sufficient work to classify the historical estimates or foreign estimates as Mineral Resources or Ore Reserves in accordance with the JORC Code (2012); and
- it is uncertain that following evaluation if the historical estimates or foreign estimates will be able to be reported as Mineral Resources or Ore Reserves in accordance with the JORC Code (2012).

Mr Andrew Boyd (BSc), a Competent Person, who is an Executive Director of Stellar Resources, and a member of the Australasian Institute of Geologists, has considered the information for the foreign estimates of mineralisation for the peer resources disclosed in the table above and considers that the information disclosed is an accurate representation of the available data for the peer resource.

Mr Boyd consents to the inclusion in this Study of the matters based on this information in the form and context which it appears, with relevant links provided for each resource embedded as a hyperlink.
