COMMENCEMENT OF TARGET DRILLING

Okavango Copper Project

Cobre Limited (ASX: **CBE**, **Cobre** or the **Company**) is pleased to announce that diamond drilling of targets on the Okavango Copper Project (**OCP**) in the Botswana Kalahari Copperbelt (**KCB**) has now commenced. The **OCP** targets similar copper-silver deposits to those identified in neighbouring MMG's tenements with the current programme testing prospective mineralised contact along strike from the Zone 5, Zone5N, Zone6, Zeta and Boseto/Plutus deposits¹ (see **Figure 1** and **Figure 2**).

The drill programme forms part of an initial A\$1.5m investment by Sinomine International Exploration (Hong Kong) Co., Limited (**Sinomine**) (see *ASX announcements of 2 September and 23 October 2025*) and includes up to 8 initial holes designed to target extensions to anomalous mineralisation identified in the 2024 drill campaign (see *ASX announcement 13 August 2024*²) as well as new contacts.

We look forward to updating the market with results as the programme continues.

Geology, Mineralisation and Exploration Target

The OCP covers 1,363km² of prospective KCB stratigraphy located immediately northeast of MMG's Zone 5 production hub and surrounding deposits. Mineralisation in the KCB is sediment-hosted and structurally controlled, with Cu-Ag mineralisation occurring along the redox contact between the oxidised basal units of the volcano-sedimentary Kgwebe, clastic sedimentary red bed units of the Kuke and Ngwako Pan Formations (**NPF**) and reduced D'Kar Formation (**DKF**) marine sedimentary rocks. The target redox contact sub-crops along a series of moderately dipping anticline limbs (totalling over 186 km of prospective DKF/NPF contact position, across 3 fold structures along strike from MMG's Plutus,

¹ References to MMG's projects are only included to demonstrate part of the Company's rationale for the exploration strategy outlined in the Company's announcements and are not intended to suggest that the Company will have a similar level of exploration success.

² See the announcement for full exploration results including a competent person statement and relevant JORC table information.

Selene, Zeta, Zone 6, Zone 5 North, Zone 5 & Banana Peel deposits illustrated in **Figure 2)** under Kalahari Group cover which varies in thickness from approximately 70m on the western side of the project to greater than 150m in the far east of the project. Previous drill data has been combined with high resolution magnetic, airborne electromagnetic and ground gravity data in order to prioritise portions of the prospective mineralised contact for follow-on work.

Figure 1. Locality map illustrating the position of Cobre's project areas. The Okavango Project, the subject of the current announcement, has been highlighted.

Figure 2. Planned diamond drilling for the current campaign with target contacts and previous drill programmes highlighted. The prospective contact has been classified by exploration success.

About Cobre Limited

Cobre is a copper exploration and development company with a focus on the KCB in Botswana, one of the most prospective areas globally for new sedimentary copper discoveries. To maximise value on its large-scale strategic landholding, Cobre has adopted a three-pronged approach to exploration and development in the KCB:

- **Explore Big.** Identify the next tier 1 deposit through BHP Earn-in to Joint Venture on its Kitlanya Basin margin projects;
- **Strategic Target Drilling.** Potential for high-value short term discoveries on its Okavango project located adjacent to MMG's Zone 5 Development and associated projects; and
- **Development Potential:** Advance the ISCR development opportunity on its most advanced Ngami project.

About Sinomine

Sinomine is a global Chinese resource group founded in 1999 and publicly listed on the Shenzhen Stock Exchange. The company has expanded significantly, with operations in over 40 countries. Sinomine is a key player in securing critical mineral supplies.

Cautionary Statement about Forward-Looking Statements

This announcement contains certain “forward-looking statements” including statements regarding our intent, belief or current expectations with respect to Cobre’s business and operations, market conditions, results of operations and financial condition, and risk management practices. The words “likely”, “expect”, “aim”, “should”, “could”, “may”, “anticipate”, “predict”, “believe”, “plan”, “forecast” and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future earnings, anticipated production, life of mine and financial position and performance are also forward-looking statements. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Cobre’s actual results, performance and achievements or industry results to differ materially from any future results, performance or achievements, or industry results, expressed or implied by these forward-looking statements. Relevant factors may include (but are not limited to) changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which Cobre operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward-looking statements are based on Cobre’s good faith assumptions as to the financial, market, regulatory and other relevant environments that will exist and affect Cobre’s business and operations in the future. Cobre does not give any assurance that the assumptions will prove to be correct. There may be other factors that could cause actual results or events not to be as anticipated, and many events are beyond the reasonable control of Cobre. Readers are cautioned not to place undue reliance on forward-looking statements, particularly in the current economic climate with the significant volatility, uncertainty and disruption caused by the COVID-19 pandemic. Forward-looking statements in this document speak only at the date of issue. Except as required by applicable laws or regulations, Cobre does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in assumptions on which any such statement is based. Except for statutory liability which cannot be excluded, each of Cobre, its officers, employees and advisors expressly disclaim any responsibility for the accuracy or completeness of the material contained in these forward-looking statements and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in forward- looking statements or any error or omission.
