Table Notes:

A. For Medenovac (February 2025) and Shanac (March 2025) AuEq grade is based on metal prices of gold (US\$2,250/oz), copper (US\$10,000/t), silver (US\$25/oz), lead (US\$2,200) and zinc (US\$3,000/t) and overall metallurgical recoveries of 80% for these metals. These estimates are based on Strickland's interpretation of potential long term commodity prices and their interpretation of initial metallurgical test work and use the following formula: $\text{AuEq (g/t)} = \text{Au (g/t)} + 1.38 \times \text{Cu (\%)} + 0.011 \times \text{Ag (g/t)} + 0.304 \times \text{Pb (\%)} + 0.413 \times \text{Zn (\%)}.$ It is the Company's opinion that all the elements included in the metal equivalents calculations have a reasonable potential to be recovered and sold. A 1.0 g/t AuEq cut-off has been used for the Medenovac Resource Estimate. A 0.60 g/t AuEq cut-off has been used for the Shanac estimate.

B. For Copper Canyon (October 2021) AuEq grade based on metal prices of gold (US\$1,750/oz), copper (US\$10,000/t), and metallurgical recoveries of 80% for both metals. These estimates are based on the Company's assumed potential commodity prices and recovery results from initial and ongoing metallurgical test work and use the following formula for Copper Canyon: $\text{AuEq (g/t)} = \text{Au (g/t)} + 1.55 \times \text{Cu (\%)}.$ It is the Company's opinion that all the elements included in the metal equivalents calculations have a reasonable potential to be recovered and sold. A 0.4g/t AuEq cut-off has been used for the Copper Canyon Resource Estimate.

C. Rounding errors are apparent in the summation of total resources.

Please refer to the Company's ASX announcements dated:

- 27 March 2025 titled: "Shanac Resource Increases to 5.30Moz AuEq, Taking Rogozna to 7.40Moz AuEq" for full details regarding the Shanac Mineral resource Estimate;

Gold Equivalent Calculations

Gold Equivalent Calculations (Rogozna Project)

Gold Equivalent calculations for exploration results withing this presentation are based on the following metal prices;

For Shanac, Medenovac and Kotlovi (US\$2,250/oz), copper (US\$10,000/t), silver (US\$25/oz), lead (US\$2,200/t), zinc (US\$3,000/t), and metallurgical recoveries of 80% for all metals.

For Copper Canyon AuEq grade based on metal prices of gold (US\$1,750/oz), copper (US\$10,000/t), and metallurgical recoveries of 80% for both metals.

For Shanac, Medenovac and Kotlovi the formula used for the AuEq is $Au (g/t) + 1.38 \times Cu(\%) + 0.011 \times Ag (g/t) + 0.304 \times Pb(\%) + 0.413 \times Zn(\%)$.

For Copper Canyon the formula used for AuEq is $Au (g/t) + 1.55 \times Cu (\%)$.

The Company considers that all metals have reasonable prospects of being recovered and sold.
