1. Nature and Continuance of Operations

Temas Resources Corp. (the "Company") was incorporated pursuant to the provisions of the British Columbia Business Corporations Act on June 25, 2018, under the name "Clean Earth Chemical Corp." On August 12, 2019, the Company changed its name to Temas Resources Corp.

The Company's head office and registered office is located at 309 – 2912 West Broadway, Vancouver, British Columbia, V6K 0E9. The Company's principal business activity is the acquisition, development and exploration of mineral properties.

On June 26, 2023, the Company consolidated its issued and outstanding common shares on the basis of 9 pre-consolidation common shares to 1 post consolidation common share. All information relating to basic and diluted loss per share, issued and outstanding common shares, and per share amounts in these financial statements have been adjusted retroactively to reflect the share consolidation.

The September 30, 2025 financial report has been prepared on the going concern basis that contemplates the continuity of normal business activities and the realization of assets and extinguishment of liabilities in the ordinary course of business. The Company incurred a loss for the period ended September 30, 2025 of $1,823,606 (2024 - $1,364,552 loss) and a net cash outflow from operating, investing, and financing activities of $37,685 (2024 - $134,224 inflow). As at September 30, 2025, the Company had a working capital deficit of $1,794,519 (2024 - $1,350,973 deficit).

The Directors, in their consideration of the appropriateness of the going concern basis for the preparation of the financial report, have prepared a cash flow forecast for the next 12 months from the date of signing. The cash flow forecast reflects that further funding will be required, including the Company being able to secure additional funding by Q2 2026, in order to meet the Company's ongoing working and investing capital requirements. At the date of signing this report, the Directors have reasonable grounds to believe that the Company will be able to achieve the matters above and that it is appropriate to prepare the financial report on the going concern basis based on the following:

- Subsequent to the period, the Company commenced trading on the Australian Stock Exchange ("ASX") and successfully raised approximately AUD$11,000,000 in capital.
- The Company's ability to raise funds from external sources to meet ongoing working and investing capital requirements, as demonstrated by the successful completion of the recent placement in March, July and October 2025.
- The Group's ability to reduce expenditure on non-essential activities and manage the timing of cash flows to meet the committed obligations of the business as and when they fall due.

Should the Company be unsuccessful in achieving the matters set out above, a material uncertainty exists that may cast significant doubt about the Group's ability to continue as a going concern and, therefore, whether it will realise its assets and extinguish its liabilities in the normal course of business at the amounts stated in the financial report.

These financial statements were authorized by the Board of Directors on November 21, 2025.

2. Basis of Presentation

Statement of Compliance

The quarterly financial report is a general-purpose financial report prepared in accordance with AASB 134 'Interim Financial Reporting'. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 'Interim Financial Reporting'. The interim report does not include notes of the type normally included in an annual financial report and shall be read in conjunction with the most recent annual financial statements.

Basis of Measurement

These condensed interim financial statements have been prepared on a historical cost basis, except for financial instruments classified in accordance with measurement standards under AASB. All dollar amounts presented are in Canadian dollars unless otherwise specified. These condensed interim financial statements have been prepared using AASB principles applicable to a going concern, which contemplate the realization of assets and settlement of liabilities in the normal course of business as they come due.

3. Material Accounting Policy Information

The Company's significant accounting policies can be read in Note 3 to the Company's annual audited financial statements at and for the year ended December 31, 2024.

4. Loan receivable

During the period, the Company impaired the loan of $83,616 (2024 - $5,603) to its associated company ORF Technologies Inc. See note 7.

June 30, 2025	**$ 54,703**	**$ 6,107,470**	**$ 550,000**	**$ 6,712,173**

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as for problems arising from the frequently ambiguous conveyance history characteristic of many mineral properties. The Company has investigated the title to its exploration and evaluation assets and, to the best of its knowledge, the title is in good standing.

INVESTMENTS

ORF Technologies

On March 26, 2021, the Company purchased a 50% interest in ORF Technologies Inc. ("ORF") for $600,000. On October 28, 2025, the Company acquired the remaining 50% for $600,000 and now holds 100% of ORF. ORF Technologies Inc. holds a portfolio of patents related to mineral extraction. The Company has accounted for the investment in ORF using the equity method of accounting.

Temas has finalized a 50% acquisition of ORF Technologies Inc. ORF has developed several patented, innovative leaching and solvent extraction processes. With the ORF transaction, in conjunction with MetaLeach™, Temas believes that these combined technologies will make a difference in helping to alleviate the significant environmental impact that results from present-day mineral processing.

Pursuant to the Acquisition, Temas acquired 50% of the outstanding shares of ORF in exchange for a cash payment of $600,000. In closing, the parties entered into a shareholders' agreement governing their rights and obligations going forward, including development and dividend policies, and pre-emptive rights to existing shareholders to acquire positions of other existing shareholders. With the 50% acquisition of ORF, Temas' objectives are to achieve and provide the lowest cost processing alternative for specialty, strategic and rare earth metals producers.

Transaction Highlights:

- COST-EFFICIENCIES: TiO_2 technology developed by ORF proved 144.8% more cost-efficient than conventional processes. The Company anticipates comparable cost efficiencies in the production of nickel, iron, gold, rare earth metals and many more.
- MORE ENVIRONMENTALLY FRIENDLY: The Recovery Technologies offer a significant reduction in carbon footprint when compared to conventional processing methods.
- COMPLEMENTARY ACQUISITIONS: ORF provides a suite of technologies that will complement and work alongside the licensing agreement with Metaleach™. The ORF technology suite is also capable of supporting Temas Resources' internal La Blache projects as well as unrelated third-party mining projects.

The Company structured the acquisition to ensure the existing principals responsible for developing the technologies at ORF would have a significant vested interest in the ongoing commercial success of the technologies. ORF was established as a holding company for intellectual property developed by Process Research Ortech ("PRO"), a company established in 1990 during the privatization of the Ontario Research Foundation's ("ONT") metallurgical testing facilities. ONT was created as an independent corporation by a provincial Act in 1928.

For the year ended December 31, 2024, the Company recorded an equity loss of $Nil (2023 - $8,635) and a loan advanced of $12,087 (2023 - $Nil) relating to its investment in ORF. During the period ended September 30, 2025, the Company advanced $83,616 to ORF (2024 - $5,603), which was impaired during the same period.
