

- **Drillers on Site**
- **RC Drilling Commences**

The map displays the Challenger West Project area in South Australia. Key features include:

- Drill Area:** Indicated by a green arrow pointing to a specific location within the project area.
- Mineral Occurrences:** Marked by yellow circles with labels such as (Au), (Ni), (W), (U), (Coal), (Fe), (Cu), and (U).
- Project Boundaries:** Shaded in light blue, with specific areas labeled EL 7012 and EL 6785.
- Geographic Context:** An inset map shows the location within South Australia, with Adelaide marked. The main map includes a scale bar (0 to 50 Km) and a north arrow.
- Other Locations:** Greenwood, Challenger Gold Operations, Monsoon (Au), Typhoon (Au), Campfire Bore (Au), Golf Bore (Au), and Aurora Tank (Au) are also labeled.

Figure 1: Location of the Highway and Challenger West project in South Australia.

Figure 2: Drill rig set up on first hole at Kingfish.

The drilling program is expected to take 3 weeks to complete, and samples to be sent to the laboratory in Adelaide for assay thereafter. The programme will focus on testing gold and pathfinder element anomalism coincident with interpreted north-northeast trending structures (**Figure 3**).

Figure 3 Challenger West Area 1 UF soil results underlain by RTP IVD magnetic image.

The Kingfish prospect is approximately 40 km to the west of the 1.2M oz Challenger Gold Mine in a geological setting analogous to the Challenger deposit.

Executive Director David Low commented:

“Taiton is pleased to commence drilling on these compelling targets for gold mineralisation due to its geological similarities to that of the Challenger Mine. We look forward to receiving the results of the drill program and will accordingly update the market in due course.”

This announcement has been approved for release by the Board of Taiton.
