Investment Risks		
What are the risks of subscribing for New Shares or New Options under the Offers?	New Shares and New Options offered pursuant to this Prospectus should be considered speculative and an investment in the Company is subject to a range of risks. These risks include the following:	Section 7
Company specific risks:	Litigation Risk The Company's wholly owned subsidiary, Celamin Pty Limited, has been in dispute with its joint venture partner, Tunisian Mining Services (TMS) since January 2015, regarding ownership and control of CPSA, which is the operating company that held the Chaketma Phosphate Project. No guarantee is given that any of the current legal proceedings will be resolved in favour of the Company or that any legal remedy will ultimately be favourable. Risks specific to Chaketma Phosphates SA Chaketma Phosphates SA (CPSA), a joint venture in which PhosCo holds a 51% stake through its wholly owned subsidiary Celamin Pty Limited (Celamin), previously owned the Chaketma permit and had a pending application for the Chaketma Phosphate Project. However, this application by CPSA was unsuccessful. Instead, a larger overlapping	

Topic	Summary	Further information
	permit, Gasaat, was granted entirely to PhosCo through a separate, wholly-owned subsidiary. The CPSA JV no longer holds any permits or permit applications. In light of this development and subject to full compliance with applicable law, PhosCo does not intend to provide further investment to the CPSA joint venture. Celamin has received correspondence from TMS allegedly Celamin violated the objectives and spirit of the CPSA JV agreement, including applying for a new permit overlapping the Chaketma permit and abuse of majority power within CPSA. These claims will be vigorously defended if TMS opts to proceed to ICC arbitration under the JV agreement. PhosCo notes that TMS still owes ICC arbitration damages, costs and interests from TMS illegally misappropriating Celamin's CPSA shares amounting to TND14M (A\$7M). Despite being entitled to the damages under the Arbitral Award, PhosCo has not recognised these amounts as an asset on its balance sheet due to TMS' repeated non-compliance with the Arbitral Award and uncertainty about TMS' capacity to pay the damages. The Company may suffer a loss or need to fund the liabilities of CPSA, and there is no guarantee that the Company can recover these damages, interest and costs from TMS or its directors responsible for any of these liabilities. Tunisian country risk The Company's exploration permits are located in Tunisia and, and the Company is subject to the risks associated with operating in that country, including various levels of political, sovereign, economic and other risks and uncertainties. These risks and uncertainties also include, but are not limited to, terrorism, hostage taking, fluctuations in currency exchange rates, high rates of inflation, labour unrest, the risks of war or civil unrest, expropriation and nationalisation, renegotiation or nullification of existing concessions, licences, permits and contracts, changes in taxation policies, restrictions on foreign exchange and repatriation and changing political conditions, currency controls and governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction.	

Topic	Summary	Further information
	Changes, if any, in mining or investment policies or shifts in political attitude in Tunisia may adversely affect the operations or profitability of the Company. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on production, price controls, export controls, foreign currency remittance, income taxes, expropriation of property, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use and mine safety. Failure to comply strictly with applicable laws, regulations and local practices relating to mineral rights applications and tenure, could result in loss, reduction or expropriation of entitlements, or the imposition of additional local or foreign parties as joint venture partners with carried or other interests. The Company will conduct its operations in accordance with international laws and standards, which may not be consistent with local customs or practices that could result in loss, reduction of production, logistics and sales, in which the Company's operational and financial performance may be adversely affected. Outcomes in courts in Tunisia may be less predictable than in Australia, which could affect the enforceability of contracts entered into by the Company or its subsidiaries in Tunisia. Any material adverse changes in government policies, legislation, political, legal and social environments in Tunisia or any other country that the Company has economic interests in that affect mineral exploration activities, may affect the viability and profitability of the Company. Risk specific to the Shares PhosCo Ltd, being a company listed on ASX, is subject to the market forces that influence the broad share market trends and the price of securities of individual companies. Recent global political and economic events, including the potential threat of terrorism and the global financial climate, may cause share price fluctuations in the Australian share market and globally. Fluctuations in the price of the Shares are therefore a key risk for recipients.	

Topic	Summary	Further information
	Government regulation risks There can be no assurance that future Tunisian government policy will not change and this may adversely affect the long-term prospects of the Company. In addition, future changes in the Australian, Tunisian and other governments, regulations and policies may have an adverse impact on the Company. Contractual Dispute Risk Contractual disputes with joint venture partners and contractors can arise from time to time. Failure to meet contracted obligations by a joint venture partner or contractor could adversely affect the Company's capacity to carry out its own activities. The Company may also fail to meet its obligations which may have an adverse impact on that joint venture or contractual arrangement. Adequacy of Funding The Company will have no operating revenue and it is unlikely to generate any revenue from operations in the short to medium term. Until such time as the Company's projects generate sufficient cash flow, the Company is likely to require additional equity or debt funding. Completion risk of the European Bank for Reconstruction and Development (EBRD) equity investment The Company has signed a mandate letter with EBRD with the bank considering an investment of US\$5,000,000 in the Company's equity. The funds raised under the mandate will be used by the Company to advance the Gasaat Phosphate Project to a bankable feasibility study and a range of other conditions including EBRD due diligence and internal approvals. There is a risk that the EBRD equity investment will not proceed. Exploration and development risk The business of exploration for phosphate and other minerals and their development involves a significant degree of risk and depends on factors that include successful exploration and the establishment of Resources and Reserves within the meaning of the 2012 JORC Code and completion of feasibility and other studies in relation to such projects and the Company may not be successful in doing so.	

Topic	Summary	Further information
	Mineral Reserves and Resources estimates risk The Reserve and Resource estimates for the existing mineral properties of the Company are estimates only which were valid when originally calculated and may alter significantly when new information or techniques become available. In addition, by their very nature, estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. No assurance can be given that any particular level of recovery of minerals from the Reserves and Resources will in fact be realised or that an identified Reserve or Resource will ever qualify as a commercially mineable (or viable) deposit that can be economically exploited. The variables on which estimates of Resources and Reserves are made include a number of factors and assumptions such as historical production, assumed effects of regulation by government agencies, assumptions regarding future prices and future capital and operating costs. Estimates of Reserves, Resources and production costs can also be affected by such factors as environmental regulations, weather, unforeseen technical difficulties, unusual and unexpected geological formations and work interruptions. Material changes in Resources and Reserves, grades, stripping ratios or recovery rates may affect the economic viability of projects. Reserve and Resource estimates should not be interpreted as assurances of mine life or of the profitability of current or future operations. Geopolitical and sovereign risks generally Changes in legislation and government policy in Australia and Tunisia (including taxation and monetary policies and corporations laws) could materially affect the operating results of the Company. The Company will be subject to the risks associated with operating in Tunisia generally which may include economic, social or political instability or change, hyperinflation, currency non-convertibility and instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations and government control over mineral properties.	

Topic	Summary	Further information
	Environmental risks The operations and proposed activities of the Company are subject to Tunisian laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment. It is the Company's policy to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws, in order to minimise damage to the environment and risk of liability. Nevertheless, there are certain risks inherent in the Company's activities which could subject the Company to extensive liability. There can be no assurance that new environmental laws, regulations or stricter enforcement policies, if implemented, will not oblige any company to incur significant expense and undertake significant investment, which could have a material adverse effect on its business, financial conditions and results of operations. Further, whether in Tunisia or any other jurisdiction in which operations may be carried on, following cessation of any production from any future operations, the operating parties will be required to participate in clean-up programmes resulting from any contamination from operations in which it participates, removal of disused plant and equipment and where necessary, restoring the environment that has been disturbed in the course of operations. The cost of that participation may be considerable if operations result in significant environmental liabilities being incurred. In such a case, any allowance made for rehabilitation may possibly be inadequate. Relevant government departments from time to time review the environmental bonds that are placed on tenements. Future bonding requirements may be detrimental to the financial position of the Company. Volatility in the price of minerals As an explorer and developer of phosphate (a critical raw material on the European Union list) and, potentially, other minerals, any future earnings of the Company are

	expected to be closely related to the price of those commodities. Commodities prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include worldwide and regional supply and demand for commodities, general world economic conditions and the outlook for interest rates, inflation and other economic factors on both a regional and global basis. These factors may have a positive or negative effect on the Company's exploration and Project development plans, together with the ability to fund those plans and activities. Volatility in the market price of securities There is no assurance that an active trading market for the Company's securities will be sustained. Shareholders should recognise that the price of Shares may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Many factors affect the price of shares including local and international stock markets, movements in interest rates, economic and political conditions, investor and consumer sentiment, terrorism or other hostilities and currency fluctuations. Contractual risk All companies operate through a series of contractual relationships with operators, technical experts, project managers and contractors generally. Joint venture, access and farm in contracts may also be entered into in relation to various projects. All contracts carry risks associated with the performance by the parties of their obligations as to time and quality of work performed. While there are no specific issues relating to the Company's material contracts currently known to the Company (apart from the matters outlined in Litigation Risk in Section 10.11), the inability of contracting parties to meet contracted obligations can adversely affect the capacity of the other parties to carry out their own obligations or can cause a project to be unable to be implemented or continued because of their own lack of adequate financial capacity to meet the obligations of the defaulting party. To the extent that third parties default in

	their obligations under such documents, it may be necessary for the Company to approach a court to seek legal remedy. Such legal action may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted on favourable terms. Reliance on Key personnel The ability of the Company to achieve its objectives depends on the access to key personnel and external contractors who provide technical expertise and other services. If the Company cannot secure key personnel or external contractors or if the services of the present key personnel and external contractors cease to become available to the Company, this may affect the Company's ability to achieve its objectives. Potential acquisitions The Company may make potential acquisitions in other resource projects which may expose the Company to additional risks.	
General risks	Economic Risk General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities. Share market and investment risks There can be no assurance that an active trading market will exist for the Company's securities. The price of Shares might rise or fall. Factors affecting the price at which securities are traded on ASX could include local and international stock markets, movements in interest rates, economic and political conditions, investor and consumer sentiment, terrorism or other hostilities and currency fluctuations. Holding securities will be subject to risks of a general nature relating to investment in shares and securities. The Company will be small company in terms of market capitalisation. As a consequence there may be relatively few buyers and sellers of securities on ASX at any given time and the market price may be highly volatile, particularly in times of share market turbulence or	

	negative investor sentiment. This may present difficulties for Shareholders seeking to liquidate their holdings. None of the Company, its Directors or officers warrant the future performance of the Company or any return on an investment in the Company. General economic conditions The Company's operating and financial performance is influenced by a variety of general economic and business conditions including the level of inflation, interest rates and government fiscal, monetary and regulatory policies. Prolonged deterioration in general economic conditions, including an increase in interest rates, could be expected to have a corresponding adverse impact on the Company's operating and financial performance. Underwriting Risk The Entitlement Offer is fully underwritten which means there is a high level of certainty that the Company will raise sufficient money under the Entitlement Offer to carry out its stated objectives for the next 12 months. However, there are circumstances outlined in this document that may lead to the Underwriting Agreement being terminated (see Section 10.4 for further information). Quotation of New Shares Whilst the Company intends to apply for Official Quotation of the New Shares, there is no guarantee that the Company will be able to fulfil the ASX's requirements in relation to Official Quotation of those New Shares and. If so, the New Shares will not be tradeable on ASX. Stock Market Risks The market price of the Shares may be significantly adversely affected by a variety of factors including (but not limited to) perceptions of, or variations in, general market conditions, operating performance, commodity prices, project and country risk, Board and management strength and expertise and a broad range of other factors which may or may not relate to the Company's operations. Insurance risks Insurance of all risks associated with exploration, mining and production activities may not be available at all, or may only be able to be obtained at an unacceptable cost, and so in certain circumstances the Company's insurance may not be of a nature or level to provide adequate coverage. The occurrence of an event that is not covered or fully covered by insurance could have a material

	adverse effect on the business, financial condition and results of the Company. Fiscal risks These risks involve the imposition of additional taxes, imposts and other charges by government from time to time relating to revenue or cash flow. Industry profitability can be affected by changes in tax policies and the interpretation and application thereof. Ukraine Conflict The nature and extent of the effect the Ukraine Conflict may have on the Company's operations remains uncertain at this time. Litigation The Company is presently involved in a number of litigation matters described in Section 10.11 above. There is always the risk that the Company may become exposed to other litigation and to the extent that such risks are not covered by insurance, an adverse outcome in litigation or the cost of responding to potential or actual litigation may have a material adverse impact on financial performance. Safety Legislation Current and future exploration and production facilities are subject to a range of safety legislation which may change in a manner that may include requirements, in addition to those now in effect, and a heightened degree of responsibility for companies and their Directors and employees. Changes in accounting policies The Company will be subject to the usual business risk that there may be changes in accounting policies which have an adverse impact on the Company. Wars, terrorism, political and natural disasters Events may occur within or outside Australia or within or outside Tunisia that could impact upon the world economy, the operations and exploration activities of the Company and the market price of the Company's Shares. These events include war, acts of terrorism, civil disturbance, political intervention and natural events such as earthquakes, floods, fires and poor weather. Valuation	

Topic	Summary	Further information
	No formal valuation has been completed of the Company's projects or the Company itself. The Company makes no representation as to the value of the Company or its assets. It is recommended that intending investors and their advisers make their own assessment as to the value of the Company and its assets. Unforeseen Expenditure Expenditure may need to be incurred that has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any such additional expenditure requirements, if such expenditure is subsequently incurred, this may adversely affect the expenditure proposals of the Company. Other Risk Factors Other risk factors include those normally found in conducting business including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the Company's business or trade.

The Board reserves the right to close the Entitlement Offer early or extend the Closing Date, in consultation with the Underwriter or sub-underwriting arrangements, should it consider it necessary to do so.

Offer Details	
Shortfall and Oversubscriptions:	Any New Shares not applied for by Eligible Shareholders under the Entitlement Offer shall form the Shortfall and be allotted pursuant to the Underwriting Agreement. Where applications for the Shortfall exceed the Entitlement Offer, the Company may issue Additional Shares pursuant to the Oversubscriptions Offer. The issue of any Additional Shares to Eligible Shareholders will be dependent on the number of Additional Shares available.

4.2. Oversubscriptions Offer

Under the Oversubscriptions Offer, the Company will offer a placement facility to accept oversubscriptions from the Entitlement Offer of up to a further 20,000,000 New Shares at \$0.05 per New Share (**Additional Shares**) each from Eligible Shareholders participating to raise a further \$1,000,000 before issue costs.

Eligible Shareholders may only apply for New Shares if they apply for their full Entitlement under the Entitlement Offer.

Applications for Additional Shares must be accompanied by payment in full for the price of the Additional Shares applied for.

4.3. Takeover law requirements

The 'Rights Issue' exception to the takeovers restriction in item 10 of section 611 of the Corporations Act does not apply to the Entitlement Offer. Accordingly, Eligible Shareholders will be unable to acquire a relevant interest in more than 20% of the Company after completion of the Offers. Accordingly, Eligible Shareholders will be unable to acquire a relevant interest in more than 20% of the Company after completion of the Offers.

It is the responsibility of each Eligible Shareholder to ensure that it will not breach the takeovers provisions under the Corporations Act (the 20% threshold) by applying for New Shares (including Additional Shares) under the Entitlement Offer and the Oversubscriptions Offer. These provisions are set out in section 606 of the Corporations Act. No Eligible Shareholder will be permitted to acquire Additional Shares under the Oversubscriptions Offer to the extent the Company considers (acting reasonably) that doing so would result in a contravention of the takeovers limits in section 606 of the Corporations Act.

4.4. Allocation of Shares to applicants

Allocation of any shortfall under the Entitlement Offer (if for any reason the Underwriter does not fully fulfil its obligations under the Underwriting Agreement) and Additional Shares to Eligible Shareholders who have submitted applications for Additional Shares will be considered and determined by the Directors at their discretion in consultation with the Underwriter and Lead Manager.

In exercising their discretion to allocate the Additional Shares:

- (a) subject to the above, the Directors will generally endeavour to allocate the Additional Shares which is considered fair to those applicants, having regard to their existing shareholding interests;
- (b) priority will be given to those Eligible Shareholders who have an “Unmarketable Parcel” as defined in the Constitution so they may “top up” their shareholding;
- (c) the Directors will not allocate any portion of the Additional Shares to an applicant who is a Related Party of the Company in priority to, or to the exclusion of, any other applicant, and in any event only to the extent permitted by the Listing Rules;
- (d) the Company will not allocate Additional Shares under the Oversubscriptions Offer to the extent that the voting power in the Company of the applicant and their Associates (if known) exceeds section 606 of the Corporation Act (i.e., acquiring voting power of 20% or more in the Company, or increasing an existing controlling voting power of more than 20%); and
- (e) the Directors will not otherwise exercise their discretion regarding allocation of the Additional Shares in a manner likely to exacerbate a potential unacceptable control effect, except to the extent they consider necessary (acting reasonably) to prevent the issue of New Shares contrary to the law or the ASX Listing Rules.

The Board reserves the right to place any shares under the shortfall under the Entitlement (if for any reason the Underwriter does not fully fulfil its obligations under the Underwriting Agreement) and any Additional Shares at their discretion within 3 months after the Closing Date in consultation with the Underwriter at an issue price not less than the price at which the securities are offered under the Entitlement Offer and the Oversubscriptions Offer.

4.5. Conversion Options Offer

This Prospectus invites the Converting Note Holders to apply for a total of 51,445,206 Conversion Options, which upon exercise will result in the issue of 51,445,206 Shares, on the basis of one free-attaching Conversion Option for every one Conversion Share issued upon conversion of the Converting Notes currently on issue.

The Conversion Options will be issued on the terms and conditions set out in Section 9.

On 15 March 2024 and 16 October 2024, the Company announced the issue of \$1,900,000 worth of Converting Notes with a maturity date of 15 March 2025.

A term of the Converting Notes is that, upon the occurrence of a Capital Raising Event, the Company must automatically convert the Converting Notes into Conversion Shares, and all accrued but unpaid interest will be capitalised and converted into Conversion Shares. If the Converting Notes convert on the occurrence of a Capital Raising Event, each Converting Note will be convertible into Shares at a conversion price equal to a 20% discount to the capital raising issue price of the relevant Capital Raising Event, subject to a ceiling price of \$0.05 and a floor price of \$0.01.

A **Capital Raising Event** means a capital raising undertaken by the Company after 17 January 2024 to raise a minimum of \$1,000,000 by a placement of Shares.

If the Entitlement Offer completes in accordance with the terms of this Prospectus, then the Converting Notes and accrued interest on those Converting Notes will be converted into a maximum of 51,445,206 Conversion Shares at \$0.04 per Share.

Cleansing Statements lodged by the Company in accordance with the Corporations Act on 15 March 2024 and 16 October 2024 will facilitate the on-sale of the Conversion Shares issued on conversion of the Converting Notes, however, the Conversion Options Offer is necessary to facilitate the offer of the Conversion Options and the on-sale of Conversion Shares issued upon exercise of the Conversion Options.

4.6. Lead Manager Offer

This Prospectus invites the Lead Manager (or its nominee) to apply for a total of 3,000,000 Lead Manager Options at an issue price of \$0.00001 each pursuant to the terms of the Lead Manager Offer, which upon exercise will result in the issue of 3,000,000 Shares. The Lead Manager Options will be issued on the terms and conditions set out in Section 9.

The Lead Manager has a right but not an obligation to subscribe for the Lead Manager Options under the Lead Manager Offer. The Company will not raise any funds from the issue of the Lead Manager Options.

The Lead Manager Offer is made as part of the Lead Manager's remuneration under a previous Lead Manager mandate with the Company. By offering these Lead Manager Options under this Prospectus, the Lead Manager Options and the Shares issued on exercise of the Lead Manager Options will not be subject to secondary trading restrictions.

The Lead Manager Options issued under the Lead Manager Offer will be issued using the Company's placement capacity under ASX Listing Rule 7.1.

The Lead Manager Offer is not made to any person other than the Lead Manager (and its nominee).

The Lead Manager must apply for the Lead Manager Options under the Lead Manager Offer by completing and returning the Application Form which will be provided to the Lead Manager. Only the Lead Manager (or its nominee) may submit an application under the Lead Manager Offer.

4.7. Underwriting and sub-underwriting

The Entitlement Offer is fully underwritten up to 100,701,456 New Shares for \$100,701,456 (**Underwritten Amount**) by the Underwriter, Westar Capital Limited. The Underwriter will be paid an underwriting fee equal to 4% of the Underwritten Amount (excluding GST) and a management fee equal to 2% of the total funds raised under the Entitlement Offer and the Oversubscriptions Offer (excluding GST) (**Underwriter's Fee**).

A summary of the terms and conditions of the Underwriting Agreement, including the circumstances in which the Underwriter may terminate the Underwriting Agreement, is set out in Section 10.4.

Under a separate Sub-Underwriting Agreement, the Lead Manager is engaged by the Underwriter as priority sub-underwriter to the Entitlement Offer, and will be paid by the Underwriter an amount equal to the Underwriter's Fee. The Company is not a party to the Sub-Underwriting Agreement.

Certain Directors have agreed to priority sub-underwrite the subscription of up to a total of 45,000,000 New Shares under the Entitlement Offer for a total of \$2,250,000. LSG has also agreed to priority sub-underwrite the subscription of up to a total of 20,000,000 New Shares under the Entitlement Offer for a total of \$1,000,000. The Directors and LSG will be paid a 4% sub-underwriting fee in relation to their sub-underwriting commitments. The sub-underwriting commitments of Aldaoud and LSG will be offset against loan previous made by these entities to the Company. Details

of the sub-underwriting are set out in Section 10.7 and the loan arrangements are set out in Section 10.6.

4.10. Custodians and Nominees

The Entitlement Offer and Oversubscriptions Offer is being made to all Eligible Shareholders. The Company is not required to determine whether or not any Eligible Shareholder is acting as a nominee or the identity or residence of any beneficial owners of Shares.

Where any registered holder that qualifies as an Eligible Shareholder is acting as a nominee for a foreign person, that registered holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Entitlement Offer and Oversubscriptions Offer is compatible with applicable foreign laws.

Any person in the United States or any person that is, or is acting for the account or benefit of a U.S. person with a holding through a nominee may not participate in the Offers and the nominee must not take up any Entitlement or send any materials to the United States or to any person that is, or is acting for the account or benefit of, a U.S. Person.

On or within 7 days of the date of this Prospectus the Company will make application for the New Shares to be granted Official Quotation on the ASX.

If ASX does not grant Official Quotation of the New Shares within 3 months after the date of the Prospectus then the New Shares will not be allotted and application monies will be repaid in full without interest.

4.15. CHESS System

The Company participates in the Clearing House Electronic Subregister System (**CHESS**). ASX Settlement, a wholly owned subsidiary of ASX, operates CHESS in accordance with the Listing Rules and Securities Clearing House Business Rules.

4.16. New Zealand Shareholders

The Entitlement Offer is made to Eligible Shareholders with an address in New Zealand, in reliance on the Financial Markets Conduct Act 2013 (New Zealand) and the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021 (New Zealand).

Neither this Prospectus nor any Offer has been registered, filed with or approved by any New Zealand regulatory authority. This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

4.17. Guernsey Shareholders

The New Shares may only be offered or sold in or from within the Bailiwick of Guernsey to existing shareholders of the Company. No offer to subscribe for New Shares will be made to the public in Bailiwick of Guernsey.

4.18. Ineligible Shareholders

The Offers do not constitute an offer in any place in which, or to any person to whom, it would not be lawful to make such an offer. Shareholders who do not have a registered address in Australia, New Zealand or Guernsey are not eligible to participate in the Offers. The laws of jurisdictions outside of Australia, New Zealand and Guernsey may restrict the distribution of this Prospectus. Anyone who comes into possession of this Prospectus outside Australia, New Zealand and Guernsey should seek advice on and observe any such restrictions. A failure to comply with those restrictions may constitute a violation of applicable securities laws.

The Company is of the view that it is unreasonable to extend the Offers to Shareholders with registered addresses outside Australia, New Zealand and Guernsey, having regard to:

- the small number of Shareholders with registered addresses outside Australia, New Zealand and Guernsey;
- the number and value of the New Shares which would be offered to ineligible Shareholders (being Ineligible Shareholders); and
- the cost of complying with the legal requirements and requirements of the regulatory authorities, in the respective overseas jurisdictions.

Accordingly, the Offers will not be made to Ineligible Shareholders, and this Prospectus will not be sent to those Ineligible Shareholders. In order for a Shareholder to participate in the Offers, the Shareholder must be resident in Australia, New Zealand or Guernsey at the Record Date.

In particular, this Prospectus does not constitute an offer for sale of the New Shares or New Options or any right to a security into the United States or to U.S. persons. The New Shares and New Options have not been, and will not be, registered under the U.S. Securities Act and must not be offered or sold within the United States or to U.S. persons unless they are registered under the U.S. Securities Act or an exemption from the registration required of the U.S. Securities Act is available.

Eligible Shareholders holding Shares on behalf of persons who are resident outside Australia, New Zealand and Guernsey are responsible for ensuring that participation in the Offers does not breach regulations in the relevant overseas jurisdiction. Return of a duly completed Entitlement and Acceptance Form or payment by BPAY® will constitute a representation that there has been no breach of such regulations. Shareholders who are nominees are therefore advised to seek independent advice as how they should proceed. Where the Offers has been dispatched to a Shareholder domiciled outside Australia, New Zealand and Guernsey and where the country's securities code or legislation prohibits or restricts in any way the making of the Offers contemplated by this Prospectus, the Prospectus is provided for information purposes only.

4.19. Costs of participation

No brokerage, commissions or other transaction costs will be payable by Applicants in respect of the Application for, and allotment of, New Shares or New Options under this Prospectus.

4.20. On-sale of Shares previously issued without disclosure

This Prospectus will also remove any trading restrictions that may have been attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including prior to the date of this Prospectus. Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body; and
- (b) either:
 - (i) a prospectus is lodged with ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

The Board may determine to alter the way funds are applied as it considers necessary and appropriate having regard to the circumstances at the time.

The Entitlement Offer is fully underwritten by Westar Capital Limited to \$5,035,072.80. However, if the Underwriting Agreement is terminated, there is a risk that sufficient funds will not be received under the Entitlement Offer to fund the Company's immediate working capital requirements. - (a) existing working capital;
- (b) debt funding; or
- (c) the proceeds of a future capital raising.

Shareholders are strongly urged to read this Prospectus carefully so as to better understand the purpose of the Offer, how the funds to be raised under the Offers will be applied, the key assumptions involved and the potential impact the new funding will have on the Company's future growth and enterprise value.

5.2. EFFECT OF THE OFFERS ON THE COMPANY

(a) Capital Structure

The effect of the Offers on the capital structure of the Company under the Underwritten Amount and the Maximum Amount, assuming that no Converting Notes are converted prior to the Record Date, will be as follows:

	Underwritten Amount \$	Maximum Amount \$
Shares currently on issue ¹	285,992,133	285,992,133
New Shares offered under this Prospectus	100,701,456	120,701,456
Maximum Conversion Shares	51,445,206	51,445,206
Total Shares on issue following the Offer	438,138,795	458,138,795
Options currently on issue	0	0
Maximum Conversion Options offered under this Prospectus	51,445,206	51,445,206
Maximum Lead Manager Options offered under this Prospectus	3,000,000	3,000,000
Total Options on issue following the Offer	54,445,206	54,445,206
Performance Rights on issue	9,000,001	9,000,001
Amount raised under this Prospectus (before costs)	\$5,035,072.80	\$6,035,072.80

¹ This assumes no further Shares are issued prior to the Record Date

(b) Cash Position

Completion of the Offers will have the effect of increasing the Company's cash reserves by approximately:

- (i) \$4,668,353 where the Underwritten Amount is raised (after deducting estimated cash costs of the Offers, i.e. approximately \$366,720); and
- (ii) \$5,606,428 where the Maximum Amount is raised (after deducting estimated cash costs of the Offers, i.e. approximately \$428,645),

providing funds to advance the activities and objectives of the Company. In the event all of the New Options are exercised, the Company will raise an additional \$2,722,260.

Note that no consideration will be received by the Company on the issue of the New Options. There is no certainty that all or some of the New Options will be exercised and consequently no certainty that the Company will receive proceeds from the exercise of the New Options, nor issue additional Shares, on the exercise of the New Options.

(c) Effect of Offers on Control

If all Eligible Shareholders take up their full Entitlements, there would be no significant effect on the control of the Company, as the Entitlement Offer is made pro-rata and in that case no rights would lapse or be placed in accordance with the terms of the Underwriting Agreement.

As the Company does not propose to apply to ASIC for the approval of the appointment of a nominee for the purposes of section 615 of the Corporations Act, no person will be permitted to acquire New Shares under the Offers to the extent that such acquisition results in that person holding a relevant interest exceeding 20% of the issued share capital of the Company on a post Offer basis.

The current substantial shareholders of the Company, as at the date of this Prospectus, as set out in the Company's 2024 Annual Report released to ASX on 26 September 2024, are as follows:

Substantial Shareholder	No. of Shares	% of Shares
Cumulus Wealth Pty Ltd	47,204,742	17.20%
Lion Selection Group Limited	40,599,258	14.79%
Polo Resources Limited via Polo Investments Limited	27,714,915	12.36%
Lion Manager Pty Ltd; Robin Anthony Widdup; Hedley James Widdup; Craig Kevin Smyth	23,047,656	8.28%

5.3. Potential dilution from New Shares

Shareholders should note that if they do not participate in the Entitlement Offer, their holdings could be diluted by up to 34.7% if the Entitlement Offer is fully subscribed, and up to 37.6% if the Oversubscriptions Offer is also fully subscribed (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

Following is a table which sets out the dilutionary effect, assuming the Maximum Amount is raised and no further Shares are issued:

Holder	Holding as at Record Date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken up	% post Entitlement Offer
Shareholder 1	20,000,000	6.99%	7,042,254	20,000,000	4.37%
Shareholder 2	10,000,000	3.50%	3,521,127	10,000,000	2.18%
Shareholder 3	5,000,000	1.75%	1,760,563	5,000,000	1.09%
Shareholder 4	1,000,000	0.35%	352,113	1,000,000	0.22%
Shareholder 5	500,000	0.17%	176,056	500,000	0.11%

Notes:

1. The table assumes that other Shares are not issued (including on the vesting of Performance Rights) prior to the close of the Closing Date.
2. The dilution percentages assume that all New Shares are issued other than Eligible Shareholders. The dilution represents a percentage of the total maximum Shares on issue on completion of the Entitlement Offer and Oversubscriptions Offer assuming the Entitlement Offer and Oversubscriptions Offer are fully subscribed by persons other than Eligible Shareholders.

5.4. Potential dilution from New Options

The issue of New Options will not have any dilutive effect on Shareholders' shareholding interests unless and until those New Options are exercised.

The total estimated dilutive effect on Shareholders if Shares are issued on exercise of all proposed New Options, assuming:

- (a) the Underwritten Amount is raised, is approximately 11.05%; and
- (b) the Maximum Amount is raised, is approximately 10.62%.

Notes:

1. The interests shown above assume:
 - (a) full subscription to the Entitlement Offer (but no New Shares are issued under the Oversubscriptions Offer);
 - (b) the existing Options do not lapse prior to exercise or conversion;
 - (c) Options are exercised in the sequence as shown above; and
 - (d) no other Shares are issued prior to exercise of Options.

5.5. Market Prices of Existing Shares on ASX

The highest and lowest market sale price of the Company's Shares on the ASX, during the three months immediately preceding the lodgement of this Prospectus with ASIC and the respective dates of those sales are set out below:

Highest: 0.082 cents on 9 December 2024.

Lowest: 0.06 cents on 27 December 2024.

The last market sale price prior to the date of lodgement of this Prospectus with ASIC was 6.65 cents (\$0.0665) on 6 March 2025.

SECTION 6 CONSOLIDATED STATEMENT OF FINANCIAL POSITION

Set out below is a pro forma consolidated Statement of Financial Position for the Company and its controlled entities (**Consolidated Entity**) after taking into account the effect of the Offers. This statement is based on the audit reviewed accounts of the Company as at 30 June 2024, lodged with the ASX on 26 September 2024.

The pro forma Consolidated Statement of Financial Position illustrates the effect of the Offers based upon the following assumptions, qualifications and notes:

- (a) there being no other material changes to the Consolidated Entity's Statement of Financial Position since 30 June 2024, other than the issue of \$900,000 in Converting Notes on 16 October 2024;
- (b) the Offers being subscribed to:
 - (i) the Underwritten Amount, resulting in the Company issuing an additional 100,701,456 New Shares raising a total of \$5,035,073; and
 - (ii) the Maximum Amount (being the Entitlement Offer and the Oversubscriptions Offer being fully subscribed), resulting in the Company issuing an additional 120,701,456 New Shares raising a total of \$6,035,073;
- (c) the cash costs of the Offers which are estimated as:
 - (i) \$366,720 in total where the Underwritten Amount is raised; and
 - (ii) \$428,645 in total where the Maximum Amount is raised; and
- (d) the activities of the Consolidated Entity since 30 June 2024 not being recognised in the *pro forma* consolidated Statement of Financial Position.
- (e) **Note 1 Tranche 2 Converting Note issue** - The Company issued \$900,000 in converting notes (Tranche 2 Converting Notes) to various Tranche 2 Noteholders on 16 October 2024, on the same terms as that of Tranche 1 Converting Notes. The Company received \$884,051 net of transaction costs.
- (f) **Note 2 Impact of operating expenses and payments since 30 June 2024** - These amounts represent the cash used in operations and the material changes since 30 June 2024. Cash payments during the period represent settlement of trade and other payables, employee benefits and other current period operational expenses net of Offer costs.
- (g) **Note 3 Cash and cash equivalent and the impact of the Offer** - The following pro-forma adjustments have been taken up to reflect the impact of the Offer:
 - (i) The issue of between 100,701,456 Shares (Underwritten Amount) and 120,701,456 Shares (Maximum Amount) at an issue price of \$0.05 per Share.
 - (ii) Costs of the Offer estimated to be between \$0.37m (under an Underwritten Amount scenario) and \$0.43m (under a Maximum Amount scenario) which have been taken up against issued capital and accumulated losses.
 - (iii) The Company will issue 3,000,000 options to the lead manager, which are fair valued at \$120,000, which have been taken up against issued capital and reserves.

- (iv) The Company will issue 51.5 million options to the Converting Note Holders on the conversion of the Tranche 1 and Tranche 2 Converting Notes. These options are estimated to be fair value of \$2.06 million, which have been taken up against issued capital and reserves.

7.1. General

The Company's activities are subject to a number of risks which may impact future financial performance and the market price at which New Shares trade. Some of these risks can be mitigated by the use of safeguards and appropriate controls. However, others are outside the Company's control and cannot be mitigated. Therefore, investors who acquire New Shares may be exposed to a number of risks. Broadly, these risks can be classified as risks that are general to investing in the share market and risks specific to an investment in Shares and the Company's underlying business.

This Section sets out the identified major risks associated with investing in New Shares. This list is not exhaustive and investors should read this Prospectus in its entirety before making an investment decision. Investors should also have regard to their own investment objectives and financial circumstances, and should consider seeking appropriate independent investment advice before deciding whether to invest in the New Shares.

7.2. Risk factors specific to the Company

The Company is an ASX listed company engaged in exploration for development and realisation of mineral resource projects in Tunisia.

The Company released its latest audit reviewed financial results for the 2023/2024 financial year as an announcement to ASX on 26 September 2024. A copy can be obtained from the Company's website <https://www.phosco.com.au/> or the ASX website www.asx.com.au under the code "PHO".

An investment in the Company is not risk free and should be regarded as speculative.

There are specific risks that relate directly to the Company's activities. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares and the underlying Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed and does not take into account the individual circumstances of Shareholders.

The Directors strongly recommend that potential Investors consider the risk factors described below, together with information contained elsewhere in this Prospectus and consult with their professional advisers before deciding whether to apply for Shares under this Prospectus.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

(a) *Litigation Risk*

The Company's wholly owned subsidiary, Celamin Pty Limited, has been in dispute with its joint venture partner, Tunisian Mining Services (**TMS**) since January 2015, regarding ownership and control of CPSA, which is the operating company that held the Chaketma Phosphate Project. The Company regained operational and management control of CPSA, holder of the Chaketma Phosphate Project as a 50.99% shareholder of CPSA in October 2021 through the Final Award. The enforcement of this Final Award may still be challenged by TMS. If it is successful, the Final

Award may be overturned and there is no guarantee that the Company will recover any damages, costs or other compensation against TMS in relation to CPSA.

The Company also commenced other actions in the Tunisian Courts, to pursue TMS for the outstanding costs and damages by forcing the sale of TMS assets and other means, the objective of which is to recover funds to offset the damages and costs owed.

No guarantee is given that any of the current legal proceedings will be resolved in favour of the Company or that any legal remedy will ultimately be favourable. An adverse outcome in these legal proceedings may result in loss including the cost of these legal proceedings and of responding to potential or actual litigation may also have a material adverse impact on financial performance.

(b) ***Risks specific to Chaketma Phosphates SA***

Chaketma Phosphates SA (**CPSA**), a joint venture in which PhosCo holds a 51% stake through its wholly owned subsidiary Celamin Pty Limited (**Celamin**), previously owned the Chaketma permit and had a pending application for the Chaketma Phosphate Project. However, this application by CPSA was unsuccessful. Instead, a larger overlapping permit, Gasaat, was granted entirely to PhosCo through a separate, wholly-owned subsidiary.

The CPSA JV no longer holds any permits or permit applications. In light of this development and subject to full compliance with applicable law, PhosCo does not intend to provide further investment to the CPSA joint venture.

Celamin has received correspondence from TMS allegedly Celamin violated the objectives and spirit of the CPSA JV agreement, including applying for a new permit overlapping the Chaketma permit and abuse of majority power within CPSA. These claims will be vigorously defended if TMS opts to proceed to ICC arbitration under the JV agreement. There is a risk that if this matter progresses, the Company will incur costs where there is no guarantee that the Company can recover these damages, interest and costs from TMS or its directors responsible for any of these liabilities.

The Company notes that TMS still owes ICC arbitration damages, costs and interests from TMS illegally misappropriating Celamin's CPSA shares amounting to TND14M (A\$7M). Despite being entitled to the damages under the Arbitral Award, PhosCo has not recognised these amounts as an asset on its balance sheet due to TMS' repeated non-compliance with the Arbitral Award and uncertainty about TMS' capacity to pay the damages.

The Company may suffer a loss or need to fund the liabilities of CPSA, and there is no guarantee that the Company can recover these damages, interest and costs from TMS or its directors responsible for any of these liabilities.

(c) ***Tunisian country risk***

The Company's exploration permits are located in Tunisia and, and the Company is subject to the risks associated with operating in that country, including various levels of political, sovereign, economic and other risks and uncertainties.

These risks and uncertainties also include, but are not limited to, terrorism, hostage taking, fluctuations in currency exchange rates, high rates of inflation, labour unrest, the risks of war or civil unrest, expropriation and nationalisation, renegotiation or nullification of existing concessions, licences, permits and contracts, changes in taxation policies, restrictions on foreign exchange and repatriation and changing political conditions, currency controls and

governmental regulations that favour or require the awarding of contracts to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction.

Changes, if any, in mining or investment policies or shifts in political attitude in Tunisia may adversely affect the operations or profitability of the Company. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on production, price controls, export controls, foreign currency remittance, income taxes, expropriation of property, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use and mine safety.

Failure to comply strictly with applicable laws, regulations and local practices relating to mineral rights applications and tenure, could result in loss, reduction or expropriation of entitlements, or the imposition of additional local or foreign parties as joint venture partners with carried or other interests.

The Company will conduct its operations in accordance with international laws and standards, which may not be consistent with local customs or practices that could result in loss, reduction of production, logistics and sales, in which the Company's operational and financial performance may be adversely affected.

Outcomes in courts in Tunisia may be less predictable than in Australia, which could affect the enforceability of contracts entered into by the Company or its subsidiaries in Tunisia.

Any material adverse changes in government policies, legislation, political, legal and social environments in Tunisia or any other country that the Company has economic interests in that affect mineral exploration activities, may affect the viability and profitability of the Company.

(d) ***Risk specific to the Shares***

PhosCo, being a company listed on ASX, is subject to the market forces that influence the broad share market trends and the price of securities of individual companies. Recent global political and economic events, including the continuing threat of terrorism and the global financial climate, may cause share price fluctuations in the Australian share market and globally. Fluctuations in the price of the Shares are therefore a key risk for recipients.

(e) ***Government regulation risks***

The Company's tenements and activities may be subject to extensive regulation by local, state and federal governments in relation to exploration, development, production, exports, taxes and royalties, labour standards, occupational health, waste disposal, protection and rehabilitation of the environment, mine reclamation, mine safety, toxic and radioactive substances, native title and other matters. Compliance with such laws and regulations will increase the costs of exploring, drilling, developing, constructing, operating and closing mines and other production facilities. There is a risk that approvals required for exploration and development programs and mining operations may not be forthcoming, either at all or in a timely manner, or that they may not be able to be obtained on acceptable terms. A failure to obtain any approval would mean that the ability to participate in or develop any project, or possibly acquire any project, may be limited or restricted either in part or absolutely.

There can be no assurance that future government policy will not change and this may adversely affect the long-term prospects of the Company. In addition, future changes in governments, regulations and policies may have an adverse impact on the Company.

(f) ***Contractual Dispute Risk***

Contractual disputes with joint venture partners and contractors can arise from time to time. Failure to meet contracted obligations by a joint venture partner or contractor could adversely affect the Company's capacity to carry out its own activities. The Company may also fail to meet its obligations which may have an adverse impact on that joint venture or contractual arrangement.

(g) ***Title and permit risks***

Whilst exploration permits have been granted for the Gasaat and Sekarna Phosphate Projects, there is no certainty a mining concession will be granted by the Tunisian Government or that, if granted, the mining concession will be of a size and on terms acceptable to the Company.

For granted permits or licences under which exploration or production activities can be undertaken these permits or licences are issued for a specific term and carries with it work commitments and reporting obligations, as well as other conditions requiring compliance. Consequently, the Company could lose title to, or its interests in, one or more of its permits or licences if conditions are not met or if sufficient funds are not available to meet work commitments. Any failure to comply with the work commitments or other conditions on which a permit or licence is held exposes the permit or licence to forfeiture or may result in it not being renewed as and when renewal is sought. Where permits or licences are cancelled, forfeited or refused renewal, no compensation is payable to the holder of the permit or licence except possibly in extreme circumstances.

Further, mining and exploration permits and licences are subject to periodic renewal. There is no guarantee that current or future renewals will be approved. Renewal of the term of a granted permit or licence is at the discretion of the relevant government authority. Renewal conditions may include increased expenditure or work commitments or compulsory relinquishment of the areas comprising the Company's projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

(h) ***Adequacy of Funding***

The Company will have no operating revenue and it is unlikely to generate any revenue from operations in the short to medium term. Until such time as the Company's projects generate sufficient cash flow, the Company is likely to require additional equity or debt funding.

Additional funds may be required to advance the Gasaat and Sekarna Phosphate Projects toward production.

Some level of debt financing may be available to construct processing facilities as and when and if the Company makes a decision to commence mining operations. Until such time as any such debt financing is available, funding will likely be by way of the issue of shares, which may dilute existing Shareholders. Failure to obtain additional funding on a timely basis could result in delay or indefinite postponement of further exploration and development or force the

Directors to pursue transactions which they would not pursue had sufficient funding been available.

(i) ***Completion risk of the European Bank for Reconstruction and Development (EBRD) equity investment***

The Company has signed a mandate letter with EBRD with the bank considering an investment of US\$5,000,000 in the Company's equity. The funds raised under the mandate will be used by the Company to advance the Gasaat Phosphate Project to a bankable feasibility study and a range of other conditions including EBRD due diligence and internal approvals. There is a risk that the EBRD equity investment will not proceed.

(j) ***Exploration and development risk***

The business of exploration for phosphate and other minerals and their development involves a significant degree of risk and depends on factors that include successful exploration and the establishment of Resources and Reserves within the meaning of the 2012 JORC Code and completion of feasibility and other studies in relation to such projects and the Company may not be successful in doing so.

There is no assurance that future exploration expenditure will result in discoveries or upgrade existing mineralisation to the stage where such can be successfully commercially exploited.

Exploration and development costs are based on certain assumptions with respect to the method and timing of activities. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. No assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability. Exploration and development operations can also be hampered by force majeure circumstances and cost overruns from unforeseen events, including unexpected variations in geology and equipment malfunction. Increases in the costs of exploration and development may affect a company's ability to invest in projects, to purchase or hire equipment, supplies and services and to recruit skilled personnel. The reduced availability of equipment, services and skilled personnel may delay planned exploration and development activities, which may adversely affect operations and increase costs.

Success in development is dependent on many factors such as: access to adequate capital for project development; design and construction of efficient development and production infrastructure within capital expenditure budgets; securing and maintaining title to interests; obtaining regulatory consents and approvals necessary for the conduct of development, mining and production; securing plant and equipment on competitive and acceptable terms and conditions as and when required; and access to competent operational management and prudent financial administration, including the availability and reliability of appropriately skilled and experienced employees, contractors and consultants. Failure to achieve any one or more of those factors may have an adverse effect on the Company's development activities and its financial position.

Operations may be affected by various factors, including failure to achieve predicted grades or production rates in exploration and production; operational and technical difficulties encountered in production; difficulties in commissioning and operating plant and equipment; mechanical failure or plant breakdown; adverse weather conditions; industrial and

environmental accidents; industrial disputes; and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

(k) ***Mineral Reserves and Resources estimates risk***

The Reserve and Resource estimates for the existing mineral properties of the Company are estimates only which were valid when originally calculated and may alter significantly when new information or techniques become available. In addition, by their very nature, estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. No assurance can be given that any particular level of recovery of minerals from the Reserves and Resources will in fact be realised or that an identified Reserve or Resource will ever qualify as a commercially mineable (or viable) deposit that can be economically exploited.

The variables on which estimates of Resources and Reserves are made include a number of factors and assumptions such as historical production, assumed effects of regulation by government agencies, assumptions regarding future prices and future capital and operating costs. Estimates of Reserves, Resources and production costs can also be affected by such factors as environmental regulations, weather, unforeseen technical difficulties, unusual and unexpected geological formations and work interruptions.

Material changes in Resources and Reserves, grades, stripping ratios or recovery rates may affect the economic viability of projects. Reserve and Resource estimates should not be interpreted as assurances of mine life or of the profitability of current or future operations.

(l) ***Geopolitical and sovereign risks generally***

Changes in legislation and government policy in Australia and Tunisia (including taxation and monetary policies and corporations laws) could materially affect the operating results of the Company.

The Company will be subject to the risks associated with operating in Tunisia generally which may include economic, social or political instability or change, hyperinflation, currency non-convertibility and instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations and government control over mineral properties.

(m) ***Environmental risks***

The operations and proposed activities of the Company are subject to Tunisian laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment.

It is the Company's policy to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws, in order to minimise damage to the environment and risk of liability. Nevertheless, there are certain risks inherent in the Company's activities which could subject the Company to extensive liability.

There can be no assurance that new environmental laws, regulations or stricter enforcement policies, if implemented, will not oblige any company to incur significant expense and

undertake significant investment, which could have a material adverse effect on its business, financial conditions and results of operations.

Further, whether in Tunisia or any other jurisdiction in which operations may be carried on, following cessation of any production from any future operations, the operating parties will be required to participate in clean-up programmes resulting from any contamination from operations in which it participates, removal of disused plant and equipment and where necessary, restoring the environment that has been disturbed in the course of operations. The cost of that participation may be considerable if operations result in significant environmental liabilities being incurred. In such a case, any allowance made for rehabilitation may possibly be inadequate.

Relevant government departments from time to time review the environmental bonds that are placed on tenements. Future bonding requirements may be detrimental to the financial position of the Company.

(n) ***Volatility in the price of minerals***

As an explorer and developer of phosphate (a critical raw material on the European Union list) and, potentially, other minerals, any future earnings of the Company are expected to be closely related to the price of those commodities.

Commodities prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include worldwide and regional supply and demand for commodities, general world economic conditions and the outlook for interest rates, inflation and other economic factors on both a regional and global basis. These factors may have a positive or negative effect on the Company's exploration and Project development plans, together with the ability to fund those plans and activities.

(o) ***Volatility in the market price of securities***

There is no assurance that an active trading market for the Company's securities will be sustained.

Shareholders should recognise that the price of Shares may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Many factors affect the price of shares including local and international stock markets, movements in interest rates, economic and political conditions, investor and consumer sentiment, terrorism or other hostilities and currency fluctuations.

(p) ***Contractual risk***

All companies operate through a series of contractual relationships with operators, technical experts, project managers and contractors generally. Joint venture, access and farm in contracts may also be entered into in relation to various projects. All contracts carry risks associated with the performance by the parties of their obligations as to time and quality of work performed.

While there are no specific issues relating to the Company's material contracts currently known to the Company (apart from the matters outlined in Litigation Risk in Section 5.2 above), the inability of contracting parties to meet contracted obligations can adversely affect the capacity of the other parties to carry out their own obligations or can cause a project to be unable to be

implemented or continued because of their own lack of adequate financial capacity to meet the obligations of the defaulting party. To the extent that third parties default in their obligations under such documents, it may be necessary for the Company to approach a court to seek legal remedy. Such legal action may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted on favourable terms.

(q) ***Reliance on key personnel***

The ability of the Company to achieve its objectives depends on the access to key personnel and external contractors who provide technical expertise and other services. If the Company cannot secure key personnel or external contractors or if the services of the present key personnel and external contractors cease to become available to the Company, this may affect the Company's ability to achieve its objectives.

(r) ***Potential acquisitions***

The Company may make potential acquisitions in other resource projects which may expose the Company to additional risks.

7.3. General Risks

A number of factors which are outside of the Company's control may significantly impact on the Company, its performance and the price of New Shares. These factors include:

(a) ***Economic Risk***

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

(b) ***Share market and investment risks***

There can be no assurance that an active trading market will exist for the Company's securities. The price of Shares might rise or fall.

Factors affecting the price at which securities are traded on ASX could include local and international stock markets, movements in interest rates, economic and political conditions, investor and consumer sentiment, terrorism or other hostilities and currency fluctuations.

Holding securities will be subject to risks of a general nature relating to investment in shares and securities. The Company is presently a small company in terms of market capitalisation. As a consequence there may be relatively few buyers and sellers of securities on ASX at any given time and the market price may be highly volatile, particularly in times of share market turbulence or negative investor sentiment. This may present difficulties for Shareholders seeking to liquidate their holdings. None of the Company, its Directors or officers warrant the future performance of the Company or any return on an investment in the Company.

(c) ***General economic conditions***

The Company's operating and financial performance is influenced by a variety of general economic and business conditions including the level of inflation, interest rates and government fiscal, monetary and regulatory policies. Prolonged deterioration in general economic conditions, including an increase in interest rates, could be expected to have a corresponding adverse impact on the Company's operating and financial performance.

(d) ***Underwriting Risk***

The Entitlement Offer is underwritten which means there is a high level of certainty that the Company will raise sufficient money under the Entitlement Offer to carry out its stated objectives for the next 12 months. However, there are circumstances outlined in this document that may lead to the Underwriting Agreement being terminated (see Section 9.4 for further information).

(e) ***Quotation of New Shares***

Whilst the Company intends to apply for Official Quotation of the New Shares, there is no guarantee that the Company will be able to fulfil the ASX's requirements in relation to Official Quotation of those New Shares and. If so, the New Shares will not be tradeable on ASX.

(f) ***Stock Market Risks***

The market price of the Shares may be significantly adversely affected by a variety of factors including (but not limited to) perceptions of, or variations in, general market conditions, operating performance, commodity prices, project and country risk, Board and management strength and expertise and a broad range of other factors which may or may not relate to the Company's operations.

(g) ***Insurance risks***

Insurance of all risks associated with exploration, mining and production activities may not be available at all, or may only be able to be obtained at an unacceptable cost, and so in certain circumstances the Company's insurance may not be of a nature or level to provide adequate coverage. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

(h) ***Fiscal risks***

These risks involve the imposition of additional taxes, imposts and other charges by government from time to time relating to revenue or cash flow. Industry profitability can be affected by changes in tax policies and the interpretation and application thereof.

(i) ***Litigation***

The Company is presently involved in a number of litigation matters described in Section 7.3(a) above. There is always the risk that the Company may become exposed to other litigation and to the extent that such risks are not covered by insurance, an adverse outcome in litigation or the cost of responding to potential or actual litigation may have a material adverse impact on financial performance.

(j) ***Safety Legislation***

Current and future exploration and production facilities are subject to a range of safety legislation which may change in a manner that may include requirements, in addition to those now in effect, and a heightened degree of responsibility for companies and their Directors and employees.

(k) ***Changes in accounting policies***

The Company will be subject to the usual business risk that there may be changes in accounting policies which have an adverse impact on the Company.

(l) ***Wars, terrorism, political and natural disasters***

Events may occur within or outside Australia or within or outside Tunisia that could impact upon the world economy, the operations and exploration activities of the Company and the market price of the Company's Shares. These events include war, acts of terrorism, civil disturbance, political intervention and natural events such as earthquakes, floods, fires and poor weather.

(m) ***Valuation***

No formal valuation has been completed of the Company's projects or the Company itself. The Company makes no representation as to the value of the Company or its assets. It is recommended that intending investors and their advisers make their own assessment as to the value of the Company and its assets.

(n) ***Unforeseen Expenditure***

Expenditure may need to be incurred that has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any such additional expenditure requirements, if such expenditure is subsequently incurred, this may adversely affect the expenditure proposals of the Company.

(o) ***Other Risk Factors***

Other risk factors include those normally found in conducting business including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the Company's business or trade.

(p) ***Stock Market Risks***

The market price of the Shares may be significantly adversely affected by a variety of factors including (but not limited to) perceptions of, or variations in, general market conditions, operating performance, commodity prices, project and country risk, Board and management strength and expertise and a broad range of other factors which may or may not relate to the Company's operations.

(q) ***Ukraine Conflict***

The current conflict between Ukraine and Russia (**Ukraine Conflict**) is impacting global economies and financial markets. The nature and extent of the effect the Ukraine Conflict may have on the Company's operations remains uncertain at this time. In the short to medium term, the Company's Share price may be adversely affected by the economic

uncertainty caused by the Ukraine Conflict and the wider effect the conflict has on global economies and financial markets.

The Directors are monitoring the potential secondary and tertiary macroeconomics impacts of the Ukraine Conflict, including the fluctuations in commodity and energy prices and the potential risk of cyber activity impacting governments and businesses. Further, any governmental or industry measures taken in response to the Ukraine Conflict, including limitations on travel and changes to import/export restrictions and arrangements involving Russia, may be adversely impact the Company's operations and are likely to be beyond the control of the Company.

(r) ***Other Risk Factors***

Other risk factors include those normally found in conducting business including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the Company's business or trade.

Before any decision is made to subscribe for securities under the Offer, the above matters, and all other matters described in this document must be carefully considered. The New Shares and New Options to be allotted pursuant to this Prospectus should be regarded as speculative in nature and carry no guarantee with respect to the payment of dividends, return of capital or their market value.

Investment in the Company is regarded as speculative and neither the Company nor any of its Directors guarantees that any specific objective of the Company will be achieved or that any particular performance of the Company or its securities, including the New Shares and New Options offered by this Prospectus will be achieved.

The above list of risk factors should not be taken as exhaustive of the risks faced by the Company or the Shareholders. The above factors, and others not specifically referred to above, may in the future materially affect the Company's financial performance and the value of the Shares.

Copies of documents lodged with ASIC in relation to the Company may be obtained from, or inspected at an office of ASIC.

10.2. Section 713 Prospectus

This Prospectus has been issued under the provisions of section 713 of the Corporations Act. Section 713 enables disclosing entities to issue prospectuses in relation to securities in a class of securities that has been quoted on the ASX at all times in the 12 month period preceding the date of the prospectus, or options to acquire such securities. Copies of documents lodged at ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, an office of ASIC.

The new Shares to be issued under this Prospectus are in a class of securities that has been continuously quoted on the ASX in the 12 month period preceding the date of this Prospectus.

The New Options are options to acquire Shares in the Company.

As the New Shares form part of the same class as the Company's existing Shares, ASIC Corporations (Exposure Period) Instrument 2016/74 allows the Company to accept Entitlement and Acceptance Forms upon the lodgement of this Prospectus with ASIC.

The level of disclosure that applies to this Prospectus requires that it must contain all the information investors and their professional advisers would reasonably require to make an informed assessment of:

- (a) the effect of the Offers on the Company; and
- (b) the rights and liabilities attaching to the securities being offered.

The Prospectus must contain this information only to the extent to which it is reasonable for investors and their professional advisers to expect to find the information in the Prospectus. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospectus of the issuing company. Accordingly, this Prospectus does not contain the same level of disclosure as a prospectus of an unlisted company or an initial public offering prospectus.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that the Company has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the date of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company. Information that is already in the public domain has not been reported in this Prospectus, other than that which is considered necessary to make the Prospectus complete.

10.11. Litigation

The Company's wholly owned subsidiary, Celamin Pty Limited, has been in dispute with its joint venture partner, Tunisian Mining Services (**TMS**) since January 2015, regarding ownership and control of CPSA, which is the operating company that held the Chaketma Phosphate Project. No guarantee is given that any of the current legal proceedings will be resolved in favour of the Company or that any legal remedy will ultimately be favourable.

Chaketma Phosphates SA (**CPSA**), a joint venture in which PhosCo holds a 51% stake through its wholly owned subsidiary Celamin Pty Limited (Celamin), previously owned the Chaketma permit and had a pending application for the Chaketma Phosphate Project. However, this application by CPSA was unsuccessful. Instead, a larger overlapping permit, Gasaat, was granted entirely to PhosCo through a separate, wholly-owned subsidiary.

The CPSA JV no longer holds any permits or permit applications. In light of this development and subject to full compliance with applicable law, PhosCo does not intend to provide further investment to the CPSA joint venture.

Celamin has received correspondence from TMS allegedly Celamin violated the objectives and spirit of the CPSA JV agreement, including applying for a new permit overlapping the Chaketma permit and abuse of majority power within CPSA. These claims will be vigorously defended if TMS opts to proceed to ICC arbitration under the JV agreement.

The Company notes that TMS still owes ICC arbitration damages, costs and interests from TMS illegally misappropriating Celamin's CPSA shares amounting to TND14M (A\$7M). Despite being entitled to the damages under the Arbitral Award, the Company has not recognised these amounts as an asset on its balance sheet due to TMS' repeated non-compliance with the Arbitral Award and uncertainty about TMS' capacity to pay the damages.

Other than set out above, the Company is not involved in any material legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company.
